PREFACE

All features of previous issues of the Condensed Preliminary Trade Report are continued in the present number. It consists, as before, of two main sections—A Review of Canada's Foreign Trade during the fiscal year just closed (1929-30), and a series of statistical tables ("Condensed Statistical Record of Canadian Trade"), partly summary and historical, but mainly a presentation of the main items of the trade of Canada with the more important countries of the world.

In the first section, the external trade of Canada is examined from several angles and the outstanding features of the year explained in both text and tabular form. This section also contains historical summary of Canada's import and export trade by decades from 1890 to 1930, distinguishing imports and exports for principal countries and commodities.

All the tables have been revised and expanded to meet altered conditions of trade. Commercial exchange with eighty-three different countries is dealt with in detail.

Throughout the report, figures for the fiscal year ended March 31, 1930 are unrevised; those for earlier years are final.

The "Review of Canada's Foreign Trade for 1929-30" was written by Mr. W. A. Warne, B.A., chief of the External Trade Branch of the Dominion Bureau of Statistics, while the "Condensed Statistical Record" was compiled by Mr. A. L. Neal, B.A.B.S.c. (econ.), Statistician of the Branch.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, June 16, 1930.

REVIEW OF CANADA'S FOREIGN TRADE, 1929-30

Canada, in international trade, during the calendar year 1929, even with a very considerable decline in export trade as also a slight decrease in import trade, has maintained her high position among the leading trading countries of the world. In 1929 as in 1928, the Dominion stood in fifth position in imports, exports and aggregate trade. In export trade Canada leads the world in the export of printing paper, nickel and asbestos; occupies second place in exports of automobiles, wheat and wheat flour; and fourth place in exports of wood pulp, as well as a very high place in the world's exports of many staple products such as lumber and timber, fish, copper, barley, cheese, raw furs, whiskey, meats, rubber tires, farm implements, pulpwood, cattle, raw gold, silver, lead, rye, oats, rubber footwear, leather and hides.

During the past three fiscal years the imports and exports of Canada, with increase or decrease, 1930 compared with 1928 and 1929, were:

	Years ended March 31			Increase (+) Decrease (—) 1930 compared with	
	1928	1929	1930	1928	1929
	\$	\$	\$	\$	\$

Balance of Trade:					
Favourable (+) Unfavourable (—)	(+) 141,641,568	(+) 123,216,984	(—) 103,335,512	(—) 244,977,080	(—) 226,552,496

The decrease in the exports was mainly accounted for by the falling off in the export of grains, particularly wheat, to the United Kingdom and Continental Europe, due partly to lower yields, but also reflecting temporary marketing policies as well.

If the exports of barley, flaxseed, oats, rye, wheat and wheat flour are eliminated from the Dominion's domestic exports for 1929 and 1930, it will be noted that the exports of "all other commodities" show an increase for the year 1930 over 1929 of \$23,892,074. The particulars are set forth in the following table:—

CANADA'S DOMESTIC EXPORTS, LESS EXPORTS OF BARLEY, FLAXSEED, OATS, RYE, WHEAT AND WHEAT FLOUR

	1929	1930	Increase (+) Decrease (—)
	\$	\$	\$

Analysis of Total Trade:—Canada's total foreign trade during the year ended March 31, 1930, amounted to \$2,393,212,000, compared with a similar trade in 1929 valued at \$2,654,575,000 and in 1928 at \$2,359,555,000; showing a decrease compared with the year 1929 of \$261,363,000 or 9.8 per cent, but compared with the year 1928 an increase of \$33,657,000 or 1.4 per cent. Imports as well as exports show a decrease compared with the year 1929, the decrease in imports amounting to \$17,406,000 or 1.4 per cent, and in exports to \$243,958,000 or 17.6 per cent. During 1930 imports amounted to \$1,248,274,000 compared with an import trade in 1929 valued at \$1,265,679,000, and in 1928 at \$1,108,956,000; the decrease in imports in 1930 compared with 1929 amounting to \$17,406,000 or 1.4 per cent, but compared with 1928 an increase of \$139,317,000 or 12.5 per cent; while the exports (domestic and foreign combined) during the year 1930 were valued at \$1,144,938,000 compared with a similar trade in 1929 valued at \$1,388,896,000 and in 1928 at \$1,250,598,000; the decrease in 1930 compared with 1929 amounting to \$243,958,000 or 17.6 per cent, and compared with 1928 to \$105,660,000 or 8.4 per cent. Canada's domestic exports in 1930 amounted to \$1,120,258,000; in 1929 to \$1,363,709,000, and in 1928 to \$1,228,349,000; the decrease in 1930 compared with 1929 amounting to \$243,451,000 or 17.8 per cent, and compared with 1928 to \$108,091,000 or 8.8 per cent.

Analysis by groups.—The decrease in the imports, 1930 compared with 1929, amounting to \$17,406,000, occurred in four of the nine main groups; while the decrease in the domestic exports totalling \$243,451,000, occurred also in four of the nine main groups. The decreases in the imports and exports, in 1930 compared with 1929, occurred in the identical main groups, viz.: Agricultural and Vegetable Products; Animals and Animal Products; Fibres, Textiles and Textile Products; and Iron and Its Products. The decreases in these main groups were, in the case of imports \$58,824,000, and in the case of domestic exports \$291,905,000; while the increases in the main groups of Wood, Wood Products and Paper; Non-Ferrous Metals and Their Products; Non-Metallic Minerals and Their Products; Chemicals and Allied Products; and Miscellaneous Commodities; in the case of imports amounted to \$41,418,000, and in the case of domestic exports to \$48,454,000. The values of the main groups of imports, arranged in order of importance, with increase or decrease, 1930 compared with 1929, were—(1) Iron and Its Products, \$316,879,000, decrease \$29,737,000; (2) Agricultural and Vegetable Products \$227,049,000, decrease \$6,081,000; (3) Non-Metallic Minerals and Their Products, \$186,496,000, increase \$19,532,000; (4) Fibres, Textiles and Textile Products, \$185,241,000, decrease \$21,198,000; (5) Non-Ferrous Metals and Their Products, \$87,950,000, increase \$12,512,000; (6) Miscellaneous Commodities \$73,946,000, increase \$5,454,000; (7) Animals and Animal Products, \$69,854,000, decrease \$1,808,000; (8) Wood, Wood Products and Paper, \$60,951,000, increase \$1,736,000; and (9) Chemicals and Allied Products \$39,908,000, increase \$2,184,000; while the values of the main groups of domestic exports, arranged in order of importance, with increase or decrease, 1930 compared with 1929, were—(1) Agricultural and Vegetable Products, \$384,636,000, decrease \$261,878,000; (2) Wood, Wood Products and Paper, \$289,567,000, increase \$945,000; (3) Non-Ferrous Metals and Their Products, \$154,319,000, increase \$41,541,000; (4) Animals and Animal Products, \$133,009,000, decrease \$25,748,000; (5) Iron and Its Products, \$78,590,000, decrease \$3,667,000; (6) Non-Metallic Minerals and Their Products, \$28,545,000, increase \$1,143,000; (7) Chemicals and Allied Products, \$22,468,000, increase \$3,030,000; (8) Miscellaneous Commodities, \$20,058,000, increase \$1,794,000; and (9) Fibres, Textiles and Textile Products, \$9,066,000, decrease \$612,000. For further details of Canada's commodity imports and exports, with increases or decreases, 1930 compared with 1929, see statistics in the following table:—

For further information respecting Canada's trade in principal commodities with all countries, fiscal years 1928, 1929 and 1930, for imports see Table No. 8, pages 70 to 88 and for exports see Table No. 9, pages 89 to 100.

Trade with the United Kingdom.—The total trade of Canada with the United Kingdom during the year ended March 31, 1930, amounted to \$472,355,000, compared with a similar trade in 1929 of \$625,702,000, and in 1928 of \$599,199,000; the decrease in 1930 compared with the year 1929 amounting to \$153,347,000 or 24.5 per cent, and compared with 1928 to \$126,844,000 or 21.2 per cent. Imports as also exports in 1930 show a decrease compared with 1929, the decrease in imports amounting to \$4,861,000, and in exports to \$148,486,000. Imports from the United Kingdom in 1930 were valued at \$189,180,000, in 1929 at \$194,041,000, and in 1928 at \$186,436,000; the decrease in 1930 compared with 1929 amounting to \$4,861,000 or 2.5 per cent, but compared with 1928 the increase was \$2,744,000 or 1.5 per cent; while total exports from Canada to the United Kingdom in 1930 amounted to \$283,175,000, in 1929 to \$431,661,000, and in 1928 to \$412,763,000; the decrease in 1930 compared with 1929 amounting to \$148,486,000 or 34.4 per cent, and with 1928 to \$129,588,000 or 31.4 per cent. The domestic exports from Canada to the United Kingdom in 1930 were valued at \$281,838,000, in 1929 at \$429,730,000, and in 1928 at \$410,691,000; the decrease in 1930 compared with 1929 amounting to \$147,892,000 or 34.4 per cent and with 1928 to \$128,853,000 or 31.4 per cent. It should be noted, however, that Canada's declared exports to the United Kingdom do not represent the actual amount of Canadian products received by the United Kingdom from Canada, due in large measure to diversion of Canadian grain, especially wheat, from its original destination, the United Kingdom, to other destinations, chiefly European. This diversion takes place in the movement of Canadian products to the United Kingdom via the United States. If an adjustment was made for this diversion the revised exports to the United Kingdom would be less and those to other European countries greater than the declared exports.

The decrease in the imports from the United Kingdom, 1930 compared with 1929, amounting to \$4,861,000, occurred in three of the nine main groups; while the decrease in domestic exports, amounting to \$147,892,000, occurred in five of the nine main groups. The main groups in imports to show decreases were: Agricultural and Vegetable Products; Animals and Animal Products; and Fibres, Textiles and Textile Products; the total decreases for these groups amounting to \$11,544,000, while the other main groups, viz.: Wood, Wood Products and Paper; Iron and Its Products; Non-Ferrous Metals and Their Products; Non-Metallic Minerals and Their Products; Chemicals and Allied Products; and Miscellaneous Commodities; show increases totalling \$6,683,000. The decrease in the domestic exports to the United Kingdom during the same interval, occurred in five of the nine main groups, viz.: Agricultural and Vegetable Products; Animals and Animal Products; Wood, Wood Products and Paper; Iron and Its Products; and Non-Ferrous Metals and Their Products; the total decreases for these main groups totalling \$149,179,000: while the other four main groups to show increases were: Fibres, Textiles and Textile Products; Non-Metallic Minerals and Their Products; Chemicals and Allied Products; and Miscellaneous Commodities; the increases for these groups amounting to \$1,287,000. The values of the main import groups, arranged in order of importance, with increase or decrease, 1930 compared with 1929, were: (1) Fibres, Textiles and Textile Products, \$68,244,000, decrease \$8,777,000; (2) Agricultural and Vegetable Products, \$51,279,000, decrease \$2,391,000; (3) Iron and Its Products, \$21,640,000, increase \$2,643,000; (4) Non-Metallic Minerals and Their Products, \$13,602,000, increase \$1,501,000; (5) Miscellaneous Commodities, \$10,943,000, increase \$908,000; (6) Non-Ferrous Metals and Their Products, \$7,504,000, increase \$850,000; (7) Chemicals and Allied Products \$5,429,000, increase \$465,000; (8) Animals and Animal Products, \$5,289,000, decrease \$376,000; and (9) Wood, Wood Products and Paper, \$5,251,000, increase \$316,000: while the values of the main domestic export groups, arranged in order of importance, with increase or decrease, 1930 compared with 1929, were: (1) Agricultural and Vegetable Products, \$186,522,000, decrease \$138,584,000; (2) Animals and Animal Products, \$40,674,000, decrease \$6,971,000; (3) Wood, Wood Products and Paper, \$21,542,000, decrease \$808,000; (4) Non-Ferrous Metals and Their Products, \$15,404,000, decrease \$943,000; (5) Iron and Its Products \$6,848,000, decrease \$1,873,000; (6) Chemicals and Allied Products, \$4,889,000, increase \$852,000; (7) Miscellaneous Commodities, \$3,031,000, increase \$89,000; (8) Non-Metallic Minerals and Their Products, \$1,952,000, increase \$181,000; and (9) Fibres, Textiles and Textile Products, \$977,000, increase \$165,000. For further details respecting Canada's commodity imports from and exports to the United Kingdom, with increases or decreases, 1930 compared with 1929, see statistics in the following table.

CANADA'S PRINCIPAL IMPORTS FROM AND EXPORTS TO UNITED KINGDOM

For further information respecting Canada's trade in principal commodities with United Kingdom, fiscal years 1929 and 1930, for imports see table No. 8, pages 70 to 88 and for exports see Table No. 9, pages 89 to 100.

Trade with United States.—The total trade of Canada with the United States for the year ended March 31, 1930, amounted to \$1,384,062,000, compared with a similar trade in 1929 valued at \$1,389,279,000, and in 1928 at \$1,215,682,000; the decrease in 1930 compared with 1929 amounting to \$5,217,000 or 0.4 per cent, but compared with the year 1928 the increase was \$168,380,000 or 13.8 per cent. Compared with 1929 the imports in 1930 show a decrease of \$20,562,000, while the exports show an increase of \$15,345,000. Imports from the United States in 1930 were valued at \$847,450,000 in 1929 at \$868,012,000, and in 1928 at \$718,896,000; the decrease in 1930 compared with 1929 being \$20,562,000 or 2.4 per cent, but compared with 1928 the increase amounted to \$128,554,000 or 17.8 per cent; while the total exports to the

United States in 1930 amounted to \$536,612,000, in 1929 to \$521,267,000 and in 1928 to \$496,786,000; the increase in 1930 compared with 1929 amounting to \$15,345,000 or 2.9 per cent and compared with 1928 to \$39,826,000 or 8.0 per cent. The domestic exports to the United States in 1930 were valued at \$514,957,000, in 1929 at \$499,612,000, and in 1928 at \$478,145,000; the increase over 1929 amounting to \$15,345,000 or 3.1 per cent, and over 1928 to \$36,812,000; or 7.7 per cent. It is generally understood, with reference to the exchange of goods between Canada and the United States that there is a considerable discrepancy in the trade figures published by the two countries. When adjustments are made to bring the trade figures of the two countries to a common basis there is practically no discrepancy in the trade figures respecting the movement of goods from Canada to the United States, though with respect to the movement of goods from the United States to Canada there is a slight discrepancy. The United States Department of Commerce is aware that a large percentage of the exports shown as shipped to Canada are really only intransit to overseas countries via Canada. On pages 31 and 32 of Trade Information Bulletin No. 602 re "Foreign Trade of the United States, 1928", the Bulletin states that "the figures of trade by continents as originally published are somewhat misleading in the case of exports to North America and to Europe. This is due to the fact that especially during recent years, large quantities of grain have been shipped through Canada to foreign countries, almost exclusively to Europe, which, because the exporter at the time of shipment does not know the final destination, are credited to Canada". Such shipments do not appear in the import or export trade of Canada, being considered as in transit trade. The amount of these grain shipments to Canada has varied in recent years, in 1927 amounting to \$113,900,000 and in 1929 to \$49,400,000. It will appear from the statistics in the following table that when these grain shipments are eliminated from the United States exports to Canada the revised United States exports to Canada and Canada's imports from the United States agree fairly well. The excess of the United States revised figures over Canada's adjusted imports from the United States represent other commodities than grain intransit to foreign countries via Canada.

MOVEMENT OF GOODS FROM UNITED STATES TO CANADA

Calendar Years	Total Unrevised Exports from United States to Canada	United States Exports of Grains to Canada	Total Revised Exports from United States to Canada	Canada's Adjusted Imports from United States
	\$	\$	\$	\$
1925	648,800,000	57,300,000	591,500,000	578,600,000
1926	738,600,000	56,200,000	682,400,000	668,750,000
1927	836,500,000	113,900,000	722,600,000	706,300,000
1928	914,700,000	82,800,000	831,900,000	825,100,000
1929	948,500,000	49,400,000	899,100,000	893,200,000

The decrease in the imports from the United States, amounting to \$20,562,000, occurred in four of the nine main groups, while the increase in the domestic exports, amounting to \$15,345,000, occurred in six of the nine main groups. The decrease in the imports occurred in the main groups of Agricultural and Vegetable Products; Animals and Animal Products; Fibres, Textiles and Textile Products; and Iron and Its Products: while the increase in the domestic exports occurred in the main groups of Wood, Wood Products and Paper; Iron and Its Products; Non-Ferrous Metals and Their Products; Non-Metallic Minerals and Their Products; Chemicals and Allied Products; and Miscellaneous Commodities. The decrease in the four main import groups that had decreases totalled \$52,992,000, while the increase in the five groups that had increases amounted to \$32,430,000. In exports, the increase in the six main export groups that had increases amounted to \$44,314,000, while the decrease for those groups which had decreases totalled \$28,969,000. The values of the nine import groups arranged in order of importance, with increase or decrease, 1930 compared with 1929, were: (1) Iron and Its Products, \$284,166,000, decrease \$32,923,000; (2) Non-Metallic Minerals and Their Products, \$149,294,000, increase \$14,140,000; (3) Agricultural and Vegetable Products, \$98,752,000, decrease \$4,915,000; (4) Non-Ferrous Metals and Their Products, \$73,739,000, increase \$11,633,000; (5) Fibres, Textiles and Textile Products, \$71,998,000, decrease \$9,892,000; (6) Miscellaneous Commodities, \$53,388,000, increase \$4,703,000; (7) Wood, Wood Products and

Paper, \$51,736,000, increase \$1,172,000; (8) Animals and Animal Products, \$37,393,000, decrease \$5,262,000; and (9) Chemicals and Allied Products, \$26,985,000, increase \$782,000: while the values of the nine domestic export groups, arranged in order of importance, with increase or decrease, 1930 compared with 1929, were: (1) Wood, Wood Products and Paper, \$237,577,000, increase \$1,912,000; (2) Non-Ferrous Metals and Their Products, \$101,729,000, increase \$38,507,000; (3) Animals and Animal Products, \$66,894,000, decrease \$18,099,000; (4) Agricultural and Vegetable Products, \$48,627,000, decrease \$9,901,000; (5) Non-Metallic Minerals and Their Products, \$18,662,000, increase \$668,000; (6) Miscellaneous Commodities, \$13,336,000, increase \$993,000; (7) Chemicals and Allied Products, \$12,536,000, increase \$1,756,000; (8) Iron and Its Products, \$11,635,000, increase \$478,000; and (9) Fibres, Textiles and Textile Products, \$3,961,000, decrease \$969,000. For further details respecting Canada's commodity imports from and exports to the United States, with increases or decreases, 1930 compared with 1929, see statistics in the following table:—

CANADA'S PRINCIPAL IMPORTS FROM AND EXPORTS TO UNITED STATES

For further information respecting Canada's trade in principal commodities with United States, fiscal years 1929 and 1930, for imports see Table No. 8, pages 70 to 88 and for exports see Table No. 9, pages 89 to 100.

Trade with Other Countries.—The British Preferential Tariff enacted in 1897, which granted a trade preference to the products and manufactures of the United Kingdom and reciprocating Dominions and Possessions of $12\frac{1}{2}$ per cent from April 23, 1897, which was increased to 25 per cent from June 30, 1898, and to $33\frac{1}{3}$ per cent from June 30, 1900, and the New Customs Tariff Act, 1907, which continued the preferential policy, as well as trade treaties and agreements, negotiated with British and Foreign Countries, have had the effect of stimulating Canada's external trade. When the British preference became effective in 1897 Canada's total imports from the United Kingdom in that year only amounted to \$29,401,000, compared with an import in 1887 valued at \$44,741,000, and in 1873 at \$67,997,000, the decrease in 1897 compared with 1887, amounting to \$15,340,000 and with 1873 to \$38,596,000. From 1873 to 1897 imports from the United Kingdom decreased \$38,596,000 or 56.7 per cent, while from 1897 to 1930 they increased \$159,779,000 or 543.4 per cent. The British Preferential Tariff was no doubt largely responsible for the increase in imports from the United Kingdom as well as from other parts of the Empire. By reference to the statistics in the following table giving "Trade of Canada with the British Empire and Foreign Countries" it will be noted that in the fiscal year 1896, imports from "Other British Empire", i.e., British Empire, except the United Kingdom, amounted to \$2,389,000, in 1906 to \$14,606,000, in 1916 to \$27,826,000, in 1926 to \$45,089,000, and in 1930 to \$63,524,000; while domestic exports to the "Other British Empire" in 1896 were valued at \$4,048,000, in 1906 at \$10,965,000, in 1916 at \$30,677,000, in 1926 at \$90,330,000, and in 1930 at \$97,904,000. During the same years the imports from "Other Foreign Countries", i.e., Foreign Countries, except the United States, were: in 1896, \$16,619,000, in 1906, \$30,694,000, in 1916, \$32,091,000, in 1926, \$109,890,000, and in 1930, \$148,120,000; while domestic exports to "Other Foreign Countries" were: in 1896, \$5,152,000, in 1906, \$13,516,000, in 1916, \$57,974,000, in 1926 \$241,800,000, and in 1930, \$225,558,000. The decrease in 1930 was chiefly due to decreased exports of grains, especially wheat, to Continental Europe and the Orient, due partly to lower yields, but also reflecting temporary marketing policies as well. From 1911 to 1930 imports from "Other British Empire" increased \$43,991,000 or 225.2 per cent, and from "Other Foreign Countries" \$100,687,000 or 212.1 per cent, while the domestic exports to "Other British Empire" from 1911 to 1930 increased \$81,094,000 or 482.4 per cent and to "Other Foreign Countries" \$204,325,000 or 962.3 per cent.

With further reference to the trade of Canada with Other Countries than the United Kingdom and the United States, attention is directed to tables Nos. 10-36, pages 101 to 134, giving the trade of Canada in leading commodities with 81 British and Foreign Countries for the fiscal years 1929 and 1930.

Relation between Trade in Raw and Manufactured Products.—Canada was not engaged to any great extent in manufacturing processes for some years after Confederation, and consequently her imports consisted very largely of manufactured goods and her exports of raw and semi-manufactured products. Since the opening of the twentieth century, a conspicuous change in the character of Canada's imports and exports has developed, a large percentage of the imports consisting of raw and semi-manufactured products for use in Canadian manufacturing industries, and the exports consisting to a considerable degree of products which have undergone some process of manufacture. Canada, during this period, has passed through much the same stages of development in her economic life as did the United States from 1870 to 1900. From 1870 to 1900 the imports of raw materials into the United States increased from 25.2 to 44.0 per cent of the total imports; and fully manufactured products decreased from 62.1 to 40.2 per cent; while exports of raw materials from the United States during the same interval decreased from 67.7 to 40.2 per cent of the total exports, and fully manufactured products increased from 28.6 to 48.6 per cent. Statistics for 1929 show a further improvement, though the percentage of imports of raw materials is less and of manufactured products more than for any year since 1924. Compared with 1900 the 1929 statistics show that imports of raw materials into the United States increased from 44.0 per cent to 47.9 per cent of the total

imports, and exports decreased from 40.2 to 29.6 per cent of the total exports; whereas imports of fully manufactured products decreased from 40.2 to 32.3 per cent and exports increased from 48.6 to 56.6 per cent.

Canada, however, has not made as great progress as the United States in increasing imports of raw materials and exports of manufactured products and curtailing exports of raw materials and imports of manufactured products, yet she has made some progress in this respect. From 1914 to 1929 the value of Canada's imports of raw materials increased from \$135,200,000 to \$290,500,000 or 114.8 per cent, while the domestic exports increased from \$272,600,000 to \$661,400,000 or 142.6 per cent. During this period the percentage of imports of raw materials of the total imports increased from 21.8 to 23.0 per cent, while the exports of the total domestic exports decreased from 63.2 to 48.5 per cent. In 1929 the percentage of imports of raw materials of the total imports was less than for any year for the past nine years, while the percentage of exports of raw materials of the total domestic exports was greater than for any year for the past nine years. Canada's imports of fully manufactured products, from 1914 to 1929 increased from \$426,300,000 to \$874,000,000 or 105.0 per cent, while the domestic exports of fully manufactured products during the same period increased from \$115,300,000 to \$507,200,000 or 339.9 per cent. The percentage of the imports of fully manufactured products, from 1914 to 1929 increased from 68.9 per cent to 69.0 per cent, while the exports of the total domestic exports increased from 26.7 to 37.2 per cent. In 1929 the percentage of imports of fully manufactured products of the total imports was greater than for any year for the past nine years, while the exports of the total domestic exports was less than for any year for the past nine years.

In Canada grains, chiefly wheat, and in the United States raw cotton, grains, principally wheat, and raw tobacco are the leading commodities which comprise the bulk of the exports of raw materials. It is of interest to note the results in Canada and the United States when certain staple raw materials, of farm origin, which are reproducible annually, are eliminated; such as grains, fresh fruits and vegetables, seeds and raw tobacco, for both countries, as also raw cotton for the United States. The results, for the years 1900 to 1929, are set forth in the following table:—

RAW MATERIALS EXPORTED FROM CANADA AND THE UNITED STATES, 1900 TO 1929
(Values in Millions of Dollars)

Fiscal Years	Canada's Exports of Raw Materials				United States Exports of Raw Materials					
	Grains, fresh fruits and vegetables, seeds and raw tobacco		Other raw materials		Grains, fresh fruits and vegetables, seeds and raw tobacco		Raw cotton		Other raw materials

1924.....	314.2	30.1	139.3	13.3	352.9	8.4	904.0	21.4	248.9	5.9
1925.....	316.4	29.6	161.1	15.1	595.6	12.4	1,061.0	22.2	227.6	4.8
1926.....	453.3	34.5	166.7	12.6	398.8	8.6	917.7	19.8	233.9	5.0
1927.....	422.6	33.8	155.8	12.4	501.1	10.2	866.9	17.8	333.9	7.0
1928.....	414.4	33.7	165.6	13.5	491.4	10.3	820.5	17.2	229.1	4.8
1929.....	495.5	36.3	165.9	12.2	473.8	8.9	868.2	16.5	221.8	4.2

According to the statistics in the above table Canadian and the United States exports of "Other raw materials", from 1900 to 1929 (i.e., total exports of raw materials less certain raw materials which are reproducible annually), increased as follows: Canada from \$48,500,000 to \$165,900,000, or 242.1 per cent, and the United States from \$82,700,000 to \$221,800,000, or 168.2 per cent. In the case of Canada the percentage of the exports of "Other raw materials" of the total domestic exports, from 1900 to 1929, decreased from 28.8 to 12.2 per cent and in the case of the United States from 6.0 to 4.2 per cent.

It will be observed from the statistics in the following table, showing "Canada's Imports and Exports by Leading Countries, according to Degree of Manufacture", fiscal year 1929, that Canada's imports from those countries with highly developed manufacturing industries consist of manufactured products, and her exports to those countries are made up largely of raw and semi-manufactured products; while on the other hand Canada's trade with countries whose industries are not so highly developed consist chiefly, in the case of imports, of raw and semi-manufactured products and in the case of exports, of manufactured products.

A further analysis of the statistics in the foregoing table, relative to Canada's imports and exports according to degree of manufacture, indicates: (1) that 89.2 per cent of Canada's imports from Europe in 1929 consisted of fully manufactured goods, 5.9 per cent of raw materials and 4.9 per cent of semi-manufactured products; while 72.5 per cent of her exports to Europe was made up of raw materials, 21.2 per cent of fully manufactured goods and 6.3 per cent of

semi-manufactured products; the proportion of the trade with the United Kingdom being, imports, fully manufactured goods 89.1 per cent, raw materials 5.8 per cent, and semi-manufactured products 5.1 per cent; and exports, raw materials 73.1 per cent, fully manufactured goods 21.8 per cent and semi-manufactured products, 5.1 per cent; (2) that 65.1 per cent of the imports from North America consisted of fully manufactured goods, 26.9 per cent of raw materials and 8.0 per cent of semi-manufactured products; while 46.4 per cent of the exports to North America comprised fully manufactured goods, 29.5 per cent raw materials, and 24.1 per cent semi-manufactured products; the proportion of the trade with the United States being: imports, fully manufactured goods 66.4 per cent, raw materials 27.0 per cent and semi-manufactured products 6.6 per cent; and exports, fully manufactured goods 43.4 per cent, raw materials 30.7 per cent and semi-manufactured products 25.9 per cent; (3) that 75.3 per cent of the imports from South America was made up of raw materials, 21.7 per cent of semi-manufactured products and 3.0 per cent of fully manufactured goods, while 95.2 per cent of the exports to that continent consisted of fully manufactured goods, 3.6 per cent of raw materials and 1.2 per cent of semi-manufactured products; (4) that 73.9 per cent of the imports from Asia were fully manufactured goods, 22.8 per cent raw materials and 3.3 per cent semi-manufactured products; while 40.3 per cent of the exports to Asia consisted of fully manufactured goods, 35.2 per cent of raw materials; and 24.5 per cent of semi-manufactured products; (5) that the proportion of the trade with Oceania was: imports fully manufactured goods 46.9 per cent, semi-manufactured products 38.8 per cent, and raw materials 14.3 per cent; and exports, fully manufactured goods 93.9 per cent, semi-manufactured products 4.1 per cent, and raw materials 2.0 per cent; and (6) that the proportion of the imports from Africa was: raw materials 79.2 per cent, semi-manufactured products 12.5 per cent and fully manufactured goods 8.3 per cent; while the proportion of the exports to Africa was fully manufactured goods 86.8 per cent, raw materials 11.6 per cent, and semi-manufactured products 1.6 per cent.

The following table shows how Canada's imports and exports, analysed into the three categories of raw materials, partly manufactured goods, and fully or chiefly manufactured goods, are distributed among the United Kingdom, other British Empire countries, the United States and other foreign countries:—

CANADA'S IMPORTS AND EXPORTS, ACCORDING TO DEGREE OF MANUFACTURE, 1928 AND 1929, DISTINGUISHING IMPORTS FROM AND EXPORTS TO THE BRITISH EMPIRE AND FOREIGN COUNTRIES

Seasonal Fluctuations.—The seasonal movement of Canada's external trade during the fiscal year 1930 presents no abnormal tendencies except in the exports for the months of May, June and July, chiefly due to heavy shipments of wheat in these months. The table of "Canada's Monthly Imports and Exports" indicates that the imports for the summer and early fall months are usually greater than for the other months of the year, except the month of March. In 1929-30, the imports showed the usual seasonal trend, reaching the highest peak during the late spring and summer months, declining slightly in September, with an upward trend in October and November, followed by the usual slump during the winter months. Exports, however as a result of the influence of agricultural products, especially wheat, reach a low point during the summer months, rise to a peak during the autumn, gradually decline during the winter months, and with the opening of navigation on the St. Lawrence in the spring, show an upward tendency. During 1929-30, the seasonal trend for exports was not so marked as in other years, due to falling off in the exports of grains, especially wheat, due partly to lower yields and to restricted marketing policies. The decline in Canada's exports for the wheat months of September, October, November and December, 1929, compared with the same months of 1928, of \$142,700,000, illustrates this. The monthly variations, however, are not so marked as the lack of direct shipping facilities via the St. Lawrence in winter would indicate. The very large increase in recent years of the exports of pulp and paper and other manufactured products, the export of which is not seasonal but almost constant, has had the effect of reducing the proportionate seasonal fluctuations of Canada's total exports. The trade figures for March in each year are usually greater for imports than for any other month, while in the case of exports they are not, as a rule, as large as those for the spring and fall months, when large quantities of grains, especially wheat, are being shipped. The totals for March are always greater than those for April. March figures must include all entries at all ports to the close of the fiscal year (March 31). In all other months the records are closed at Ottawa on the last day of the month. Late import and export entries (which in the case of the great, but distant, port of Vancouver, may cover four or five days' business at the end of each month) are regularly included in totals for the succeeding month. April totals include nothing for March, while they are short some amounts carried forward into May.

Trade by Continents.—During the fiscal year 1930 Canada sold more goods to North America than to any other continent, her sales amounting to \$561,100,000, compared with \$407,700,000 to the continent of Europe, while her purchases from North America amounted to \$871,400,000, contrasted with purchases from Europe valued at \$284,800,000. During 1930 the continents of North America and Europe took 86.5 per cent of the Dominion's total exports as compared with 86.9 per cent in 1929 and 88.5 per cent in 1926. The proportion of products shipped to North America in 1930 was 50.0 per cent, compared with 39.8 per cent in 1929 and 39.2 per cent in 1926; while the proportion sent to Europe in 1930 was 36.5 per cent, compared with 47.1 per cent in 1929 and 49.3 per cent in 1926. From 1926 to 1930 the proportion

of Canada's exports to the United States increased from 36.1 to 45.9 per cent, while the proportion to other North America increased from 3.1 to 4.1 per cent, while the proportion exported to the United Kingdom decreased from 38.6 to 25.2 per cent and to other Europe increased from 10.7 to 11.3 per cent. The continents of North America and Europe in 1930 furnished Canada with 92.6 per cent of her total imports, compared with 93.3 per cent in 1929 and 93.6 per cent in 1926. The proportion of goods received from North America in 1930 was 69.8 per cent, compared with 70.7 per cent in 1929 and 69.5 per cent in 1926, while the proportion received from Europe was 22.8 per cent in 1930, 22.6 per cent in 1929, and 24.1 per cent in 1926. From 1926 to 1930 the proportion of Canada's imports furnished by the United States increased from 65.7 to 67.9 per cent and from Other North America decreased from 3.8 to 1.9 per cent; while the proportion furnished by the United Kingdom decreased from 17.6 to 15.2 per cent and from Other Europe increased from 6.5 to 7.6 per cent. Canada's sales in 1930 to the continents of North and South America were greater, and those to Europe and Asia less than for any year from 1926 to 1929, while sales to Oceania and Africa in 1930 were greater than for any year from 1926 to 1929, except for the year 1929. The decline in the exports of wheat to Europe and the Orient was responsible for the decrease in Canada's exports to the continents of Europe and Asia. Canada's purchases from the continents of North America, Oceania and Africa were greater in 1930 than for any year from 1926 to 1929; while those from Europe were less in 1930 than for 1929, but greater than for the years 1926 to 1928; those from South America were greater in 1930 than for the years 1926, 1927 and 1929, though less than for the year 1928, and those from Asia less for the year 1930 than for any year from 1926 to 1929. From 1926 to 1930 imports from South America increased from \$17,100,000 to \$31,900,000; from Oceania from \$8,700,000 to \$24,500,000; and from Africa from \$800,000 to \$4,500,000, while imports from Asia decreased from \$32,700,000 to \$31,100,000; whereas exports to South America increased from \$27,400,000 to \$34,700,000; to Oceania from \$32,600,000 to \$36,100,000; and to Africa from \$13,300,000 to \$17,500,000, while exports to Asia decreased from \$77,200,000 to \$63,100,000. For further details respecting Canada's trade by continents from 1926 to 1930, see statistics in the following table.

Imports by Principal Countries.—Imports into Canada in 1930 compared with 1929 show increases in eighteen of the thirty-five leading countries, though the decreases for the seventeen countries exceeded the increases for the eighteen countries by \$19,231,000. Of the total decrease in imports in 1930, amounting to \$17,406,000, the British Empire accounted for only \$4,716,000 and foreign countries for \$12,690,000. The principal countries to show decreases were: United States \$20,562,000; United Kingdom \$4,861,000; Fiji \$2,021,000, Cuba, \$1,393,000; British India \$1,334,000; France \$1,057,000; British Guiana \$891,000; Other British West Indies \$872,000; and Trinidad and Tobago \$789,000; while the following show increases: New Zealand \$3,512,000; Peru \$3,044,000; Argentina \$2,805,000; British East Africa, \$1,685,000; Belgium \$1,004,000; Australia \$727,000; Germany \$708,000; and Italy \$703,000. The statistics in the following table showing "Canada's Imports from Thirty-Five Leading Countries, 1930", indicate that the United States and the United Kingdom supplied Canada with 83.1 per cent of her total imports. The United States has continuously, year by year, from 1882 supplied Canada with the largest amount of her imports, the proportion for 1930 amounting to 67.9 per cent. The United Kingdom comes next in order of importance by a wide margin, supplying Canada with 15.1 per cent of her total imports. With reference to supplies from other countries, France has occupied third place for the past three years, as well as during the year 1922, while Germany has occupied fourth place in Canadian imports for the past three years, though in the year 1922 she was in nineteenth place. New Zealand has made remarkable progress in expanding her exports to Canada, having moved up to fifth place from sixth last year, displacing Japan. In 1922 New Zealand occupied twenty-second place in Canadian import trade, imports in that year amounting to \$1,784,000; in 1928 she had advanced to eleventh place, imports amounting to \$8,262,000; and in 1930 to fifth place, imports amounting to \$16,283,000. Belgium has moved up to sixth place from seventh last year; Argentina from eleventh place last year up to eighth place this year, while the Netherlands occupied ninth place as last year.

In 1868, 89.9 per cent of Canada's imports was obtained from the United Kingdom and the United States, proportions being: United Kingdom 56.1 per cent; United States 33.8 per cent. In 1900, 84.9 per cent of the Dominion's imports was furnished by the same two countries, the proportions being: United Kingdom 25.7 per cent; United States 59.2 per cent; whereas in 1930, 83.1 per cent of Canada's total imports came from the United Kingdom and the United States, the proportion for each being: United Kingdom 15.2 per cent; United States 67.9 per cent. From 1868 to 1930 the proportion of the imports into Canada from the United Kingdom fell from 56.1 to 15.2 per cent of the total, while the proportion from the United States rose from 33.8 to 67.9 per cent. The proportionate loss in imports from the United Kingdom, 1868 to 1930, amounted to 40.9 per cent of the total, the United States absorbing 34.1 per cent and Other Countries 6.8 per cent of this amount. If the United Kingdom, from 1868 to 1930 had been able to hold her proportion of Canada's import trade, imports from the United Kingdom in 1930 would have been valued at \$700,281,000, the United States at \$421,916,000, and Other Countries at \$126,076,000. As Canada developed industrially she had to go afield for certain raw materials such as cotton, rubber, fibres, etc., and semi-manufactured products, for her expanding manufacturing industries, which could not be obtained directly from the United Kingdom, and consequently, it was largely due to her industrial expansion that the proportion of Canada's imports from the United Kingdom fell off.

The proportion of imports from Other Countries in 1868 amounted to 10.1 per cent; in 1900 to 15.1 per cent, and in 1930 to 16.9 per cent. The imports into Canada from the United Kingdom, the United States and Other Countries with proportions received from each during the years 1868, 1900 and 1930, were:

Country	1868		1900		1930	
	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total
United Kingdom.....	37,617,000	56.1	44,280,000	25.7	189,180,000	15.2
United States.....	22,660,000	33.8	102,225,000	59.2	847,450,000	67.9
Other Countries.....	6,813,000	10.1	26,146,000	15.1	211,644,000	16.9

Of the total imports from Other Countries in 1930, amounting to \$211,600,000, the continent of Europe, except the United Kingdom, supplied \$95,600,000; North America, except the United States, \$24,000,000; South America \$31,900,000; Asia \$31,100,000; Oceania \$24,500,000; and Africa \$4,500,000.

CANADA'S IMPORTS FROM THIRTY-FIVE LEADING COUNTRIES, 1930

Exports to Principal Countries.—During the fiscal year 1930 Canada's domestic exports compared with similar exports in 1929 show a decrease of \$243,451,000. Decreases occurred in thirty of the forty principal countries, increases in only ten. The decreases in the exports to the thirty countries which show decreases exceeded the increases for the ten countries which show increases by \$238,065,000. Of the total decrease in the domestic exports from 1929 to 1930, the British Empire accounted for \$156,384,000, and foreign countries for \$87,067,000. The principal countries to show decreases were: United Kingdom \$147,892,000; the Netherlands \$28,422,000; Germany \$21,365,000; Italy \$11,638,000; Japan \$11,624,000; China \$7,715,000; Greece \$6,464,000; Belgium \$5,608,000; Portugal \$4,325,000; Norway \$3,761,000; Australia \$3,148,000; British India \$2,742,000; Denmark \$1,872,000; Brazil \$1,581,000; Irish Free State \$1,433,000; Dutch East Indies \$1,325,000; British South Africa \$1,314,000; and Spain \$1,201,000; while the following show increases: United States \$15,345,000; Argentina \$4,713,000; St. Pierre and Miquelon \$3,130,000; New Zealand \$1,808,000; Russia \$1,281,000; Newfoundland \$1,018,000; and Bermuda \$659,000.

An analysis of Canada's total domestic exports by countries, 1930, demonstrates that the decreases occurred chiefly in the exports to those countries that purchase large quantities of grains, principally wheat, from Canada. The statistics in the following table giving Canada's total exports to the leading wheat importing countries, 1929 and 1930, contrasted with exports, when the exports of grains are eliminated in each year, indicate that the exports of "Other Commodities" were well maintained.

It will be observed by reference to the statistics in the following table showing "Canada's Domestic Exports to Forty Leading Countries, 1930" that the United States and the United Kingdom took 71.1 per cent of the Dominion's exports, the percentage for each being: United States 45.9; United Kingdom 25.2. The United States occupied first place in Canadian export trade during the past four years, and the United Kingdom second place, though the United Kingdom was in first place in 1926. Of the other leading markets for Canadian products, Japan occupied third place, having moved up from fifth place, Germany was in fourth place, moving down from third place last year, while Belgium moved up from sixth place last year to fifth place this year. Last year Argentina was in twelfth place and New Zealand in tenth place, but this year Argentina has moved into sixth place and New Zealand into seventh place. China was in eighth place this year, France in ninth, Australia in tenth, and the Netherlands in eleventh place, China having moved down from eighth place, France up from eleventh, Australia down from ninth and the Netherlands having moved down from fourth place.

In the fiscal year 1868 the exports to the United Kingdom and the United States combined represented 89.2 per cent of the total domestic exports, the proportions being: United Kingdom 36.9 per cent; United States 52.3 per cent. In 1900 similar exports to the United Kingdom and the United States were 91.3 per cent of the total domestic exports, the proportions being: United Kingdom 57.1 per cent; United States 34.2 per cent: while for the year 1930 the domestic exports from Canada to the same two countries represented 71.1 per cent, the proportion for each being: United Kingdom 25.2 per cent and the United States 45.9 per cent. From 1868 to 1900 Canada's domestic exports to the United Kingdom increased from 36.9 to 57.1 per cent of the total exports, while those to the United States decreased from 52.3 to 34.2 per cent; whereas from 1900 to 1930 domestic exports to the United Kingdom decreased from 57.1 to 25.2 per cent of the total exports and those to the United States increased from 34.2 to 45.9 per

cent. The proportion of the exports to "Other Countries" was as follows: 1868, 10·8 per cent; 1900, 8·7 per cent and in 1930, 28·9 per cent. The domestic exports for the United Kingdom, the United States and Other Countries with proportions for each during the years 1868, 1900 and 1930 were:

Country	1868		1900		1930	
	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total
United Kingdom.....	17,906,000	36·9	96,563,000	57·1	281,838,000	25·2
United States.....	25,350,000	52·3	57,996,000	34·2	514,958,000	45·9
Other Countries.....	5,249,000	10·8	14,413,000	8·7	323,462,000	28·9

The increase in Canada's domestic exports to Other Countries from 1868 to 1900 was \$9,164,000 or 174 per cent, but from 1900 to 1930 it was \$309,049,000 or 2,137 per cent. During 1930 the Exports to Other Countries, amounting to \$323,500,000, were distributed by continents as follows: Europe, except United Kingdom, \$125,900,000; North America, except United States, \$46,200,000; South America \$34,700,000; Asia \$63,100,000; Oceania \$36,100,000; and Africa, \$17,500,000.

(a) Included with "United Kingdom".

Trade Balances.—Canada's imports for the fiscal year 1930 showed a decline of \$17,406,000 compared with the same period in 1929, and exports a decline of \$243,958,000. The "favourable" trade balance, which on March 31, 1926 amounted to \$401,371,000, and which had declined to a trifle less than one-fourth of that figure (\$123,094,000) in 1929, was an "unfavourable" balance of \$103,335,000 in 1930.

There have been marked changes in Canada's trade balances with the leading commercial countries of the world in recent years. In 1914 Canada had a "favourable" trade balance with Europe, Oceania and Africa, but an "unfavourable" balance with North and South America and with Asia, but in 1930 she had a "favourable" balance with every continent except the continent of North America. Canada had a "favourable" trade balance with Europe in 1914 of \$65,032,000, which had increased to \$426,719,000 in 1926, but which had declined to \$124,946,000 in 1930. This decline in Canada's "favourable" trade balance with Europe was largely brought about by falling off in her exports of grains, particularly wheat, to Europe, due mainly to lower yields and to restricted marketing policy. From 1914 to 1930 the number of countries in Europe with which Canada had a "favourable" trade balance had increased from seven to sixteen, the only European countries of importance in 1930 with which the trade balance was "unfavourable" were Czecho-Slovakia, France and Switzerland. From 1914 to 1930 the Dominion's annual credit balance, with the United Kingdom increased from \$90,252,000 to \$93,994,000; with Germany from a debit balance of \$10,152,000 to a credit balance of \$3,963,000; with Belgium from a credit balance of \$330,000 to \$8,785,000; with Italy from a debit balance of \$1,435,000 to a credit balance of \$6,427,000; Greece from a debit balance of \$433,000 to a credit balance of \$5,013,000; Netherlands from a credit balance of \$2,494,000 to \$6,584,000; Denmark from a credit balance of \$525,000 to \$3,930,000; and Sweden from a debit balance of \$426,000 to a credit balance of \$2,438,000. In 1914 Canada had a debit balance with France of \$10,466,000, which amounted to \$8,465,000 in 1930, while the debit balance with Switzerland increased during the same period from \$4,268,000 to \$6,089,000. These trade balances with European countries do not represent the true situation, as a very large quantity of the grain, especially wheat, shown in Canadian export statistics as for the United Kingdom is diverted from its original destination, the United Kingdom to other destinations. As a result of this diversion, the credit balance with the United Kingdom would be materially reduced and the balances with other European countries increased by a corresponding amount.

Canada's trade balance with continent of North America has been unfavourable since 1882, the debit balance with the United States being responsible for this situation. If the trade of the United States is eliminated from North America, the trade balance with "Other North America" increased from a debit balance of \$2,609,000 in 1914 to a credit balance of \$23,190,000 in 1930. In 1914 the debit balance with the continent of North America amounted to \$221,963,000 and in 1930 it had increased to \$287,642,000, while the number of countries in North America with which Canada had a debit balance was reduced from eight to four. The Dominion's debit trade balance with the United States from 1914 to 1930 increased from \$219,354,000 to \$310,832,000, being \$35,411,000 less than last year; with Newfoundland from a credit balance of \$2,900,000 to \$10,273,000; with St. Pierre and Miquelon from a credit balance of \$117,000 to \$5,986,000; Mexico from a debit balance of \$1,419,000 to a credit balance of \$1,838,000; with Cuba from a debit balance of \$2,124,000 to a credit balance of \$736,000; with Bermuda from a credit balance of \$397,000 to \$2,278,000; and with the British West Indies from a credit balance of \$143,000 to \$1,361,000.

With the continent of South America the debit balance of \$4,770,000 in 1914 was converted into a credit balance of \$2,778,000 in 1930. The debit balance of \$468,000 with Argentina in 1914 was changed to a credit balance of \$8,975,000 in 1930; while the debit balance with Colombia in 1914 of \$125,000 amounted to \$5,599,000 in 1930 and the debit balance with Peru during the same interval increased from \$737,000 to \$5,692,000.

The most notable change in the trade balance with any continent, from 1914 to 1930, occurred with the continent of Asia, a debit balance of \$8,118,000 being converted into a credit balance of \$31,988,000. The principal countries responsible for this change were Japan and China, the trade balance of the former increasing from a credit balance of \$1,015,000 to a credit balance of \$17,945,000; and of the latter from a debit balance of \$440,000 to a credit balance of

\$13,576,000. The credit balance with the continent of Asia, and particularly with China and Japan, is much less in 1930 than in 1929, due to falling off in the exports of wheat to the Orient in 1930.

The credit trade balance with Oceania from 1914 to 1930 increased from \$2,603,000 to \$11,613,000 and with Africa from \$3,459,000 to \$12,982,000. From 1914 to 1930 the credit balance with Australia increased from \$3,993,000 to \$12,124,000; with British South Africa from \$3,358,000 to \$10,095,000; and with New Zealand from a debit balance of \$1,256,000 to a credit balance of \$2,905,000. The large butter import from New Zealand, amounting to \$13,620,125 in 1930, was responsible for the decrease in the credit balance since 1926, the credit balance in that year amounting to \$13,855,000.

Principal Commodity Imports.—The statistics in the following table showing "One Hundred Leading Commodities Imported into Canada, 1930" indicate that the total declared value of these commodities amounted to \$1,007,153,000 or 80.7 per cent of the total imports into Canada. Of the one hundred commodities listed, fifty-one show increases in value and forty-nine decreases. Of the fifty-one commodities for which there were quantity statistics, three show increases in the quantity imported but decreases in the value; three show decreases in the quantity but increases in the value; while seventeen show increases in both quantity and value and twenty-eight decreases in both quantity and value. Of the forty-nine commodities for which there were no quantity statistics, being entered at value only, thirty-one show increases and eighteen show decreases. The commodities imported, which show (a) increases in quantity but decreases in value and (b) decreases in quantity but increases in value, 1930 compared with 1929, were:

(a) COMMODITIES TO SHOW INCREASES IN QUANTITY BUT DECREASES IN VALUE

Commodity	Imports, 1930		Increase of Quantity	Decrease of Value
	Quantity	Value		
		\$		\$
Sugar for refining.....Lb.	901,899,200	22,924,556	48,155,660	3,480,643
Nuts (except coconuts).....Lb.	39,217,888	4,743,787	1,446,565	66,798
Cocoa and chocolate.....Lb.	26,593,635	3,651,425	3,644,896	151,077

(b) COMMODITIES TO SHOW DECREASES IN QUANTITY BUT INCREASES IN VALUE

Commodity	Imports, 1930		Decrease in Quantity	Increase in Value
	Quantity	Value		
		\$		\$
Band and hoop iron.....Lb.	130,471,200	4,698,834	8,339,800	21,426
Rice.....Lb.	57,880,700	1,895,785	1,407,200	4,732
Rods of iron and steel.....Lb.	104,087,800	1,727,773	5,589,800	93,471

In the case of the fifty-one commodities for which there were quantity statistics, thirty of these were imported at a lower price per unit in 1930 than in 1929 and twenty-one at a higher price per unit. Those imported at a lower price per unit were valued at \$343,513,000, while those imported at a higher price per unit were valued at \$185,407,000. The thirty commodities entered at a lower average import price were: Artificial silk yarn, binder twine, coal, raw coffee, cocoa and chocolate, coke, corn, coloured cottons, raw cotton, dress goods (wool) to be dyed, fertilizers, gasoline, raw hides, jute cloth, molasses, nails, tops and waste wool, nuts (except cocoanuts), plates and sheets (iron), raw rubber, raw silk, spirits and wines, sugar for refining, refined sugar, tea, tin in ingots, tweeds, canned vegetables, vegetable oil, woollen yarn and worsteds and serges. The twenty-one commodities imported at a higher average import price were: Alumina and bauxite, automobiles, band and hoop iron, bars and rails (iron), grey cottons, cotton yarns, canned fruits, dried fruits, dyeing and tanning materials, iron ore, crude petroleum, pigs and ingots (iron), planks and boards, rice, rods of iron, sisal and manila grass, soda compounds, structural iron, sulphur, raw tobacco, and raw wool.

Imports for Canadian Industries:—An analysis of the statistics in the following table giving "Imports of Sixty-Two Leading Commodities for Canadian Industries, 1930" indicates that about one-third of the total imports into Canada are for use in the various industries of the Dominion. While there was a decrease of \$17,406,000 in Canada's imports in 1930 compared with 1929, the decrease in the imports of the sixty-two commodities for Canadian industries was \$40,885,000. The value of the imports of the raw, semi-manufactured and fully manufactured products listed as for Canadian industries in 1930 was \$351,016,000, the proportions of this amount classified according to degree of manufacture, 1930 compared with 1929, being:

Degree of Manufacture	Imports, 1930		Decrease, 1930 compared with 1929	
	Value	% of Total	Value	% of Total
	\$		\$	
Raw materials.....	178,195,000	50.8	6,905,000	16.9
Semi-manufactured.....	77,743,000	22.1	4,571,000	11.2
Fully manufactured.....	95,078,000	27.1	29,409,000	71.9
Total 62 Commodities.....	351,016,000	100.0	40,885,000	100.0

The decrease in the imports of products for use specially in Canadian industries, amounting to \$40,885,000, naturally reflects a corresponding slowing down of Canadian industrial activities. The redeeming feature of this decrease is that over 83 per cent of the decrease occurred in imports of semi-manufactured and fully manufactured products, the proportion for each being: semi-manufactured 11.2 per cent and fully manufactured 71.9 per cent. Of the total decrease in fully manufactured products of \$29,409,000, the decrease in automobile parts amounted to \$20,014,000; automobile engines to \$4,771,000; and articles of iron and steel for the manufacture of agricultural implements to \$2,188,000.

A further analysis will show that thirty-four of the sixty-two commodities listed as for use in Canadian industries show decreases and twenty-eight show increases; while twenty-four of the forty-eight commodities for which there are quantity statistics show decreases and twenty-four increases. Of the forty-eight commodities for which there are quantity statistics, two show increases in the quantity imported, but decreases in the value, viz.: Sugar for refining and hard and recovered rubber; one only shows a decrease in the quantity imported, but increase in the value, viz.: wire rods for making wire; twenty-three show decreases in both quantity and value; and twenty-two show increases in both quantity and value. Of the fourteen commodities entered at value only, nine show decreases and five increases.

In the case of the forty-eight commodities listed for which there are quantity statistics, it will be found on investigation that twenty-six of these, valued at \$141,932,000 were imported at a lower average import price in 1930 than in 1929, and twenty-two, valued at \$137,019,000, at a higher import price; while in the case of the fourteen commodities listed, which were entered at value only, nine, valued at \$62,952,000, show decreases in 1930 compared with 1929, and five, valued at \$9,113,000, show increases. The twenty-six commodities which entered Canada for Canadian industries at a lower average import price in 1930 than in 1929 were: Artificial silk yarn, bituminous coal, boiler plate, raw cocoa, raw coffee, raw cotton, cotton seed oil (crude), dress goods (wool) to be dyed, glycerine for explosives, grease for soap and leather, gums and resins, hemp, raw hides, logs (wood), peanut oil (crude), raw rubber, hard and recovered rubber, sand, silica, for industries, raw silk, sugar for refining, sulphate of alumina, tin in ingots, tires (locomotive and car wheel), wool tops, woollen yarn and zinc sheets and plates; while the twenty-two commodities which entered Canada at a higher average import price in 1930 than in 1929 were: Alumina, bauxite, and cryolite, automobile engines, bristles, copper bars and rods, cotton yarn, dyeing and tanning materials, lumber (rough sawn), manila and sisal grass, manganese oxide, iron ore, iron and steel for agricultural implements, oil for soap, ores of metal, n.o.p., crude petroleum, pigs, ingots and blooms (iron), skelp iron, crude sulphur, sulphate of soda, tinned plates, raw tobacco, wire rods for making wire and raw wool.

Principal Commodity Exports.—The following table giving "Seventy Leading Commodities Exported from Canada, 1930", shows that the total value of these commodities was \$1,041,402,000 or 92.9 per cent of the total domestic exports. Forty of the commodities listed show decreases in value and thirty increases. Four of the commodities for which there are quantity statistics show increases in quantity, but decreases in value, viz.: Raw hides, crude petroleum, raw tobacco and silver ore and bullion; one only shows decrease in quantity, but increase in value, viz.: Nickel; twenty-eight show decreases in both quantity and value; and twenty-one increases in both quantity and value. Eight of the commodities for which there were no quantity statistics show decreases and eight increases. An analysis also shows that of the fifty-four commodities for which there were quantity statistics, thirty-one were exported at a lower export price per unit in 1930 than in 1929 and twenty-three at a higher average export price. The total value, however, of the thirty-one commodities for which the average export price was lower in 1930 than in 1929 amounted to \$435,135,000, while the total value of the twenty-three commodities for which the average export price was higher amounted to \$478,605,000.

Compared with the year 1929, the fluctuation in the average export price per unit for 1930 shows no abnormal tendencies either up or down, except possibly in the case of cattle, cheese, copper, fish, hides, potatoes, raw tobacco, whiskey and raw wool. The most notable changes in the average export price occurred in the following commodities.

FLUCTUATION IN AVERAGE EXPORT PRICE, 1930 COMPARED WITH 1929

A preliminary survey of the statistics in the following table indicates that the decrease in Canada's domestic exports of \$243,451,000 in 1930 compared with 1929 was not due to lower export prices. During 1930 the declared value of the fifty-four commodities exported, for which there were quantity statistics, amounted to \$913,740,000 or 81.5 per cent of the total domestic exports, while the total value of the identical commodities at 1929 average export prices, totalled \$912,450,000, thus indicating that the decrease was not due to lower export price, but to a falling off in the physical volume of Canada's exports.

Trade via the United States.—Canada's imports from overseas countries via the United States have steadily declined in recent years, especially those from the British Empire. This decrease has resulted from: (1) general propaganda to utilize Canadian sea and river ports; (2) additional concessions to goods imported under the British Preferential tariff if imported direct; and (3) provision in trade treaties and agreements negotiated with foreign countries that goods must be imported direct in order to obtain the full benefits of special rates of duty.

There was a decrease in imports from overseas countries via the United States during the fiscal year 1930 compared with similar imports in 1926 of \$4,369,396; the decrease in the imports from the British Empire amounting to \$5,849,371, while the imports from foreign countries show an increase of \$1,479,975. The statistics in the following table provide an analysis of this feature of Canada's import trade for the last five fiscal years:—

IMPORTS INTO CANADA VIA THE UNITED STATES

Imports from—	Years ended March 31—				
	1926	1927	1928	1929	1930
United Kingdom via United States.....\$	1,853,066	728,001	773,694	987,752	1,042,164
Per cent of Total Imports from United Kingdom.....	1.1	0.4	0.4	0.5	0.5½
Other British Empire via United States.....\$	6,260,189	3,832,540	2,241,007	1,045,950	1,221,720
Per cent of Total Imports from Other British Empire.....	14.2	7.7	3.6	2.6	1.9
Foreign Countries via United States.....\$	6,106,030	8,200,679	9,102,893	8,408,832	7,586,005
Per cent of Total Imports from Foreign Countries.....	5.5	6.3	6.5	6.0	5.1
Total Imports via United States.....\$	14,219,285	12,761,220	12,117,594	11,042,534	9,849,889
Per cent of Total Imports from Overseas Countries.....	4.5	3.7	3.1	2.9	2.4½

The exports from Canada to overseas countries via the United States continue to remain about stationary, the proportions for the fiscal years 1926 to 1928 being about 39 per cent, 1929, 36.7 and for 1930, 33.8 per cent of the total exports to overseas countries. From 1926 to 1930 the proportion of the Dominion's exports to the United Kingdom via the United States decreased from 46.6 to 40.2 per cent; to Other British Empire from 24.3 to 23.2 per cent; while the proportion to Other Foreign Countries increased from 29.1 to 30.6 per cent. When adjustments are made for the re-routing of Canadian barley, oats, rye and wheat from United States lake ports, via the St. Lawrence route for ocean shipment at Montreal, it will be found that the proportions of Canada's exports to overseas countries via the United States will be considerably decreased and those via Canadian sea or river ports increased by a similar amount. The total value of commodities exported to overseas countries via the United States in 1930 was \$124,788,256 less than for the fiscal year 1926, wheat accounting for \$94,112,000 or 75 per cent of the decrease. Comparisons for the past five fiscal years were as follows:—

EXPORTS FROM CANADA VIA THE UNITED STATES

Exports to—	Years ended March 31—				
	1926	1927	1928	1929	1930
United Kingdom via United States.....\$	237,327,986	216,313,069	201,784,594	217,590,205	113,333,242
Per cent of Total Exports to United Kingdom.....	46.6	48.4	49.1	50.6	40.2
Other British Empire via United States.....\$	22,157,401	23,549,163	26,762,373	30,749,198	22,762,811
Per cent of Total Exports to Other British Empire.....	24.3	25.1	30.2	28.9	23.2½
Foreign Countries via United States.....\$	70,466,599	70,422,646	63,060,434	68,850,420	69,067,677
Per cent of Total Exports to Foreign Countries.....	29.1	28.7	25.1	21.0	30.6
Total Exports via United States.....\$	329,951,986	310,284,878	291,607,401	317,189,823	205,163,730
Per cent of Total Exports to Overseas Countries.....	39.2	39.5	38.9	36.7	33.8

The statistics in the following table giving "Principal Commodities exported from Canada to Overseas Countries via the United States and via Canadian Sea or River Ports, 1930" illustrate the details of this movement. The 37 commodities listed are representative of the Dominion's exports to overseas countries, as they comprise 83.1 per cent of the total exports to overseas countries; and they also represent 89.6 per cent of all goods shipped to overseas countries via

the United States, and 79.8 per cent of those going via Canadian sea or river ports. During the past five fiscal years a considerable amount of Canadian grain exported from Fort William and Port Arthur to overseas countries via the United States has been re-routed from United States lake ports for shipment at Montreal. The amount of Canadian grain re-routed for export at Montreal during the calendar years 1925 to 1929 was:—

Grains	1925	1926	1927	1928	1929
	Bushels	Bushels	Bushels	Bushels	Bushels
Barley.....	1,439,000	361,000	2,533,000	3,085,000	1,035,000
Oats.....	2,395,000	697,000	597,000	394,000	213,000
Rye.....	1,170,000	370,000	2,052,000	2,589,000	193,000
Wheat.....	17,779,000	15,794,000	34,025,000	51,172,000	15,186,000
Total.....	22,783,000	17,222,000	39,207,000	57,240,000	16,627,000

This re-routed Canadian grain was not recorded as an export at Montreal because it had already been recorded as an export at Fort William or Port Arthur. It was recorded, however, as "intransit" grain from the United States via the Port of Montreal. In order to obtain the actual amount of barley, oats, rye and wheat shipped via Canadian sea or river ports, this re-routed Canadian grain should be added to the quantity already thus recorded and deducted from the quantity shown as exported via United States channels. When adjustments are made the actual quantities of barley, oats, rye and wheat exported to overseas countries via the United States (indirect) and via Canadian sea or river ports (direct) during the fiscal years 1927 to 1930 were:—

Grains	Years ended March 31—				Percentage of Total			
	1927	1928	1929	1930	1927	1928	1929	1930

Canada's Position in International Trade:—Canada has maintained fifth position in imports, exports and total trade, among the leading commercial nations of the world during the calendar year 1929, even with a very large decline in her exports, amounting to \$167,000,000. The statistics in the following table giving "Comparison of the Trade of the Principal Countries of the World" indicate that in 1913 the Dominion occupied eighth place in imports among the leading trading countries, being exceeded in value of imports by the United Kingdom, Germany, the United States, France, the Netherlands, Belgium and Italy, but in 1929 she occupied fifth place, displacing the Netherlands, Belgium and Italy. In export trade, Canada in 1913 was in tenth position, being exceeded by the United Kingdom, the United States, Germany, France, the Netherlands, British India, Belgium, Italy and Argentina, but in 1929 she had moved up to fifth position, displacing the Netherlands, British India, Belgium, Italy and Argentina. In aggregate trade, Canada in 1913 was in ninth position, but in 1929, as in 1926 to 1928 she was in fifth position, being exceeded by the United States, the United Kingdom, Germany and France.

Canada has also made remarkable progress in proportionate increase in trade, both in amount and percentage, from 1913 to 1929. In the amount of increase in imports she occupied sixth position, being exceeded by the United States, the United Kingdom, France, Japan and Germany; in exports, fourth position, being exceeded by the United States, the United Kingdom and Germany; and in aggregate trade, fourth position, being exceeded by the United States, the United Kingdom and Germany. In percentage of increase in trade from 1913 to 1929, Canada occupied ninth place in imports, third place in exports, and sixth place in aggregate trade, being exceeded by Japan, British South Africa, New Zealand, Denmark and the United States.

In trade per capita, Canada has made a very creditable showing since 1913, though in 1929 compared with 1928 she moved from second position to third in exports and to fourth in aggregate trade per capita. In 1913 she occupied fifth place in imports per capita and in 1929 she also occupied fifth place, being exceeded by New Zealand, the Netherlands, Switzerland and Denmark. In exports per capita Canada in 1913 occupied seventh place, but in 1929 she had advanced to third place, being exceeded by New Zealand and Denmark. In aggregate trade per capita Canada was in sixth place among the leading commercial nations of the world, but in 1929 she had moved up to fourth place, New Zealand being in first place, Denmark in second place and the Netherlands in third place. In 1929 the aggregate trade of New Zealand per capita amounted to \$340.72, imports to \$159.00 and exports to \$181.72; Denmark \$254.12, imports \$130.34 and exports \$123.78; the Netherlands, \$248.21, imports \$144.07 and exports \$104.14; while that for Canada amounted to \$247.15, imports to \$128.14 and exports to \$119.01.

With reference to visible trade balance Canada in 1929 was not in as favourable a position as for the past eight years, the trade balance being "unfavourable" to the extent of \$90,600,000 or \$9.13 per capita. while in 1913 the "unfavourable" balance was \$222,900,000 or \$29.61 per capita. On the 31st of December, 1929, Canada stood in twelfth position among the leading commercial countries of the world with reference to the amount of her trade balance, but in fourteenth position as respect her trade balance per capita.

Canada's Share in World Trade.—Canada, since 1913, has made remarkable progress in the expansion of her trade in the world's principal markets, both in imports from and exports to. It will be noted from the statistics in the following tables Nos. 1 and 2, showing "Canada's Share in the Imports and Exports of Forty Countries," that in 1913 the total trade of these countries amounted to \$34,868,143,000, imports amounting to \$18,257,000,000 and exports to \$16,611,143,000; but in 1928 the total trade of the identical countries was \$54,890,219,000, imports totalling \$28,797,289,000 and exports \$26,092,930,000; the increase from 1913 to 1928 was: In total trade, \$20,022,076,000 or 57.4 per cent; in imports \$10,540,289,000 or 53.3 per cent; and in exports \$9,481,787,000 or 57.1 per cent. During the same years, viz.: 1913 and 1928, the trade of the forty countries with Canada was: 1913, total trade \$918,208,000; imports \$355,222,000; and exports \$562,986,000; 1928, total trade, \$2,389,668,000; imports \$1,193,639,000; exports \$1,196,029,000; increase in the trade with Canada, 1913 to 1928, being: In total trade \$1,471,460,000 or 160.4 per cent; in imports, \$838,417,000 or 236.0 per cent, and in exports \$633,043,000 or 112.7 per cent. From 1913 to 1928 the total trade of the forty leading countries increased 57.4 per cent, but with Canada the increase was 160.4 per cent; imports into the forty leading countries increased 53.3 per cent, but from Canada 236.0 per cent; while the exports from the same forty countries increased 57.1 per cent, but to Canada the increase was 112.7 per cent. Canada's share in the trade of these countries was:—Imports, 1913, 1.95 per cent; 1928, 4.15 per cent; exports, 1913, 3.39 per cent; 1928, 4.59 per cent.

In 1928 Canada's stated imports from the forty countries listed amounted to \$1,209,440,000, but the reported exports from these countries to Canada were valued at \$1,196,029,000, a discrepancy in favour of Canada of only \$13,411,000. The discrepancy between Canada's imports from the world and the world's exports to Canada is insignificant, due to the fact that the amount of goods received from overseas countries via the United States in proportion to the total imports is relatively small, being only about \$10,000,000. The discrepancy for the continent of Europe, amounting to about \$33,000,000, is largely due to the fact that goods transhipped in bond from the United Kingdom to Canada are credited as an import from the United Kingdom in Canadian trade statistics, but in the case of the United Kingdom, are treated as intransit, not being included in the exports to Canada; while the discrepancy for the continent of North America, amounting to about \$33,000,000, occurred largely in the movement of products, chiefly grains, from the United States to Canada for shipment to overseas countries via Canada. Such movements are credited in United States trade statistics as an export to Canada, as the exporter at the time of shipment does not know the final destination, but they do not appear, either in the import or export trade of Canada, being considered as intransit trade. The discrepancy for the continent of South America, amounting to about \$11,000,000 is largely due to the fact that South American countries credit goods destined for Canada, but shipped to Canada via the United States, as exported to the United States and not to Canada.

With reference to the movement of goods from Canada to the various markets of the world, the declared exports to the forty leading countries amounted to \$1,335,892,000, while the recorded imports into the forty countries from Canada totalled \$1,193,639,000, a discrepancy of over \$142,000,000. This discrepancy is large and is due to the fact that a very large proportion of Canada's exports to overseas countries, chiefly grains, so far as Europe is concerned, is shipped via the United States, which on arrival at their final destination are credited to the United States and not to Canada. The value of goods shipped to overseas countries via the United States in 1928 amounted to over \$300,000,000. The discrepancy for the continent of Europe, amounting to \$93,000,000, occurred mainly in the grain trade, shipments of Canadian grain via the United States being credited to the United States in European trade statistics rather than to Canada; while the discrepancy for the continents of South America and Asia is chiefly accounted for from the fact that a large quantity of products shipped to these continents via the United States, on arrival there, are credited to the United States and not to Canada. Other factors, such as the movement of United States products to overseas countries via Canada, tend to vitiate not only Canada's declared exports but also the imports into overseas countries from Canada. The particulars are set out in the following table:

Principal Countries of	Canada's Imports from	Recorded Exports to Canada	Canada's Exports to	Recorded Imports from Canada
	\$	\$	\$	\$
Europe.....	277,395,000	244,492,000	640,168,000	546,957,000

CANADA'S EXPORTS COMPARED WITH EXPORTS OF OTHER COUNTRIES

Canada today in the production of many staple products ranks high among the leading nations of the world. In production of printing paper, nickel, asbestos and cobalt she leads the world, occupies second place in the production of automobiles; in output of lead and gold she occupies third place and fifth position in production of wheat, with 299,539,000 bushels in 1929, being exceeded by the United States (806,508,000 bushels), Russia (738,904,000 bushels), France (319,861,000 bushels), and British India (317,595,000 bushels); while in export trade she leads the world in exports of printing paper, nickel and asbestos, occupies second place in exports of automobiles, wheat and wheat flour, (the United States being in first place in exports of automobiles and wheat flour and Argentina first place in exports of wheat), and fourth place in exports of wood pulp, being exceeded by Sweden, Norway and Finland. The exports of these staple products from Canada make up about fifty per cent of the Dominion's total domestic exports.

Wheat exports.—The rapid increase in the production of wheat in the Prairie Provinces during the past decade and a half or so, and the practical elimination of Russia, Roumania, and other wheat producing countries of Europe as leading factors in the grain trade up to two years ago, have had the effect of establishing Canada, up to that time, in second place as a wheat producing country, the first place being held by the United States. During the past two years, however, Russia has enormously increased her production of wheat, so that in 1928 and 1929 (according to latest information) she occupied second position in wheat production, while Canada during 1929, with the falling off in her wheat yield, moved down to fifth position in the world's wheat production.

With reference to exports of wheat for the calendar year 1929, Canada occupied second place, with an export of 210,946,000 bushels, Argentina being in first position with an export of 245,775,000 bushels. Canada's exports of wheat for the past eight years, as also for the year 1913, have exceeded those of the United States. The Dominion's exports of wheat for the fiscal year 1900 amounted to only 16,845,000 bushels; in 1910 they totalled 49,741,000 bushels, in 1920, 77,978,000 bushels; while for the fiscal year 1930 they amounted to 177,006,000 bushels. It will be noted by reference to the statistics in the following table showing "Exports of Wheat from Principal Wheat Producing Countries of the World", that in 1913 Canada occupied first place as a wheat-exporting country, with an export of 129,950,000 bushels, Russia being in second place with an export of 121,953,000 bushels, Argentina in third place with 103,300,000 bushels, and the United States in fourth place with 99,509,000 bushels. In 1929 the order had been changed considerably, Argentina being in first, Canada in second place, and the United States in third place. Canada having occupied first place in wheat exports for some years yielded first place to Argentina in 1929. This situation, with respect to Canada's position in the wheat trade in 1929, was the result of (1) lower yields and (2) restricted marketing policy. Wheat occupies first place among Canada's exports.

(a) Statistics for 1912, no statistics available for 1913.

Wheat Flour Exports.—Canada, since the opening of the twentieth century, has made remarkable progress in the flour-milling industry. This expansion in her flour production is reflected in the increase in the Dominion's flour exports. Today Canada ranks second among the countries of the world as a wheat flour exporting country, the first place being occupied by the United States. Canada's exports of wheat flour for the fiscal year 1900 amounted to 768,000 barrels; ten years later they totalled 3,064,000 barrels; in 1920 they amounted to 8,863,000 barrels; and in 1930 to 7,894,000 barrels; compared with 11,267,000 barrels in 1929.

It will be noted from the statistics in the following table showing "Exports of Wheat Flour from Principal Flour-Producing Countries of the World" that in 1929 Canada was in second place with an export of 9,574,000 barrels; the United States being in first place with an export of 13,663,000 barrels; Australia in third place with 5,557,000 barrels; Hungary in fourth place with 2,952,000 barrels; and the United Kingdom in fifth place with 2,472,000 barrels. The exports of wheat-flour from the United States in 1929 were 1,376,000 barrels greater than in 1913; from Canada 4,680,000 barrels greater and from Australia 3,295,000 barrels. From 1928 to 1929 the wheat-flour exports of the United States increased from 11,848,000 to 13,663,000 barrels; from Australia from 4,879,000 to 5,557,000 barrels; while the wheat-flour exports from Canada during the same period decreased from 10,737,000 to 9,574,000 barrels.

Newsprint Paper.—*Production.*—Canada, according to statistics issued by the Canadian Pulp and Paper Association and from other sources, led the world as a producer of newsprint paper during the Calendar Year 1929, as also for the years 1926 to 1928. The statistics in the following table showing "Production of Newsprint Paper for Principal Paper-Producing Countries of the World" indicate that for 1929 Canada's Production of newsprint paper amounted to 5,457,654,000 pounds; the United States being second with 2,784,552,000 pounds; the United Kingdom third with 1,480,000,000 pounds; and Germany fourth with 1,246,000,000 pounds. The total production of newsprint paper for the world in 1929 was estimated at about 14,600,000 pounds, of which Canada, Newfoundland and the United States supplied 60 per cent, and Canada alone about 37 per cent. The estimated production of newsprint paper for seventeen of the leading paper-producing countries of the world was: 1926, 12,092,000,000 pounds; 1927, 12,706,000,000 pounds; 1928, 13,221,000,000 pounds; and in 1929 14,581,000,000 pounds.

Newsprint Paper.—*Exports.*—Canada, during the calendar year 1929, occupied first place by a very wide margin among the world's chief exporters of newsprint paper, her exports being over ten times as great as those for Germany, her next competitor. From the statistics in the following table giving "Exports of Newsprint Paper from Principal Paper-Producing Countries of the World" it will be observed, that even in 1913 Canada led the world as an exporter of newsprint paper, Norway being in second place, the United Kingdom in third and Finland in fourth place. In 1929 the total quantity of newsprint paper exported by the thirteen leading paper-exporting countries was 7,801,849,000 pounds, compared with 6,220,947,000 pounds in 1927, and 6,896,475,000 pounds in 1928, of which amount Canada in 1927 contributed 3,763,731,000 pounds or 60.5 per cent; in 1928, 4,413,175,000 pounds or 63.9 per cent, and in 1929, 5,021,266,000 pounds or 64.3 per cent. Canada's exports of newsprint paper, therefore, exceeded the exports of the other twelve leading countries combined by 1,306,515,000 pounds in 1927; 1,929,875,000 pounds in 1928 and 2,240,683,000 pounds in 1929. Canada's exports of newsprint paper are greater than those of the rest of the world combined.

Wood Pulp Exports.—Canada's great advance as a newsprint paper producer and exporter since the opening of the present century, has been based on the great expansion of her wood pulp industry. Canada's exports of wood pulp during the fiscal year 1890 were valued at only \$168,000 and in 1900 at \$1,816,000. In the year 1910 the Dominion's exports of wood pulp amounted to 590,346,000 pounds, value \$5,205,000; in 1920, or ten years later, they amounted to 1,538,958,000 pounds, value \$41,383,000; and in 1930 to 1,735,919,000 pounds, value \$44,914,000. The very small increase in the exports of wood pulp from Canada, from 1920 to 1930, is due to the fact that year by year larger quantities of wood pulp are used in the Canadian paper industry in the manufacture of newsprint and other forms of paper, and consequently the product is being exported in a manufactured form (paper) rather than in a semi-manufactured form (wood pulp). According to statistics in the following table giving "Exports of Wood Pulp from Principal Countries of the World," Canada, during the calendar year 1929 occupied fourth position among the world's exporters of wood pulp, with an export of 1,671,420,000 pounds; the first place being held by Sweden, with an export of 4,609,158,000 pounds; Norway was in second place with an export of 1,940,331,000 pounds; while Finland was in third place with an export of 1,717,397,000 pounds. In exports of chemical pulp in 1929 Canada occupied second position, with an export of 1,228,135,000 pounds, the first place being held by Sweden, by a wide margin, with an export of 3,265,924,000 pounds; and third place by Norway with an export of 617,728,000 pounds. With regard to exports of mechanical pulp, Canada occupied fourth place in 1929 with an export of 442,937,000 pounds; the first, second and third places being held by Sweden with 1,343,234,000 pounds; Norway 1,322,603,000 pounds; and Finland 1,139,262,000 pounds. In 1913 Sweden occupied first place as an exporter of wood pulp, Norway second place, and Canada third.

HISTORICAL SUMMARY OF CANADA'S TRADE, BY DECADES, 1890 TO 1930

Canada's import and export trade has changed very materially since 1890, both as to its origin and destination as well as in its character. The statistics in the following tables Nos. 1 and 2, relative to Canada's imports and exports, by countries, indicate that the Dominion's trade, both import and export, and especially export, with "Other Countries", i.e. countries except the United Kingdom and the United States, made very little progress from 1890 to 1900 or even 1910, but that from 1910 on there was a marked improvement in this trade. This betterment in Canada's trade with "Other Countries" was no doubt due to the provision in the Customs Tariff Act, 1907, for the extension of benefits of the British Preferential Tariff in whole or in part to any British Country and the benefits of the Intermediate Tariff in whole or in part to any British or foreign country that grants trade benefits to Canada satisfactory to the Governor in Council. Prior to 1907 Canada had no bargaining machinery of this kind. In 1890 Canada's imports from "Other Countries" amounted to \$17,040,000; in 1900 they totalled \$26,147,000; in 1910 they had increased to \$56,977,000, but in 1930 they were \$211,646,000; in 1890 Canada's exports to "Other Countries" were valued at \$7,546,000; in 1900 at \$14,413,000; in 1910 they were valued at only \$35,566,000; but in 1930 they had increased to \$323,462,000.

Further, from these tables Nos. 1 and 2, it will be observed that the imports from the United States from 1890 to 1930 increased from \$51,366,000 to \$847,450,000; the United Kingdom from \$43,299,000 to \$189,178,000; France from \$2,616,000 to \$25,158,000; Germany from \$3,779,000 to \$21,505,000; New Zealand from \$12 to \$16,282,000; the British West Indies (including Bermuda) from \$1,182,000 to \$13,755,000; British East Indies from \$183,000 to \$13,170,000; Belgium from \$721,000 to \$13,019,000; Japan from \$1,258,000 to \$12,537,000; Argentina from \$25 to \$10,232,000; the Netherlands from \$422,000 to \$9,431,000; Peru from nil to \$7,492,000; Switzerland from \$317,000 to \$7,315,000 and Colombia from \$1,600 to \$7,253,000; while Canada's domestic exports from 1890 to 1930 to the United States increased from \$36,213,000 to \$514,958,000; the United Kingdom from \$41,499,000 to \$281,838,000; Japan from \$27,000 to \$30,476,000; Germany from \$461,000 to \$25,344,000; Belgium from \$41,000 to \$21,693,000; Argentina from \$763,000 to \$19,207,000; New Zealand from \$20,000 to \$19,166,000; British West Indies (including Bermuda) from \$1,461,000 to \$17,316,000; China from \$32,000 to \$16,528,000; France from \$278,000 to \$16,507,000; Australia from \$471,000 to \$16,323,000; the Netherlands from \$1,000 to \$15,944,000; British Africa from \$23,000 to \$13,803,000; Newfoundland from \$982,000 to \$12,178,000; Italy from \$81,000 to \$11,387,000 and British East Indies from \$9,000 to \$10,717,000.

Tables Nos. 3 and 4, indicate the trend of the trade in Canada's imports and exports in leading commodities for the fiscal years 1890, 1900, 1910, 1920 and 1930.

TABLE No. 4—CANADA'S LEADING DOMESTIC EXPORTS

(Fiscal Years, 1890, 1900, 1910, 1920 and 1930)

NOTE:—Commodities arranged in order of importance, 1930.

Commodities	Fiscal Year, 1890	Fiscal Year, 1900	Fiscal Year, 1910	Fiscal Year, 1920	Fiscal Year, 1930
	\$	\$	\$	\$	\$
Wheat.....	388,861	11,995,488	52,609,351	185,044,806	215,753,475
Printing paper.....			2,612,243	53,640,122	145,401,482
Planks and boards.....	17,637,308	22,015,990	33,100,387	75,216,193	49,446,887
Wheat flour.....	321,383	2,791,885	14,859,854	94,262,928	45,457,195
Wood pulp.....	168,180	1,816,016	5,204,597	41,383,482	44,913,995
Copper ore and blister.....	133,251	1,387,388	6,023,925	11,871,039	37,735,413
Automobiles.....			405,011	14,883,607	35,307,645
Fish.....	8,099,674	10,564,688	15,179,015	40,687,172	34,767,739
Gold, raw.....	657,022	14,148,543	6,016,126	5,974,334	34,375,003
Whiskey.....	25,383	396,671	1,010,657	1,504,132	25,856,136
Nickel.....		1,040,498	3,320,054	9,039,221	25,034,975
Furs, raw.....	1,874,327	2,264,580	3,749,005	20,628,109	18,706,311
Farm implements.....	367,198	1,692,155	4,319,385	11,614,400	18,396,688
Cheese.....	9,372,212	19,856,324	21,607,692	36,336,863	18,278,004
Rubber tires.....				7,395,172	18,039,924
Meats.....	895,757	13,615,621	8,013,680	96,161,234	15,030,671
Pulpwood.....	80,005	902,772	6,076,628	8,454,803	13,860,209
Aluminum in bars, etc.....			1,202,723	5,680,871	13,828,010
Cattle.....	6,949,417	8,704,523	10,792,156	46,064,631	13,119,462
Asbestos, raw.....	444,159	490,909	1,886,613	8,767,856	12,074,065
Silver.....	201,615	1,354,053	15,009,937	14,255,091	11,569,855
Vegetables.....	597,074	503,993	1,534,228	11,656,483	11,240,747
Lead.....	2,000	688,691	529,422	1,193,144	10,637,887
Barley.....	4,600,409	1,010,425	1,107,732	20,206,972	10,388,735
Rubber footwear.....			129,618	1,750,967	9,986,392
Fruits (chiefly apples).....	1,073,890	3,305,662	5,492,197	8,347,549	9,593,484
Zinc.....				950,082	8,366,712
Fertilizers.....	4,291	51,410	371,315	6,694,037	7,990,313
Hides and skins, raw.....	506,402	1,396,907	5,508,185	19,762,646	7,730,914
Machinery.....	143,815	446,391	924,510	6,416,591	7,154,706
Stone and products.....	949,158	575,749	955,636	3,531,916	6,904,442
Shingles (wood).....	340,872	1,131,506	2,331,443	10,848,602	6,704,494
Leather, unmanufactured.....	727,087	1,535,440	1,296,480	11,742,268	6,496,951
Settlers' effects.....	818,001	1,095,536	2,274,005	7,631,498	6,304,199
Milk and cream, fresh.....				1,699,090	5,379,174
Acids.....	5,545	67		901,397	5,096,529
Sugar and products.....	18,101	100,108	153,357	30,695,005	4,798,712
Pigs, ingots, etc. (iron).....		137,651	228,183	6,595,688	4,727,137
Timber, square.....	4,353,870	2,013,746	934,723	2,148,162	4,235,309
Oats.....	256,156	2,143,179	1,566,612	9,349,455	4,055,855
Coal.....	2,447,936	4,599,602	5,013,221	13,183,666	3,998,692
Logs (wood).....	682,572	760,416	999,681	1,819,083	3,677,917
Milk, condensed.....			541,372	8,517,771	3,262,101
Seeds.....	182,200	322,652	4,602,797	9,915,391	3,237,744
Laths (wood).....	392,500	749,301	1,882,950	3,668,511	3,095,417
Bran, shorts and middlings.....	86,225	145,206	1,842,620	2,983,843	2,582,484

PREFACE

All features of previous issues of the Condensed Preliminary Trade Report are continued in the present number. It consists, as before, of two main sections—A Review of Canada's Foreign Trade during the fiscal year just closed (1930-31), and a series of statistical tables ("Condensed Statistical Record of Canadian Trade"), partly summary and historical, but mainly a presentation of the main items of the trade of Canada with the more important countries of the world.

In the first section, the external trade of Canada is examined from several angles and the outstanding features of the year explained in both text and tabular form. This section also contains historical summary of Canada's import and export trade by decades from 1890 to 1930 and the year 1931, distinguishing imports and exports for principal countries and commodities.

All the tables have been revised and expanded to meet altered conditions of trade. Commercial exchange with eighty-three different countries is dealt with in detail.

Throughout the report, figures for the fiscal year ended March 31, 1931, are unrevised; those for earlier years are final.

The "Review of Canada's Foreign Trade for 1930-31," was written by Mr. W. A. Warne, B.A., chief of the External Trade Branch of the Dominion Bureau of Statistics, while the "Condensed Statistical Record" was compiled by Mr. A. L. Neal, B.A., B.Sc. (econ.), Statistician of the Branch.

R. H. COATS,
Dominion Statistician

DOMINION BUREAU OF STATISTICS,
OTTAWA, June 16, 1931.

REVIEW OF CANADA'S FOREIGN TRADE, 1930-31

Canada's trade, both import and export, in common with that of the principal trading countries of the world during the fiscal year 1931, showed a marked decline compared with 1930, reflecting the general economic world depression in trade and industry. The severe decline in commodity prices, which characterized all world markets during the past year, was largely responsible for this trade decrease, not only in foreign markets but in domestic as well. Canada, however, during the calendar year 1930, even with a material decrease in her import and export trade, has maintained her relatively high place among the leading trading countries of the world. In 1930, as in 1928 and 1929, the Dominion stood in fifth position in total trade and total imports, but in total exports dropped from fifth to sixth position, British India moving up to fifth from sixth place.

Canada's total imports of merchandise in 1931, amounting to \$906,612,681, show a decrease of 27.4 per cent compared with 1930, and exports of domestic merchandise, amounting to \$799,652,667, a decrease of 28.6 per cent. The average level of prices changed only moderately for the five or six years prior to 1930, but during the past year the drastic decline in commodity prices has materially affected the comparability of trade statistics. In analyzing the trend of general trade, it is essential to remember that values do not reveal the true increase or decrease of the trade of a country. It frequently happens, as was the case in 1931, that quantity statistics tell a different story. When the fluctuations in import and export prices have been eliminated from Canadian trade, i.e., when the quantities imported and exported in 1931 are re-valued at 1930 average import and export prices, the imports of the Dominion on a quantity basis, according to a preliminary survey, amounted to \$1,045,451,000, and domestic exports to \$971,522,000, representing a decrease in imports of only 16.3 per cent and in exports of only 13.3 per cent, compared with a decrease based on declared values of 27.4 per cent for imports, and 28.6 per cent, for exports.

The decrease in Canada's import and export trade, which was largely a price decline, occurred mainly in foodstuffs, raw materials and semi-manufactured products, the decrease in manufactured products being less pronounced. The statistics in the following table showing the percentage of increase or decrease in the quantity and value of Canada's imports and exports of outstanding commodities, representative of each main group, 1931 compared with 1930, substantiate this:—

PERCENTAGE OF INCREASE OR DECREASE IN CANADA'S IMPORTS AND EXPORTS

IMPORTS			EXPORTS		
Commodity	Percentage of Increase (+) or Decrease (—) in:—		Commodity	Percentage of Increase (+) or Decrease (—) in:—

Worsted and serges.....	(—) 22.1	(—) 27.4	Zinc.....	(+) 27.6	(—) 28.4

The decline in Canada's trade was not so marked as that of the United States and some of the other competitive British and foreign countries. The imports of Canada for the calendar year 1930 compared with 1929, declined 22.4 per cent, as against 27.7 per cent for the United States, while her domestic exports declined 25.1 per cent, compared with a decline in United States exports of 26.7 per cent. The trade of both Canada and the United States suffered more from the general trade depression of the world than the chief commercial countries of Europe. The percentage of increase or decrease in the imports and exports of the leading countries of the world for the calendar year 1930 compared with 1929, was as under:—

PERCENTAGE OF INCREASE OR DECREASE IN IMPORTS AND EXPORTS OF LEADING COUNTRIES OF THE WORLD

Commodity	Percentage of Increase (+) or Decrease (—) in:—		Commodity	Percentage of Increase (+) or Decrease (—) in:—	
	Imports	Exports		Imports	Exports

TRADE WITH THE WORLD

(a) **Analysis of Total Trade.**—Canada's total foreign trade during the year ended March 31, 1931, amounted to \$1,723,550,729, compared with a similar trade in 1930 valued at \$2,393,211,652, and in 1929 at \$2,654,575,166; showing a decrease compared with the year 1930 of \$669,660,923 or 28.0 per cent, and in 1929 of \$931,024,437 or 35.1 per cent. Imports as well as exports show a decrease compared with the year 1930, the decrease in imports amounting to \$341,660,901 or 27.4 per cent, and in exports to \$328,000,022 or 28.7 per cent. During 1931 imports amounted to \$906,612,681 compared with an import trade in 1930 valued at \$1,248,273,582, and in 1929 at \$1,265,679,091; the decrease in imports in 1931 compared with 1930 amounting to \$341,660,901 or 27.4 per cent, and 1929 to \$359,066,410 or 28.4 per cent; while the exports (domestic and foreign combined) during the year 1931 were valued at \$816,938,048 compared with a similar trade in 1930 valued at \$1,144,938,070 and in 1929 at \$1,388,896,075; the decrease in 1931 compared with 1930 amounting to \$328,000,022 or 28.7 per cent, and 1929 to \$571,958,027 or 41.2 per cent. During 1931 Canada's domestic exports amounted to \$799,652,667, in 1930 to \$1,120,258,302 and in 1929 to \$1,363,709,672; the decrease in 1931 compared with 1930 amounting to \$320,605,635 or 28.6 per cent, and compared with 1929 to \$564,057,005 or 41.4 per cent.

SUMMARY OF CANADA'S TRADE WITH THE WORLD

(b) **Analysis by Groups.**—The decrease in the imports, 1931, compared with 1930, amounting to \$341,660,901, occurred in each of the nine main groups; while the decrease in the domestic exports, amounting to \$320,605,635, also occurred in each of the nine main groups. The values of each of the nine main groups of imports, arranged in order of importance, with decrease 1931 compared with 1930, were: (1) Iron and Its Products, \$194,888,443, decrease \$121,990,184 or 38.5 per cent; (2) Agricultural and Vegetable Products, \$177,628,778, decrease \$49,420,039 or 21.7 per cent; (3) Non-Metallic Minerals and Their Products, \$153,578,658, decrease \$32,917,730 or 17.6 per cent; (4) Fibres, Textiles and Textile Products, \$130,717,022, decrease \$54,524,230 or 29.4 per cent; (5) Miscellaneous Commodities, \$62,488,011, decrease \$11,457,822 or 15.5 per cent; (6) Non-Ferrous Metals and Animal Products, \$59,623,263, decrease \$28,326,989 or 32.2 per cent; (7) Wood, Wood Products and Paper, \$46,042,029, decrease \$14,909,048 or 24.4 per cent; (8) Animals and Animal Products, \$45,995,705, decrease \$23,858,128 or 34.4 per cent; and (9) Chemicals and Allied Products, \$35,650,772, decrease \$4,256,731 or 10.7 per cent. The values of each of the nine main groups of domestic exports, arranged in order of importance, with decrease 1931 compared with 1930, were: (1) Agricultural and Vegetable Produce, \$292,280,037, decrease \$92,355,714 or 24.0 per cent; (2) Wood, Wood Products and Paper, \$230,514,474, decrease \$59,052,201 or 20.4 per cent; (3) Non-Ferrous Metals and Their Products, \$95,652,063, decrease \$58,667,366 or 38.0 per cent; (4) Animals and Animal Products, \$83,714,772, decrease \$49,294,373 or 37.0 per cent; (5) Iron and Its Products, \$38,937,661, decrease \$39,651,919 or 50.4 per cent; (6) Non-Metallic Minerals and Their Products, \$21,107,780, decrease \$7,437,316 or 26.1 per cent; (7) Miscellaneous Commodities, \$18,115,846, decrease \$1,947,092 or 9.7 per cent; (8) Chemicals and Allied Products, \$12,825,852, decrease \$9,642,610 or 42.9 per cent; and (9) Fibres, Textiles and Textile Products \$6,504,182, decrease \$2,562,044 or 28.2 per cent. For further details of Canada's commodity imports and exports, with increases or decreases, 1931 compared with 1930, see statistics in the following table:—

CANADA'S PRINCIPAL IMPORTS FROM AND EXPORTS TO THE WORLD

(Year ended March 31, 1931, with Increase or Decrease, compared with 1930)

GROUP 1—AGRICULTURAL AND VEGETABLE PRODUCTS

For further information respecting Canada's trade in principal commodities with all countries, fiscal years 1929, 1930 and 1931, for imports see Table No. 8, pages 86 to 105 and for exports see Table No. 9, pages 106 to 117.

TRADE WITH THE UNITED KINGDOM

(a) **Analysis of Total Trade.**—The total trade of Canada with the United Kingdom during the year ended March 31, 1931, amounted to \$370,175,761, compared with a similar trade in 1930 of \$472,278,062, and in 1929 of \$625,702,322; the decrease in 1931 compared with the year 1930 amounting to \$102,102,301 or 21·6 per cent, and compared with 1929 to \$255,526,561 or 40·8 per cent. Imports, as also exports in 1931 show a decrease compared with 1930, the decrease in imports amounting to \$39,691,230 or 21·0 per cent, and in exports to \$62,411,020 or 22·0 per cent. Imports from the United Kingdom in 1931 were valued at \$149,488,457, in 1930 at \$189,179,738, and in 1929 at \$194,041,381; the decrease in 1931 compared with 1930 amounting to \$39,691,281 or 21·0 per cent; and with 1929 to \$44,552,924 or 22·4 per cent; while total exports from Canada to the United Kingdom in 1931 were valued at \$220,687,304; in 1930 at \$283,098,324, and in 1929 at \$431,660,941; the decrease in 1931 compared with 1930 amounting to \$62,411,020 or 22·0 per cent; and with 1929 to \$210,973,637 or 48·8 per cent. The domestic exports from Canada to the United Kingdom in 1931 were valued at \$219,246,499; in 1930 at \$281,745,965, and in 1929 at \$429,730,485; the decrease in 1931 compared with 1930 amounting to \$62,499,466 or 22·1 per cent, and with 1929 to \$210,483,986 or 49·0 per cent.

(b) **Discrepancy in Trade Figures.**—There is practically no discrepancy between Canadian imports from the United Kingdom and United Kingdom exports to Canada when adjustments are made for the large amount of products of British and foreign origin transhipped in bond from the United Kingdom to Canada. This trade is not included in the general exports of the United Kingdom, though it is included in Canadian import trade, and as the origin is practically unknown, it is credited to the United Kingdom. The following statistics from Canadian and United Kingdom sources substantiate this:—

IMPORTS INTO CANADA FROM UNITED KINGDOM CONTRASTED WITH IMPORTS INTO UNITED KINGDOM FROM CANADA

	Calendar Years—		
	1928	1929	1930
	\$	\$	\$
Imports into Canada from United Kingdom.....	182,080,454	194,777,650	162,631,314
Exports from United Kingdom to Canada.....	152,621,201	182,551,455	150,932,006
Transshipment under Bond from United Kingdom to Canada.....	30,903,834	25,149,964	Not available
Total.....	183,525,035	207,701,419

There is a very marked discrepancy, however, between Canada's exports to the United Kingdom and the imports into the United Kingdom from Canada, as the statistics in the following table show:—

EXPORTS FROM CANADA TO THE UNITED KINGDOM, CONTRASTED WITH IMPORTS INTO THE UNITED KINGDOM FROM CANADA

	Calendar Years—		
	1928	1929	1930
	\$	\$	\$
Exports from Canada to United Kingdom.....	447,888,035	291,831,471	236,527,017
Imports into United Kingdom from Canada.....	278,095,252	224,353,697	185,710,481

Canada's declared exports to the United Kingdom do not represent the actual amount of Canadian products received by the United Kingdom from Canada, the British imports being much less than the Canadian exports. The discrepancy is due in large measure to diversion of Canadian grain, especially wheat, from its original destination, the United Kingdom, to other destinations, chiefly continental Europe. This diversion takes place, principally in the movement of Canadian products to the United Kingdom via the United States. If an adjustment is made for this diversion, the revised exports to the United Kingdom would be less and those to continental Europe greater than the declared exports.

In the following Tables Nos. I and II the more important statistics bearing on the problem of the proposed British wheat quota and the amount of imports of wheat into the United Kingdom are assembled:—

Table I.—In the first section of this table are shown total imports of wheat into the United Kingdom for the calendar years 1925 to 1930, with imports from the British Empire and foreign countries respectively, based on the United Kingdom trade returns. The imports from Canada are also shown for the reason that their accuracy has been questioned owing to the possibility of confusion between Canadian and United States wheat in the recording of imports into United Kingdom from North America.

In remaining sections of the table certain figures bearing on the problems just mentioned are quoted. First, imports of wheat into the United Kingdom from the United States (taken from British trade returns) are shown in juxtaposition to the exports of wheat from the United States to the United Kingdom (taken from the trade returns of the United States). The excess of the former of these figures over the latter represents a possible error in the United Kingdom import figures, crediting the United States with certain wheat of Canadian origin which goes out via United States.

In the third section of the table, the exports of United States wheat via Canada are shown as indicating the extent of a possible over-statement in the United Kingdom returns of imports from Canada. Inasmuch, however, as we know that on an average only 15 per cent of this United States wheat is destined to the United Kingdom, figures for the latter are inserted, those for 1929 and 1930 being of actual record, whilst the four earlier years are estimates on the same basis.

In the final section of the table a recalculated or adjusted figure of imports of wheat into the United Kingdom, segregated on the above basis, is shown, indicating the amount received from the British Empire, foreign countries and Canada, and the percentage which these consist of total imports of wheat.

Table II.—The non-correspondence between Canadian figures of exports of wheat and the United Kingdom figures of imports are examined in this table. Canadian exports to the United Kingdom are shown, for the calendar years 1926 to 1930, these being divided into (a) exports via Canadian ports, and (b) exports via the United States. The latter figures are then divided on the basis of intransit figures taken from Canadian and United States Government records

showing (a) exports to the United Kingdom of re-routed Canadian wheat from United States lake ports via Montreal, and (b) exports of Canadian wheat to United Kingdom via United States Atlantic Sea Ports. In a final figure exports of the Canadian wheat via Canadian ports and via United States ports, the latter corrected by the Canadian and United States intransit figures, are shown in total, together with the percentage of which imports into United Kingdom from the British Empire would be of total United Kingdom imports if the figures just segregated were substituted for the United Kingdom figures of imports from Canada in Table I.

On the basis of adjusted imports of wheat into the United Kingdom, based on United Kingdom records (see Table I) the average percentage of wheat imported into the United Kingdom from the British Empire of the total imports, for the six years, 1925 to 1930, was 56·76, compared with 46·53 for British imports. Inasmuch as for the year 1929 and part of 1930 the Canadian exports of wheat, due to restricted marketing policy, were somewhat curtailed in these years, the average percentage from the British Empire for the four years, 1925 to 1928, would probably be a fairer indication of the amount of wheat imported into the United Kingdom from the British Empire, the average percentage for these years being 62·23, compared with 50·67 for British imports.

On the basis, however, of adjusted exports of wheat from Canada to the United Kingdom (see Table II) the average percentage of total imports of wheat into the United Kingdom from the British Empire of the total imports, for the years 1926 to 1930 was 66·9 compared with 44·8 for British imports.

NOTE.—According to United States transit figures about 50 per cent of the Canadian wheat shown in Canadian trade statistics as exported to the United Kingdom via United States border ports is diverted while in transit via the United States to other destinations, chiefly the continent of Europe; while a considerable amount of this Canadian wheat is also re-routed chiefly via Montreal, and in the re-routing process about 63 per cent of this wheat is diverted from United Kingdom to other destinations, chiefly the continent of Europe. When adjustments are made for these diversions the amount of Canadian wheat exported to the United Kingdom would be as under:—

	1926	1927	1928	1929	1930
	Bushels	Bushels	Bushels	Bushels	Bushels
<i>Adjusted Figures</i>					
(a) Re-routed Canadian wheat from United States Lake Ports via Montreal (d).....	5,843,780	12,589,250	18,933,640	5,677,451	3,846,991

(d) The figures of re-routed Canadian wheat from United States lake ports via Montreal to the United Kingdom are the actual records, while those for the three earlier years are estimates based on the average (37 per cent) for the years 1929 and 1930.

(c) **Analysis by Groups.**—The decrease in the imports from the United Kingdom, 1931 compared with 1930, amounting to \$39,691,281, occurred in every one of the nine main groups; while the decrease in domestic exports, amounting to \$62,499,466, occurred in six of the nine main groups. The main groups in the exports to show decreases were: Agricultural and Vegetable Products; Animals and Animal Products; Wood, Wood Products and Paper; Iron and Its Products; Non-Metallic Minerals and Their Products; and Chemicals and Allied Products, the total decreases for these groups amounting to \$64,367,920; while those to show increases were: Fibres, Textiles and Textile Products; Non-Ferrous Metals and Their Products; and Miscellaneous Commodities, the total increases for these groups amounting to \$1,868,454. The values of each of the nine main groups, arranged in order of importance, with decreases, 1931 compared with 1930, were: (1) Fibres, Textiles and Textile Products, \$49,199,666, decrease \$19,044,155 or 27.9 per cent; (2) Agricultural and Vegetable Products, \$41,762,635, decrease \$9,516,647 or 18.5 per cent; (3) Iron and Its Products, \$18,217,736, decrease \$3,422,209 or 15.8 per cent; (4) Non-Metallic Minerals and Their Products, \$12,902,472, decrease \$699,281 or 5.1 per cent; (5) Miscellaneous Commodities, \$8,316,299, decrease \$2,626,228 or 24.0 per cent; (6) Non-Ferrous Metals and Their Products, \$6,165,272, decrease \$1,339,143 or 17.8 per cent; (7) Chemicals and Allied Products, \$4,600,351, decrease \$828,414 or 15.2 per cent; (8) Wood, Wood Products and Paper, \$4,540,804, decrease \$709,898 or 13.5 per cent; and (9) Animals and Animal Products, \$3,783,222, decrease \$1,505,306, or 28.4 per cent. The values of each of the nine main groups of domestic exports, arranged in order of importance, with increase or decrease, 1931 compared with 1930, were: (1) Agricultural and Vegetable Products, \$141,108,053, decrease \$45,413,538 or 24.3 per cent; (2) Animals and Animal Products, \$31,173,615, decrease \$9,500,165 or 23.3 per cent; (3) Wood, Wood Products and Paper, \$17,350,424, decrease \$4,099,759, or 19.1 per cent; (4) Non-Ferrous Metals and Their Products, \$17,153,570, increase \$1,749,207, or 11.3 per cent; (5) Iron and Its Products, \$4,073,233, decrease \$2,774,767 or 40.5 per cent; (6) Miscellaneous Commodities, \$3,077,474, increase \$46,890 or 1.5 per cent; (7) Chemicals and Allied Products, \$2,714,386, decrease \$2,174,354 or 44.5 per cent; (8) Non-Metallic Minerals

and Their Products, \$1,546,819, decrease \$405,337 or 20·7 per cent; and (9) Fibres, Textiles and Textile Products, \$1,048,925, increase \$72,357 or 7·3 per cent. For further details respecting Canada's commodity imports from and exports to the United Kingdom, with increase or decrease, 1931 compared with 1930, see statistics in the following table:—

For further information respecting Canada's trade in principal commodities with United Kingdom, fiscal years 1930 and 1931, for imports see table No. 8, pages 86 to 105 and for exports see Table No. 9, pages 105 to 117.

TRADE WITH THE UNITED STATES

(a) **Analysis of Total Trade.**—The total trade of Canada with the United States for the year ended March 31, 1931, amounted to \$948,258,605, compared with a similar trade in 1930, valued at \$1,384,130,218, and in 1929 at \$1,389,279,316; the decrease in 1931 compared with 1930 amounting to \$435,871,613 or 31.4 per cent, and with 1929 to \$441,020,711 or 31.7 per cent. Compared with 1930 the imports in 1931 show a decrease of \$263,016,456 or 31.0 per cent, and

exports a decrease of \$172,855,157 or 32.2 per cent. Imports from the United States in 1931 were valued at \$584,425,581 in 1930 at \$847,442,037, and in 1929 at \$868,012,229; the decrease in 1931 compared with 1930 amounting to \$263,016,456 or 31.0 per cent, and with 1929 to \$283,586,648 or 32.6 per cent; while the total exports to the United States in 1931 amounted to \$363,833,024, in 1930 to \$536,688,181, and in 1929 to \$521,267,087; the decrease in 1931 compared with 1930 amounting to \$172,855,157 or 32.2 per cent, and compared with 1929 to \$157,434,063 or 30.2 per cent. The domestic exports to the United States in 1931 were valued at \$349,570,563, in 1930 at \$515,049,763, and in 1929 at \$499,612,145; the decrease compared with 1930 amounting to \$165,479,200 or 32.1 per cent, and with 1929 to \$150,041,582 or 30.0 per cent.

(b) **Discrepancy in Trade Figures.**—In considering the discrepancy between Canada's trade with the United States and the United States trade with Canada, many factors must be noted in arriving at a satisfactory explanation. In the United States, Alaska, Hawaii and Porto Rico are considered as United States territory for trade and other purposes, while in Canada they are considered as separate entities, and consequently adjustments must be made in the trade statistics of the two countries to bring them to a common basis. In the United States, also, raw gold and silver ore, and bullion are not included in the general trade figures, whereas in Canada these non-ferrous metals are included, consequently an adjustment must be made in respect to these metals. When these adjustments are made in the exports from Canada to the United States it will be found that the discrepancy in the movement of products from Canada to the United States, as recorded in trade of the two countries, is very small indeed, amounting to less than 2 per cent of the total in 1928 and 1929, and about 3.7 per cent in 1930, as indicated in the following table:—

MOVEMENT OF GOODS FROM CANADA TO THE UNITED STATES

(Calendar Years, 1928 to 1930)

Calendar Years	Imports into United States from Canada	Exports from Canada to United States (c)	Discrepancy: In favour of Canada (a) In favour of United States (b)
	\$	\$	\$
1928.....	489,300,000	497,200,000	(a) 7,900,000
1929.....	504,300,000	512,100,000	(a) 7,800,000
1930.....	402,300,000	386,500,000	(b) 15,800,000

(c) Canadian figures adjusted by adding to exports to United States exports to Alaska, Hawaii and Porto Rico, and deducting exports of raw gold, and silver ore and bullion.

There is, however, a considerable discrepancy between the Canadian imports from the United States and United States exports to Canada, even when adjustments are made in Canada's imports. This is largely due to United States recording in their exports to Canada, grains, mainly wheat, which are only intransit via Canada to overseas countries. The United States Department of Commerce is aware that a large percentage of the exports shown as shipped to Canada are really only intransit to overseas countries via Canada. On pages 31 and 32 of Trade Information Bulletin No. 602 re "Foreign Trade of the United States, 1928," the Bulletin states that "The figures of trade by continents as originally published are somewhat misleading in the case of exports to North America and to Europe. This is due to the fact that especially during recent years, large quantities of grain have been shipped through Canada to foreign countries, almost exclusively to Europe, which, because the exporter at the time of shipment does not know the final destination, are credited to Canada." Such shipments do not appear in the import or export trade of Canada, being considered as intransit trade. The amount of these grain shipments to Canada has varied in recent years, in 1927 amounting to \$113,990,000 and in 1930 to \$15,100,000. It will appear from the statistics in the following table that when these grain shipments are eliminated from the United States exports to Canada, the revised United States exports to Canada and Canada's adjusted imports from the United States agree fairly well. In fact, the discrepancy between the two sets of figures is less than 2 per cent in 1928 and 1929 of the total, and about 3 per cent in 1930.

MOVEMENT OF GOODS FROM THE UNITED STATES TO CANADA

(Calendar Years, 1928 to 1930)

1929.....	948,500,000	49,400,000	899,100,000	893,200,000	(b) 5,900,000
1930.....	659,300,000	15,100,000	644,200,000	653,500,000	(a) 9,300,000

(c) Canadian figures adjusted by adding to imports from United States, imports from Alaska, Hawaii and Porto Rico and deducting imports of silver bullion.

(c) **Analysis by Groups.**—The decrease in the imports from the United States, amounting to \$263,016,456, occurred in each of the nine main groups, while the decrease in the exports of domestic merchandise, amounting to \$172,855,157, also occurred in each of the nine main groups. The values of each of the nine main groups of imports arranged in order of importance, with decrease, 1931 compared with 1930, were: (1) Iron and Its Products, \$168,362,980, decrease \$115,801,458 or 40.7 per cent; (2) Non-Metallic Minerals and Their Products, \$118,991,460, decrease \$30,302,525 or 20.3 per cent; (3) Agricultural and Vegetable Products, \$67,586,853, decrease \$31,165,280 or 31.5 per cent; (4) Non-Ferrous Metals and Their Products, \$48,452,677, decrease \$25,286,054 or 34.3 per cent; (5) Fibres, Textiles and Textile Products, \$48,251,873, decrease \$23,745,724 or 32.9 per cent; (6) Miscellaneous Commodities, \$45,288,688, decrease \$8,099,636 or 15.1 per cent; (7) Wood, Wood Products and Paper, \$38,138,028, decrease \$13,598,215 or 26.2 per cent; (8) Animals and Animal Products, \$26,153,435, decrease \$11,234,691 or 30.0 per cent; and (9) Chemicals and Allied Products, \$23,203,307, decrease \$3,779,153 or 14.0 per cent. The values of each of the nine main groups of domestic exports, arranged in order of importance, with decrease, 1931 compared with 1930, were: (1) Wood, Wood Products and Paper, \$188,859,408, decrease \$48,710,005 or 20.5 per cent; (2) Non-Ferrous Metals and Their Products, \$58,835,683, decrease \$42,893,293 or 42.1 per cent; (3) Animals and Animal Products, \$34,068,408, decrease \$32,825,757 or 49.1 per cent; (4) Agricultural and Vegetable Products, \$27,644,374, decrease \$20,982,134 or 43.1 per cent; (5) Non-Metallic Minerals and Their Products, \$13,255,258, decrease \$5,406,998 or 29.0 per cent; (6) Miscellaneous Commodities, \$12,359,090, decrease \$977,224 or 7.3 per cent; (7) Chemicals and Allied Products, \$6,361,691, decrease \$6,173,819 or 49.2 per cent; (8) Iron and Its Products, \$6,118,120, decrease \$5,517,371 or 47.4 per cent; and (9) Fibres, Textiles and Textile Products, \$2,068,531, decrease \$1,892,599 or 42.7 per cent. For further details respecting Canada's commodity imports from and exports to the United States, with increases or decreases, 1931 compared with 1930, see statistics in the following table:—

CANADA'S PRINCIPAL IMPORTS FROM AND EXPORTS TO UNITED STATES

(Year ended March 31, 1931, with Increase or Decrease compared with 1930)

For further information respecting Canada's trade in principal commodities with United States, fiscal years 1930 and 1931, for imports see Table No. 8, pages 86 to 105, and for exports see Table No. 9, pages 106 to 117.

Trade With Other Countries.—The British Preferential Tariff enacted in 1897, which granted a trade preference to the products and manufactures of the United Kingdom and reciprocating Dominions and Possessions of 12½ per cent from April 23, 1897, which was increased to 25 per cent from June 30, 1898, and to 33½ per cent from June 30, 1900, and the New Customs

Tariff Act, 1907, which continued the preferential policy; as well as trade treaties and agreements, negotiated with British and Foreign Countries, have had the effect of stimulating Canada's external trade. When the British preference became effective in 1897 Canada's total imports from the United Kingdom in that year only amounted to \$29,401,000, compared with an import in 1887 valued at \$44,741,000, and in 1873 at \$67,997,000, the decrease in 1897 compared with 1887, amounting to \$15,340,000 and with 1873 to \$38,596,000. From 1873 to 1897 imports from the United Kingdom decreased \$38,596,000 or 56.7 per cent, while from 1897 to 1931 they increased \$120,087,000 or 408.5 per cent. The British Preferential Tariff was no doubt largely responsible for the increase in imports from the United Kingdom as well as from other parts of the Empire. By reference to the statistics in the following table giving "Trade of Canada with the British Empire and Foreign Countries" it will be noted that in the fiscal year 1896, imports from "Other British Empire," i.e., British Empire, except the United Kingdom, amounted to \$2,389,000, in 1906 to \$14,606,000, in 1916 to \$27,826,000, in 1926 to \$45,089,000, and in 1931 to \$55,447,000; while domestic exports to the "Other British Empire" in 1896 were valued at \$4,048,000, in 1906 at \$10,965,000, in 1916 at \$30,677,000, in 1926 at \$90,330,000, and in 1931 at \$73,638,000. During the same years the imports from "Other Foreign Countries," i.e., Foreign Countries, except the United States, were: in 1896, \$16,619,000, in 1906, \$30,694,000, in 1916, \$32,091,000, in 1926, \$109,890,000, and in 1931, \$117,252,000; while domestic exports to "Other Foreign Countries" were: in 1896, \$5,152,000, in 1906, \$13,516,000, in 1916, \$57,974,000, in 1926 \$241,800,000, and in 1931, \$157,198,000. From 1911 to 1931 imports from "Other British Empire" increased \$35,914,000 or 183.8 per cent, and from "Other Foreign Countries," \$69,819,000 or 147.2 per cent, while the domestic exports to "Other British Empire," from 1911 to 1931, increased \$58,827,000 or 338.0 per cent and to "Other Foreign Countries" \$135,965,000 or 640.3 per cent. The decrease in the value of imports and exports in 1931 compared with the past four or five years was practically due to the serious decline in commodity prices in 1930-31, which was world-wide. On a quantity basis, the decrease was not so marked, indicating that it was largely a price and not a quantity decline.

With further reference to the trade of Canada with countries other than the United Kingdom and the United States, attention is directed to Tables Nos. 10-36, pages 118 to 151, giving the trade of Canada in leading commodities with 81 British and Foreign Countries for the fiscal years 1930 and 1931.

Relation Between Trade in Raw and Manufactured Products.—Canada was not engaged to any great extent in manufacturing processes for some years after Confederation, and consequently her imports consisted very largely of manufactured goods and her exports of raw and semi-manufactured products. Since the opening of the twentieth century, a conspicuous change in the character of Canada's imports and exports has developed, a large percentage of the imports consisting of raw and semi-manufactured products for use in Canadian manufacturing industries, and the exports consisting to a considerable degree of products which have undergone some process of manufacture. Canada, during this period, has passed through much the same stages of development in her economic life as did the United States from 1870 to 1900. From 1870 to 1900 the imports of raw materials into the United States increased from 25.2 to 44.0 per cent of the total imports; and fully manufactured products decreased from 62.1 to 40.2 per cent; while exports of raw materials from the United States during the same interval decreased from 67.7 to 40.2 per cent of the total exports, and fully manufactured products increased from 28.6 to 48.6 per cent. Statistics for 1930 show a further improvement, though the percentage of imports of raw materials is less and of manufactured products more than for any year since 1924. Compared with 1900 the 1930 statistics show that imports of raw materials into the United States increased from 44.0 per cent to 46.5 per cent of the total imports, and exports decreased from 40.2 to 27.0 per cent of the total exports; whereas imports of fully manufactured products decreased from 40.2 to 33.1 per cent and exports increased from 48.6 to 59.2 per cent.

Canada, however, has not made as great progress as the United States in increasing imports of raw materials and exports of manufactured products and curtailing exports of raw materials and imports of manufactured products, yet she has made some progress in this respect. From 1914 to 1930 the value of Canada's imports of raw materials increased from \$135,200,000 to \$288,300,000 or 113.2 per cent, while the domestic exports increased from \$272,600,000 to \$429,400,000 or 57.5 per cent. During this period the percentage of imports of raw materials of the total imports increased from 21.8 to 23.1 per cent, while the exports of raw materials of the total domestic exports decreased from 63.2 to 38.3 per cent. In 1930 the percentage of imports of raw materials of the total imports was less than for any year for the past ten years, except for the year 1929, while the percentage of exports of raw materials of the total domestic exports was also less than for any of the past ten years. Canada's imports of fully manufactured products, from 1914 to 1930 increased from \$426,300,000 to \$864,000,000 or 102.6 per cent, while the domestic exports of fully manufactured products during the same period increased from \$115,300,000 to \$477,600,000 or 314.2 per cent. The percentage of the imports of fully manufactured products, from 1914 to 1930 increased from 68.9 per cent to 69.2 per cent, while the percentage of exports of fully manufactured goods increased from 26.7 to 42.6 per cent. In 1930 the percentage of imports of fully manufactured products of the total imports was greater than for any of the past twelve years, while the exports of the total domestic exports was also more than for any year for the past ten years. The decrease in the percentage of exports of raw materials and the increase in the percentage of fully manufactured goods was attributable to the drastic decline in commodity prices, the prices for raw materials falling much more rapidly than those for manufactured goods

STATEMENT SHOWING VALUE AND PROPORTION OF RAW MATERIALS AND PARTLY AND FULLY MANUFACTURED GOODS IMPORTED INTO AND EXPORTED FROM CANADA AND THE UNITED STATES, 1900 TO 1930

(Values in Millions of Dollars)

In Canada, grains (chiefly wheat) and in the United States, raw cotton, grains (principally wheat) and raw tobacco are the leading commodities which comprise the bulk of the exports of raw materials. It is of interest to note the results in Canada and the United States when certain staple raw materials, of farm origin, which are reproducible annually, are eliminated; such as grains, fresh fruits and vegetables, seeds and raw tobacco, for both countries, as also raw cotton for the United States. The results, for the years 1900 to 1930, are set forth in the following table:—

RAW MATERIALS EXPORTED FROM CANADA AND THE UNITED STATES, 1900 TO 1930

(Values in Millions of Dollars)

Fiscal Years	Canada's Exports of Raw Materials				United States Exports of Raw Materials					
	Grains, fresh fruits and vegetables, seeds and raw tobacco		Other raw materials		Grains, fresh fruits and vegetables, seeds and raw tobacco		Raw cotton		Other raw materials

According to the statistics in the above table Canadian and the United States exports of "Other raw materials," from 1900 to 1930 (i.e., total exports of raw materials less certain raw materials which are reproducible annually), increased as follows: Canada from \$48,500,000 to \$173,500,000, or 257.7 per cent, and the United States from \$82,700,000 to \$127,100,000, or 53.7 per cent. In the case of Canada the percentage of the exports of "Other raw materials" of the total domestic exports, from 1900 to 1930, decreased from 28.8 to 15.5 per cent and in the case of the United States from 6.0 to 2.7 per cent.

It will be observed from the statistics in the following table, showing "Canada's Imports and Exports by Leading Countries, according to Degree of Manufacture," fiscal year 1930, that Canada's imports from those countries with highly developed manufacturing industries consist of manufactured products, and her exports to those countries are made up largely of raw and semi-manufactured products; while on the other hand Canada's trade with countries whose industries are not so highly developed consist chiefly, in the case of imports, of raw and semi-manufactured products and in the case of exports, of manufactured products.

CONDENSED PRELIMINARY TRADE REPORT

29

CANADA'S IMPORTS AND EXPORTS BY LEADING COUNTRIES, ACCORDING TO DEGREE OF MANUFACTURE

(Year ended March 31, 1930)

A further analysis of the statistics in the foregoing table, relative to Canada's imports and exports according to degree of manufacture, indicates: (1) that 89.3 per cent of Canada's imports from Europe in 1930 consisted of fully manufactured goods, 6.2 per cent of raw materials and 4.5 per cent of semi-manufactured products; while 60.3 per cent of her exports to Europe was made up of raw materials, 29.8 per cent of fully manufactured goods and 9.9 per cent of semi-manufactured products; the proportion of the trade with the United Kingdom being, imports: fully manufactured goods 89.5 per cent, semi-manufactured products 6.2 per cent, and raw materials 4.6 per cent; and exports: raw materials 62.4 per cent, fully manufactured goods 29.7 per cent and semi-manufactured products 7.9 per cent; (2) that 65.4 per cent of the imports from North America consisted of fully manufactured goods, 26.8 per cent of raw materials

and 7.8 per cent of semi-manufactured products; while 44.4 per cent of the exports to North America comprised fully manufactured goods, 29.7 per cent raw materials, and 25.9 per cent semi-manufactured products; the proportion of the trade with the United States being: fully manufactured goods 66.7 per cent, raw materials 26.6 per cent and semi-manufactured products 6.7 per cent; and exports: fully manufactured goods 40.9 per cent, raw materials 31.1 per cent and semi-manufactured products 28.0 per cent; (3) that 79.4 per cent of the imports from South America was made up of raw materials, 17.6 per cent of semi-manufactured products and 3.0 per cent of fully manufactured goods, while 94.5 per cent of the exports to that continent consisted of fully manufactured goods, 3.1 per cent of raw materials and 2.4 per cent of semi-manufactured products; (4) that 73.1 per cent of the imports from Asia were fully manufactured goods, 23.0 per cent raw materials and 3.9 per cent semi-manufactured products; while 41.7 per cent of the exports to Asia consisted of fully manufactured goods, 37.6 per cent of semi-manufactured products, and 20.7 per cent of raw materials; (5) that the proportion of the trade with Oceania was: imports: fully manufactured goods 65.1 per cent, semi-manufactured products 23.9 per cent, and raw materials 11.0 per cent; and exports: fully manufactured goods 90.4 per cent, semi-manufactured products 6.7 per cent, and raw materials 2.9 per cent; and (6) that the proportion of the imports from Africa was: raw materials 40.0 per cent, semi-manufactured products 56.2 per cent and fully manufactured goods 3.8 per cent; while the proportion of the exports to Africa was: fully manufactured goods 90.4 per cent, raw materials 6.3 per cent, and semi-manufactured products 3.3 per cent.

The following table shows how Canada's imports and exports, analysed into the three categories of raw materials, partly manufactured goods, and fully or chiefly manufactured goods, are distributed among the United Kingdom, other British Empire countries, the United States and other foreign countries:—

CANADA'S IMPORTS AND EXPORTS, ACCORDING TO DEGREE OF MANUFACTURE, 1928, 1929 AND 1930, DISTINGUISHING IMPORTS FROM AND EXPORTS TO THE BRITISH EMPIRE AND FOREIGN COUNTRIES

Seasonal Fluctuations.—The seasonal movement of Canada's external trade during the fiscal year 1931 presents no abnormal tendencies except a general decrease in each month compared with 1928-29, and 1929-30, reflecting the general decline in world commodity prices. The table of "Canada's Monthly Imports and Exports" indicates that the imports for the summer and early fall months are usually greater than for the other months of the year, except the month of March. In 1930-31 the imports showed the usual seasonal trend, reaching the highest peak during the late spring and summer months, declining slightly in August, with an upward trend in September and October, followed by the usual slump during the winter months. Exports, however, as a result of the influence of agricultural products, especially wheat, reach a low point during the summer months, rise to a peak during the autumn, gradually decline during the winter months, and with the opening of navigation on the St. Lawrence in the spring, show an upward tendency. During 1930-31 the seasonal trend for exports was not so marked as in other years, due to falling off in the exports of grains, especially wheat. The decrease, however, was largely a price decrease, for in the case of wheat the quantity exported increased 22.7 per cent, but the value decreased 17.7 per cent. The monthly variations, however, are not so marked as the lack of direct shipping facilities via the St. Lawrence in winter would indicate. The very large increase in recent years of the exports of pulp and paper and other manufactured products, the export of which is not seasonal but almost constant, has had the effect of reducing the proportionate seasonal fluctuations of Canada's total exports. The trade figures for March in each year are usually greater for imports than for any other month, while in the case of exports they are not, as a rule, as large as those for the spring and fall months, when large quantities of grains, especially wheat, are being shipped. The totals for March are always greater than those for April. March figures must include all entries at all ports to the close of the fiscal year (March 31). In all other months the records are closed at Ottawa on the last day of the month. Late import and export entries (which in the case of the great, but distant, port of Vancouver, may cover four or five days' business at the end of each month) are regularly included in totals for the succeeding month. April totals include nothing for March, while they are short some amounts carried forward into May.

Trade by Continents.—During the fiscal year 1931 Canada sold more goods to North America than to any other continent, her sales amounting to \$395,400,000, compared with \$309,200,000 to the continent of Europe, while her purchases from North America amounted to \$607,800,000, contrasted with purchases from Europe valued at \$224,200,000. During 1931 the continents of North America and Europe took 88.1 per cent of the Dominion's total exports as compared with 86.5 per cent in 1930 and 88.6 per cent in 1927. The proportion of products shipped to North America in 1931 was 49.4 per cent, compared with 50.1 per cent in 1930 and 40.4 per cent in 1927; while the proportion sent to Europe in 1931 was 38.7 per cent, compared with 36.4 per cent in 1930 and 48.2 per cent in 1927. From 1927 to 1931 the proportion of Canada's exports to the United States increased from 37.2 to 43.7 per cent, while the proportion to other North America increased from 3.2 to 5.7 per cent; while the proportion exported to the

United Kingdom decreased from 35.7 to 27.4 per cent, and to other Europe from 12.5 to 11.3 per cent. The continents of North America and Europe in 1931 furnished Canada with 91.8 per cent of her total imports, compared with 92.6 per cent in 1930 and 93.6 per cent in 1927. The proportion of goods received from North America in 1931 was 67.1 per cent compared with 69.8 per cent in 1930 and 70.1 per cent in 1927, while the proportion received from Europe was 24.7 per cent in 1931; 22.8 per cent in 1930, and 23.5 per cent in 1927. From 1927 to 1931 the proportion of Canada's imports furnished by the United States decreased from 66.7 to 64.5 per cent and from other North America from 3.4 to 2.6 per cent; while the proportion furnished by the United Kingdom increased from 15.9 to 16.5 per cent, and from other Europe from 7.6 to 8.2 per cent. Canada's sales in 1931 to every continent except Africa were less than for any year from 1927 to 1930, the sales to the African continent being greater than in 1927 and 1928 but less than in 1929 and 1930. The decline in the exports of wheat and flour to Europe and the Orient, due to lower export prices, was chiefly responsible for the decrease in Canada's exports to the continents of Europe and Asia. Canada's purchases from the continents of Europe, North America, and Asia were less in 1931 than for any year from 1927 to 1930, while those from South America and Oceania were greater in 1931 than for 1927 but less than for the years 1928 to 1930, and those from Africa were greater than for any year from 1927 to 1930. From 1927 to 1931 imports from South America increased from \$20,000,000 to \$25,600,000; from Oceania from \$12,500,000 to \$14,400,000; and from Africa from \$2,700,000 to \$6,900,000, while imports from Asia decreased from \$32,000,000 to \$27,400,000; whereas exports to South America decreased from \$32,900,000 to \$20,600,000; to Asia from \$63,500,000 to \$39,400,000, and to Oceania from \$33,200,000 to \$20,000,000, while exports to Africa increased from \$13,500,000 to \$15,000,000. For further details respecting Canada's trade, by continents, from 1927 to 1931 see statistics in the following table:—

TRADE OF CANADA BY CONTINENTS, 1927 TO 1931

Imports by Principal Countries.—Imports into Canada in 1931 compared with 1930 show decreases in twenty-three of the thirty-five leading countries, the decreases for the twenty-three countries exceeded the increases for the twelve countries by \$326,570,053. Of the total decrease in imports in 1931, amounting to \$341,660,901 or 27.4 per cent, the British Empire accounted for only \$47,768,536 or 14.0 per cent of the total, and foreign countries for \$293,892,365

or 86.0 per cent. The principal countries to show decreases were: United States \$263,016,456; United Kingdom \$39,691,281; New Zealand \$9,611,467; France 6,152,989; Germany \$5,313,514; Belgium \$4,598,987; Argentina \$3,492,630; Japan \$3,195,135; Peru \$2,956,604; Colombia \$2,215,793; Netherlands \$2,145,476; Switzerland \$1,830,377; and Cuba \$1,101,580; while the following countries show increases: British South Africa \$2,505,503; Venezuela \$2,495,622; China, \$1,833,792; Dutch West Indies \$1,397,813; other British West Indies, \$1,370,280; and Russia \$1,008,127. The statistics in the following table showing "Canada's Imports from Thirty-Five Leading Countries, 1931," indicate that the United States and the United Kingdom supplied Canada with 81.0 per cent of her total imports. The United States since 1882 has supplied Canada continuously, year by year, with the largest proportion of her imports, amounting to 64.5 per cent in 1931. The United Kingdom comes next in order of importance by a very wide margin, supplying Canada with 16.5 per cent of her total imports. With regard to supplies from other countries, France has occupied third place for the past four years, as well as in the year 1922, while Germany has occupied fourth place in the Dominion's imports for the past four years, though in the year 1922 she was in nineteenth place; while Japan has moved from seventh into fifth place, British India from tenth into sixth place, Belgium has dropped from sixth into seventh place, the Netherlands has moved up from ninth to eighth place and the Argentine has dropped from eighth to ninth place. New Zealand in 1930 was in fifth place, having moved from twenty-second place in 1922 to sixth in 1929, but in 1931 she dropped into tenth place. In 1922 imports from New Zealand amounted to \$1,784,000; by 1929 they had increased to \$12,771,000 and last year to \$16,283,000, but this year they have declined to \$6,671,000, due wholly to decrease in the imports of butter, which declined in value from \$13,620,000 to \$3,950,000.

In 1868, 89.9 per cent of Canada's imports was obtained from the United Kingdom and the United States, proportions being: United Kingdom 56.1 per cent; United States 33.8 per cent. In 1900, 84.9 per cent of the Dominion's imports was furnished by the same two countries, the proportions being: United Kingdom, 25.7 per cent; United States 59.2 per cent; whereas in 1931, 81.0 per cent of Canada's total imports came from the United Kingdom and the United States, the proportion for each being: United Kingdom 16.5 per cent, United States 64.5 per cent. From 1868 to 1931 the proportion of the imports into Canada from the United Kingdom fell from 56.1 to 16.5 per cent of the total, while the proportion from the United States rose from 33.8 to 64.5 per cent. The proportionate loss in imports from the United Kingdom, 1868 to 1931, amounted to 39.6 per cent of the total, the United States absorbing 30.7 per cent and Other Countries 8.9 per cent of this amount. If the United Kingdom, from 1868 to 1931 had been able to hold her proportion of Canada's import trade, imports from the United Kingdom in 1931 would have been valued at \$508,778,000, compared with an import from the United States valued at \$306,537,000, and Other Countries at \$91,598,000. As Canada developed industrially she had to go afield for certain raw materials, such as cotton, rubber, fibres, etc., and semi-manufactured products, for her expanding manufacturing industries, which could not be obtained directly from the United Kingdom, and consequently, it was largely due to her industrial expansion that the proportion of Canada's imports from the United Kingdom fell off.

The proportion of imports from Other Countries in 1868 amounted to 10.1 per cent; in 1900 to 15.1 per cent; 1930 to 16.9 per cent, and in 1931 to 18.9 per cent. The imports into Canada from the United Kingdom, the United States and Other Countries with proportions received from each during the years 1868, 1900, 1930 and 1931, were:—

Country	1868		1900		1930		1931	
	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total
United Kingdom.....	37,617,000	56.1	44,280,000	25.7	189,180,000	15.2	149,488,000	16.5
United States.....	22,660,000	33.8	102,225,000	59.2	847,450,000	67.9	584,426,000	64.5
Other Countries.....	6,813,000	10.1	26,146,000	15.1	211,644,000	16.9	172,699,000	19.0

Of the total imports from Other Countries in 1931, amounting to \$172,700,000, the continent of Europe, except the United Kingdom, supplied \$74,700,000; North America, except the United States, \$23,400,000, South America \$25,600,000; Asia \$27,700,000; Oceania \$14,400,000; and Africa \$6,900,000.

Exports to Principal Countries.—Canada's domestic exports during the fiscal year 1931 compared with similar export trade in 1930 show a decrease of \$320,605,635 or 28.6 per cent. Decreases occurred in thirty-three of the forty principal countries; increases in only seven. The decreases in the exports to the thirty-three countries which had decreases exceeded the increases for the seven countries which had increases by \$310,875,429. Of the total decrease in the domestic exports in 1931 compared with 1930, the British Empire accounted for \$86,766,123 or 27.1 per cent of the total and foreign countries for \$233,839,512 or 72.9 per cent. The principal countries to show decreases were: United States \$165,479,200; United Kingdom \$62,499,466; Germany \$12,401,425; Japan \$11,516,616; Australia \$9,534,063; Argentina \$9,198,952; China \$7,405,769; Belgium \$6,730,814; New Zealand \$6,478,013; Netherlands \$5,466,916; France \$3,221,253; Spain \$3,206,151; Sweden \$2,230,832; British India \$2,159,201; Newfoundland \$1,519,755; Brazil \$1,492,726; Jamaica \$1,389,363; Cuba \$1,377,473; and Chile \$1,222,593; while the chief countries to show increases were: St. Pierre and Miquelon \$5,145,228; Italy \$3,165,025; and British Honduras \$849,946.

An analysis of Canada's total domestic exports by countries, 1931, demonstrates that the decreases compared with 1930 occurred chiefly in the exports to those countries which purchase large quantities of grains and grain products from Canada. The statistics in the following table giving Canada's total exports to leading grain and grain products importing-countries, 1930 and 1931, contrasted with exports, when exports of grains and grain products are eliminated in each year, indicate that the exports of "Other Commodities" were fairly well maintained. When adjustments are made in the 1931 exports to account for the drastic decline in export commodity prices, it will be found that, while there has been a general decline in the volume of Canada's exports, the decline is largely one of price rather than of quantity. See remarks on "Fluctuation in Average Export Price, 1931 compared with 1930," page 47.

It will be noted by reference to the statistics in the following table re "Canada's Domestic Exports to Forty Leading Countries, 1931," that the United States and the United Kingdom took 71.1 per cent of the Dominion's exports, the percentage for each being: United States 43.7; United Kingdom 27.4. The United States occupied first place in Canadian export trade during the past five years, and the United Kingdom second place, though the United Kingdom was in first place in 1922. Of the other leading markets for Canadian products, Japan occupied third place in 1931 as in 1930, having moved up from fifth place in 1930; Belgium has moved into fourth place, being in fifth place in 1930, France from ninth to sixth place; while Italy has moved from thirteenth position last year into fifth place this year. Germany, New Zealand, Argentina and China have moved down a place or two in Canadian exports since last year, while St. Pierre and Miquelon, Newfoundland, and British South Africa have moved up a place or two. From 1930 to 1931, Germany has moved from fourth into seventh place, New Zealand from seventh into eighth, Argentina from sixth down to thirteenth place, and China from eighth down to fourteenth place, while St. Pierre and Miquelon has moved from sixteenth position into ninth, Newfoundland from twelfth into tenth, and British South Africa from fourteenth into twelfth place. The increase in the exports to St. Pierre and Miquelon, amounting to \$5,145,228, was entirely due to increased exports of alcoholic beverages, chiefly whiskey, which increased from \$5,164,149 to \$10,318,993.

In the fiscal year 1868 the exports to the United Kingdom and the United States combined represented 89.2 per cent of the total domestic exports, the proportions being: United Kingdom 36.9 per cent; United States 52.3 per cent. In 1900 similar exports to the United Kingdom and the United States were 91.3 per cent of the total domestic exports, the proportions being: United Kingdom 57.1 per cent; United States 34.2 per cent; while for the year 1931 the domestic exports from Canada to the same two countries represented 71.1 per cent, the proportion for each being: United Kingdom 27.4 per cent and the United States 43.7 per cent. From 1868 to 1900

Canada's domestic exports to the United Kingdom increased from 36.9 to 57.1 per cent of the total exports, while those to the United States decreased from 52.3 to 34.2 per cent; whereas from 1900 to 1931 domestic exports to the United Kingdom decreased from 57.1 to 27.4 per cent of the total exports and those to the United States increased from 34.2 to 43.7 per cent. The proportion of the exports to "Other Countries" was as follows: 1868, 10.8 per cent; 1900, 8.7 per cent and in 1931, 28.9 per cent. The domestic exports for the United Kingdom, the United States and Other Countries with proportions for each during the years 1868, 1900, 1930 and 1931 were:—

Country	1868		1900		1930		1931	
	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total	Value in \$	% of Total
United Kingdom.....	17,906,000	36.9	96,563,000	57.1	281,838,000	25.2	219,246,000	27.4
United States.....	25,350,000	52.3	57,996,000	34.2	514,958,000	45.9	349,571,000	43.7
Other Countries.....	5,249,000	10.8	14,413,000	8.7	323,462,000	28.9	230,836,000	28.9

The increase in Canada's domestic exports to "Other Countries" from 1868 to 1900 was \$9,164,000 or 174 per cent, but from 1900 to 1931 it was \$230,800,000 or 1591.5 per cent. During 1931 the exports to Other Countries, amounting to \$230,800,000, were distributed by continents as follows: Europe, except United Kingdom, \$90,000,000; North America, except United States, \$45,800,000; South America \$20,600,000; Asia \$39,400,000; Oceania \$20,000,000; and Africa \$15,000,000.

Trade Balances.—Canada's imports for the fiscal year 1931 showed a decline of \$341,661,000 compared with the same period in 1930, and total exports a decline of \$328,001,000. The "favourable" trade balance, which on March 31, 1926, amounted to \$401,371,000, and which had declined to a trifle less than one-fourth of that figure (\$103,335,000) in 1930 was an "unfavourable" balance of \$89,675,000 in 1931.

There have been marked changes in Canada's trade balances with the leading commercial countries of the world in recent years. In 1914 Canada had a "favourable" trade balance with Europe, Oceania and Africa, but an "unfavourable" balance with North and South America and with Asia, but in 1931 she had a "favourable" balance with every continent except the continents of North and South America. Canada had a "favourable" trade balance with Europe in 1914 of \$65,032,000, which had increased to \$426,719,000 in 1926, but which had declined to \$87,127,000 in 1931. This decline in Canada's "favourable" trade balance with Europe was largely brought about by falling off in her exports of grains, particularly wheat, due chiefly to lower export prices. From 1914 to 1931 the number of countries in Europe with which Canada had a "favourable" trade balance had increased from seven to twelve, compared with sixteen last year. The only European countries of importance in 1931 with which the trade balance was "unfavourable" were Czecho-Slovakia, France, Germany and Switzerland. From 1914 to 1931 the Dominion's annual credit balance, with the United Kingdom decreased from \$90,252,000 to \$71,199,000, with Germany the debit balance of \$10,152,000 decreased to \$3,097,000; with Belgium from a credit balance of \$330,000 to \$6,670,000; with Italy from a debit balance of \$1,435,000 to a credit balance of \$9,520,000; Greece from a debit balance of \$433,000 to a credit balance of \$5,140,000; Netherlands from a credit balance of \$2,494,000 to \$3,371,000; Denmark from a credit balance of \$525,000 to \$3,342,000; and Sweden from a debit balance of \$426,000 to a credit balance of \$438,000. In 1914 Canada had a debit balance with France of \$10,466,000, which amounted to \$5,618,000 in 1931, while the debit balance with Switzerland increased during the same period from \$4,268,000 to \$4,894,000. These trade balances with European countries do not represent the true situation, as a very large quantity of the grain, especially wheat, shown in Canadian export statistics as for the United Kingdom is diverted from its original destination, the United Kingdom, to other destinations. As a result of this diversion, the credit balance with the United Kingdom would be materially reduced and the balances with other European countries increased by a corresponding amount.

Canada's trade balance with the continent of North America has been unfavourable since 1882, the debit balance with the United States being responsible for this situation. If the trade of the United States is eliminated from North America, the trade balance with "Other North America" increased from a debit balance of \$2,609,000 in 1914 to a credit balance of \$23,122,000 in 1931. In 1914 the debit balance with the continent of North America amounted to \$221,963,000 and in 1931 it had decreased to \$197,474,000, while the number of countries in North America with which Canada had a debit balance was reduced from eight to six. The Dominion's debit trade balance with the United States from 1914 to 1931 increased from \$219,354,000 to \$220,596,000, being \$90,158,000 less than last year; with Newfoundland from a credit balance of \$2,900,000 to \$8,560,000; with St. Pierre and Miquelon from a credit balance of \$117,000 to \$10,404,000; Mexico from a debit balance of \$1,419,000 to a credit balance of \$1,274,000; with Cuba from a debit balance of \$2,124,000 to a credit balance of \$461,000; with Bermuda from a credit balance of \$397,000 to \$2,248,000; and with the British West Indies from a credit balance of \$143,000 to a debit balance of \$1,299,000.

With the continent of South America the debit balance of \$4,770,000 in 1914 amounted to \$4,951,000 in 1931. The debit balance of \$468,000 with Argentina in 1914 was changed to a credit balance of \$3,270,000 in 1931, while the debit balance with Colombia in 1914 of \$125,000 amounted to \$3,842,000 in 1931 and the debit balance with Peru during the same interval increased from \$737,000 to \$2,952,000.

The most notable change in the trade balance with any continent, from 1914 to 1931, occurred with the continent of Asia, a debit balance of \$8,118,000 being converted into a credit balance of \$11,761,000. The principal countries responsible for this change were Japan and China, the trade balance of the former increasing from a credit balance of \$1,015,000 to a credit balance of \$9,629,000; and of the latter from a debit balance of \$440,000 to a credit balance of

\$4,354,000. The credit balance with the continent of Asia, and particularly with China and Japan, is much less in 1931 than in 1930 due to falling off in the exports of wheat and flour to the Orient in 1931.

The credit trade balance with Oceania from 1914 to 1931 increased from \$2,603,000 to \$5,690,000 and with Africa from \$3,459,000 to \$3,172,000. From 1914 to 1931 the credit balance with Australia decreased from \$3,993,000 to \$2,179,000; while with British South Africa the credit balance increased from \$3,358,000 to \$6,958,000; and with New Zealand from a debit balance of \$1,256,000 to a credit balance of \$6,039,000.

Principal Commodity Imports.—The statistics in the following table showing "One Hundred Leading Commodities Imported into Canada, 1931," indicate that the total declared value of these commodities amounted to \$734,556,683 or 81.0 per cent of the total imports into Canada. Of the one hundred commodities listed ninety-four show decreases and six only show increases. Of the fifty-two commodities for which there were quantity statistics, eleven show increases in the quantity imported but decreases in the value; one only shows a decrease in the quantity but an increase in the value; while thirty-seven show decreases in both quantity and value and three only increases in both quantity and value. Of the forty-eight commodities for which there were no quantity statistics, being entered at value only, forty-six show decreases and only two show increases. The commodities imported, which show (a) increases in quantity but decreases in value and (b) decreases in quantity but increases in value, 1931, compared with 1930, were:—

(a) COMMODITIES TO SHOW INCREASES IN QUANTITY BUT DECREASES IN VALUE

Commodity	Imports, 1931		Increase in Quantity	Decrease in Value
	Quantity	Value		
Vegetable oils.....Gal.	14,269,394	\$ 10,870,706	603,398	1,373,445
Artificial silk fabrics.....Yd.	21,503,506	8,016,593	1,401,060	1,671,551
Raw silk.....Lb.	1,954,395	6,695,844	285,409	1,665,110
Raw coffee.....Lb.	31,501,596	4,365,637	2,841,079	1,558,998
Nuts, edible.....Lb.	41,384,904	3,743,558	2,167,016	1,000,229
Cotton yarn.....Lb.	4,866,949	3,321,318	53,824	506,549
Manila and sisal fibre.....Lb.	48,545,200	3,068,576	2,585,400	754,037
Raw wool.....Lb.	10,744,883	3,065,691	410,628	1,241,254
Noils, tops and waste wool.....Lb.	6,878,186	2,794,239	564,398	1,039,562
Molasses.....Gal.	8,556,572	2,222,694	839,195	294,222
Rice.....Lb.	61,772,500	1,660,395	3,891,800	235,390

(b) COMMODITIES TO SHOW DECREASES IN QUANTITY BUT INCREASES IN VALUE

Commodity	Imports, 1931		Decrease in Quantity	Increase in Value
	Quantity	Value		
Alumina and bauxite.....Cwt.	2,175,254	\$ 3,335,708	515,921	\$ 246,645

In the case of the fifty-two commodities for which there were quantity statistics, forty-four of these were imported at a lower price per unit in 1931 than in 1930, and eight at a higher price per unit. Those imported at a lower price per unit were valued at \$379,243,110 while those imported at a higher price per unit were valued at \$21,006,470. The forty-four commodities entered at a lower average import price were: Artificial silk fabrics, artificial silk yarn, automobiles, bars and rails (iron), coal, cocoa and chocolate, raw coffee, coke, corn, raw cotton, cotton yarn, coloured or printed cottons, grey and white cottons, dress goods (wool) to be dyed, fertilizers, canned fruits, dried fruits, gasoline, raw hides, jute cloth and canvas, molasses, noils, tops and waste wool, nuts (edible), crude petroleum oil, vegetable oils, planks and boards, plates and sheets (iron), rice, rods (iron), crude rubber, raw silk, sisal and manila grass, spirits and wines, structural iron or steel, sugar for refining, refined sugar, tea, tin in blocks, raw tobacco, tweeds, canned vegetables, raw wool, woollen yarn, and worsteds and serges. The eight commodities imported at a higher average import price were: Alumina and bauxite, band and hoop iron, binder twine, dyeing and tanning materials, iron ore, pigs, ingots and blooms, soda and compounds, and sulphur.

Imports for Canadian Industries.—An analysis of the statistics in the following table giving "Imports of Sixty-Two Leading Commodities for Canadian Industries, 1931," indicates that about one-third of the total imports into Canada are for use in the various industries of the Dominion. The decrease in the imports of the sixty-two commodities for Canadian industries was \$101,197,928, compared with a total decrease in Canada's imports in 1931 compared with 1930 of \$341,660,901. The value of the imports of the raw, semi-manufactured and fully manufactured products, listed for use in Canadian industries in 1931, was \$250,867,323, the proportions of this amount classified according to degree of manufacture, 1931 compared with 1930, being:—

IMPORTS FOR CANADIAN INDUSTRIES CLASSIFIED ACCORDING TO DEGREE OF MANUFACTURE

Degree of Manufacture	Imports, 1931		Decrease, 1931 compared with 1930	
	Value	Per cent of Total	Value	Per cent of Total
	\$		\$	
Raw materials.....	129,933,254	51.8	48,261,897	47.7
Semi-manufactured.....	57,116,074	22.8	20,624,236	20.4
Fully manufactured.....	63,817,995	25.4	32,311,795	31.9
Total 62 Commodities.....	250,867,323	100.0	101,197,928	100.0

The decrease in the imports of products for use especially in Canadian industries, amounting to \$101,197,928, naturally reflects a corresponding slowing down of Canadian industrial activities. The decrease, though large, is proportionate of the the general decline in the Dominion's import trade, i.e., the value of the sixty-two commodities listed for Canadian industries, amounting to \$250,867,323, represents about 26 per cent of Canada's total import trade, while the decrease in the imports of these commodities, amounting to \$101,197,928, represents also about 26 per cent of the total decrease in the Dominion's import trade.

A further analysis will show that fifty-six of the sixty-two commodities listed as for use in Canadian industries show decreases and only six show increases; while thirty-seven of the forty-nine commodities for which there are quantity statistics show decreases and twelve increases. Of the forty-nine commodities for which there were quantity statistics nine show increases in the quantity imported, but decreases in the value, viz.: raw silk, raw coffee, cotton yarn, manila and sisal grass, raw wool, wool noils, tops and waste, oil for soap industry and grease for soap and oil; one only shows a decrease in the quantity imported, but an increase in the value, viz.: alumina, bauxite and cryolite; thirty-six show decreases in both quantity and value; and four increases in both quantity and value. Of the thirteen commodities entered at value only, twelve show decreases and one only an increase.

In the case of the forty-nine commodities listed for Canadian industries for which there are quantity statistics, an investigation shows that thirty-eight of these, valued at \$185,918,606, were imported at a lower average import price in 1931 than in 1930, and eleven, valued at \$22,088,531, at a higher import price; while in the case of the thirteen commodities, which were entered at value only, twelve, valued at \$40,969,669, show decreases in 1931 compared with 1930, and one only valued at \$1,890,517, shows an increase. The thirty-eight commodities which entered Canada for Canadian industries at a lower average import price in 1931 than in 1930 were: Artificial silk yarn, bristles, bituminous coal, raw cocoa, raw coffee, copper bars and rods, raw cotton, cotton yarn, dress goods (wool) to be dyed, glycerine, grease for soap and leather, gums and resins, hemp, raw hides, lumber, manganese oxide, manila and sisal grass, crude cotton seed oil, crude peanut oil, crude petroleum oil, oil for soap industry, boiler plate (iron), rolled iron and steel for agricultural implements, raw rubber, rubber, hard, recovered, etc., raw silk, silk cloth to be dyed, skelp iron for pipe, sugar for refining, tin in blocks, tin plate, locomotive tires, raw tobacco, wire rods for making wire, raw wool, wool noils, tops and waste, woollen yarn, and zinc in sheets and plates. The eleven commodities which entered Canada at a higher average import price in 1931 than in 1930 were: Alumina, bauxite and cryolite, dyeing and tanning materials, automobile engines, iron ore, logs, ores of metals, pigs, ingots and blooms (iron), sand, silica, for industries, sulphate of alumina, sulphate of soda and sulphur.

Canada in common with every manufacturing country of the world is dependent on imported raw materials for certain of her manufacturing industries, e.g., raw rubber, raw cotton, raw silk, sisal fibre, iron ore, bauxite, sulphur, manganese oxide, crude cotton seed oil, crude peanut oil, raw cocoa, coconut oil, etc. A survey of the imports of raw materials into a country dependent on imported raw materials for its industries will indicate as a general rule whether such industries are in a flourishing or depressed condition. For instance an increase in the imports of raw materials for such industries will invariably reflect greater industrial activity in those industries, as well as an increase in the exports of those commodities manufactured from imported raw materials, while a decrease in the imports of raw materials would indicate the very opposite result.

Principal Commodity Exports.—The following table giving "Seventy Leading Commodities Exported from Canada, 1931," shows that the total value of these commodities was \$746,807,423, or 93.4 per cent of the Dominion's total domestic exports. Sixty of the commodities listed show decreases in value and ten increases. Four of the commodities for which there were quantity statistics show increases in the quantity exported, but decreases in the value, viz.: Wheat, whiskey, silver ore and bullion, and zinc; one only shows decrease in the

quantity, but increase in the value, viz.: Raw tobacco; forty-one show decreases in both quantity and value and seven show increases in both quantity and value. Fifteen of the commodities for which there were no quantity statistics show decreases and two only show increases. An analysis also demonstrates that of the fifty-three commodities listed for which there are quantity statistics, forty were exported at a lower average export price per unit in 1931 than in 1930 and thirteen at a higher average export price. The total value, however, of the forty commodities exported for which the export price was lower in 1931 than in 1930 amounted to \$619,864,964, while the total value of the thirteen commodities for which the average export price was higher amounted to \$46,834,742. The total value of the seventeen commodities for which there were no quantity statistics was \$80,107,718, fifteen of which of a value of \$76,238,023 show decreases compared with last year, and two only of a value of \$3,869,695 increases.

The forty commodities exported at lower average export prices in 1931 than in 1930 were: Acids, green apples, raw asbestos, automobiles, barley, bran, shorts and middlings, binder twine, cheese, copper ore and blister, electrical energy, fertilizers, ferro-manganese and ferro-silicon, fish, flaxseed, gasoline and naphtha, hay, raw hides, laths (wood), lead, logs, lumber, nickel, oats, oatmeal and rolled oats, crude petroleum oil, newsprint paper, wrapping paper, potatoes, rolling mill products, shingles (wood), silver ore and bullion, soda and compounds, railroad ties, square timber, rubber tires, wheat, wheat flour, whiskey, wood pulp and zinc. The thirteen commodities which were exported at a higher export price compared with last year were: Abrasives, artificial, crude, aluminium in bars, cattle, coal, rubber footwear, milk, condensed, milk and cream, platinum concentrates, poles (wood), pulpwood, maple sugar, refined sugar and raw tobacco.

Fluctuation in Export Prices.—Changes in the values of imports and exports over a given period may be caused by (a) variations in quantity; (b) fluctuations in price; or (c) combination of these two factors.

Canada's declared domestic exports for 1931 compared with 1930 show a decrease of \$320,605,635 or 28.6 per cent. It will be noted, however, by reference to the following table re "Preliminary Comparison of the Volume and Value of Canada's Domestic Exports," year 1931 compared with 1930, which comprises 85 per cent of Canada's exports, that when allowance is made for the fluctuation in export prices that the decrease in Canadian exports in 1931, due to price changes, accounted for \$171,869,054 or 53.6 per cent of Canada's total decrease in her export trade, while the decrease due to changes in the volume of the trade accounted for \$148,738,581 or 46.4 per cent.

The statistics in this table also demonstrate that when the variations in export commodity prices have been eliminated from Canadian exports, i.e., when the quantities exported in 1931 are re-valued at 1930 average export prices, the exports of the Dominion on a quantity basis amounted to \$971,521,721, representing a decrease of 13.3 per cent, compared with a decrease of 28.6 per cent, based on declared values. The most notable change, however, occurred in the export of wheat. If the average export price of wheat in 1931 had been the same as in 1930, the exports of wheat in 1931 would have amounted to \$264,819,262, compared with a declared export value of \$177,419,769. Other notable changes occurred in the following exports, though the changes were not so marked as in the case of wheat: Alcoholic beverages, asbestos, barley, cheese, copper, raw furs, raw hides, lead, meats, oats, newsprint paper, planks and boards, potatoes, silver, wheat flour and zinc.

Trade via the United States.—Canada's imports from overseas countries via the United States have steadily declined in recent years, especially those from the British Empire. This decrease has resulted from: (1) general propaganda to utilize Canadian sea and river ports; (2) additional concessions to goods imported under the British Preferential tariff if imported direct; and (3) provision in trade treaties and agreements negotiated with foreign countries that goods must be imported direct in order to obtain the full benefits of special rates of duty.

There was a decrease in imports from overseas countries via the United States during the fiscal year 1931 compared with similar imports in 1927, of \$3,803,016; the decrease in the imports from the British Empire amounting to \$3,583,643, and from foreign countries to \$219,373. The statistics in the following table provide an analysis of this feature of Canada's import trade for the last five fiscal years:—

IMPORTS INTO CANADA VIA THE UNITED STATES

Imports from—	Years ended March 31—				
	1927	1928	1929	1930	1931
United Kingdom via United States.....\$	728,001	773,694	987,752	1,042,164	169,820
Per cent of Total Imports from United Kingdom.....	0.44	0.41	0.51	0.55	0.12
Other British Empire via United States.....\$	3,832,540	2,241,007	1,645,950	1,221,720	807,078
Per cent of Total Imports from Other British Empire.....	7.64	3.55	2.59	1.92	1.45
Foreign Countries via United States.....\$	8,200,679	9,102,893	8,408,832	7,586,005	7,981,306
Per cent of Total Imports from Foreign Countries.....	6.32	6.42	5.99	5.12	6.81
Total Imports via United States. \$	12,761,220	12,117,594	11,042,534	9,849,889	8,958,204
Per cent of Total Imports from Overseas Countries.....	3.71	3.11	2.78	2.46	2.78

The exports from Canada to overseas countries via the United States show a decided decrease during the past two or three years, the proportions for the fiscal years 1927 and 1928 being about 39 per cent, 1929, 36.71 per cent, 1930, 33.9 per cent, and 1931 27.49 per cent of the total exports to overseas countries. From 1927 to 1931 the proportion of the Dominion's exports to the United Kingdom via the United States decreased from 48.41 to 36.43 per cent; to Other British Empire from 25.17 to 17.31 per cent; and to Other Foreign Countries from 28.71 to 19.78 per cent. When adjustments are made for the re-routing of Canadian barley, oats, rye and wheat from United States lake ports, via the St. Lawrence route for ocean shipment at Montreal, it will be found that the proportions of Canada's exports to overseas countries via the United States will be considerably decreased and those via Canadian sea or river ports increased by a similar amount. The total value of commodities exported to overseas countries via the United States in 1931 was \$186,549,810 less than for the fiscal year 1927, wheat accounting for \$103,615,073 or 56 per cent of the decrease. Comparisons for the past five fiscal years were as follows:—

EXPORTS FROM CANADA VIA THE UNITED STATES

Exports to—	Years ended March 31—				
	1927	1928	1929	1930	1931
United Kingdom via United States.....\$	216,313,069	201,784,594	217,590,205	113,333,242	79,880,087
Per cent of Total Exports to United Kingdom.....	48.41	49.13	50.68	40.22	36.43
Other British Empire via United States.....\$	23,549,163	26,762,373	30,749,198	22,762,811	12,746,171
Per cent of Total Exports to Other British Empire.....	25.17	30.21	28.90	23.25	17.31
Foreign Countries via United States.....\$	70,422,646	63,060,434	68,850,420	69,067,677	31,108,810
Per cent of Total Exports to Foreign Countries.....	28.71	25.13	20.99	30.62	19.78
Total Exports via United States. \$	310,284,878	291,607,401	317,189,823	205,163,730	123,735,068
Per cent of Total Exports to Overseas Countries.....	39.49	38.87	36.71	33.90	27.49

The statistics in the following table giving "Principal Commodities exported from Canada to Overseas Countries via the United States and via Canadian Sea or River Ports, 1930," illustrate the details of this movement. The 37 commodities listed are representative of the Dominion's exports to overseas countries, as they comprise 81.0 per cent of the total exports to overseas countries; and they also represent 89.5 per cent of all goods shipped to overseas countries via the United States, and 77.9 per cent of those going via Canadian sea or river ports. During the past five fiscal years a considerable amount of Canadian grain exported from Fort William and Port Arthur to overseas countries via the United States has been re-routed from United States lake ports for shipment chiefly at Montreal. The amount of Canadian grain re-routed for export at Montreal or other Canadian ports during the calendar years 1925 to 1930 was:—

Grains	1925	1926	1927	1928	1929	1930
	Bushels	Bushels	Bushels	Bushels	Bushels	Bushels
Barley.....	1,439,000	361,000	2,533,000	3,085,000	1,035,000	1,114,000
Oats.....	2,395,000	697,000	597,000	394,000	213,000	65,000
Rye.....	1,170,000	370,000	2,052,000	2,589,000	193,000	399,000
Wheat.....	17,779,000	15,794,000	34,025,000	51,172,000	15,186,000	15,293,000
Total.....	22,783,000	17,222,000	39,207,000	57,240,000	16,627,009	16,876,000

This re-routed Canadian grain was not recorded as an export at Montreal or other Canadian ports because it had already been recorded as an export at Fort William or Port Arthur. It was recorded, however, as "intransit" grain from the United States via the Port of Montreal or other Canadian ports. In order to obtain the actual amount of barley, oats, rye and wheat shipped via Canadian sea or river ports, this re-routed Canadian grain should be added to the quantity already thus recorded and deducted from the quantity shown as exported via United States channels. When adjustments are made the actual quantities of barley, oats, rye and wheat exported to overseas countries via the United States (indirect) and via Canadian sea or river ports (direct) during the fiscal years 1927 to 1931 were:—

Grains	Years ended March 31—					Percentage of Total				
	1927	1928	1929	1930	1931	1927	1928	1929	1930	1931

Canada's Position in International Trade.—Canada has maintained fifth position in total imports and total trade, among the principal commercial nations of the world during the calendar year 1930, though in total exports she has moved from fifth position in 1929 into sixth position in 1930, yielding fifth place to British India. The statistics in the following table giving "Comparison of the Trade of the Principal Countries of the World" indicate that Canada in 1913 occupied eighth place in imports among the leading trading countries, being exceeded in value of imports by the United Kingdom, Germany, the United States, France, the Netherlands, Belgium and Italy, but in 1930 she occupied fifth place, displacing the Netherlands, Belgium and Italy. In export trade, Canada in 1913 was in tenth place, being exceeded in value of exports by the United Kingdom, the United States, Germany, France, the Netherlands, British India, Belgium, Italy and Argentina, but in 1930 she had moved up to sixth position, displacing the Netherlands, Belgium, Italy and Argentina. In 1929 as well as in 1928 Canada was in fifth place in export trade. In aggregate trade, Canada in 1913 was in ninth position, but in 1930 as in 1926 to 1929 she was in fifth position, being exceeded by the United States, the United Kingdom, Germany and France.

Canada has also made remarkable advance in proportionate increase in trade, both in amount and percentage, from 1913 to 1930. In the amount of increase in imports she occupied fifth position, being exceeded by the United Kingdom, the United States, France and Japan; in exports, second place, being exceeded by the United States; and in aggregate trade, fourth place, as last year, being exceeded by the United States, the United Kingdom and France. In percentage of increase in trade from 1913 to 1930, Canada occupied ninth place in imports, fifth place in exports, and seventh place in aggregate trade, being exceeded by Denmark, Japan, New Zealand, British South Africa, Sweden and Norway.

In trade per capita, Canada has made a very creditable showing since 1913, though in 1930 in imports per capita she moved into eighth position from fourth the previous year, in exports into fourth from third place, and in aggregate trade into sixth from fourth place. In 1913 Canada occupied fifth place in imports per capita but in 1930 she moved into eighth place, being in fifth place last year. In exports per capita Canada occupied seventh place in 1913, but in 1930 she had advanced to fourth place, being exceeded by New Zealand, Denmark and Belgium. In 1929, however, she occupied third place. In aggregate trade per capita Canada was in sixth position among the leading commercial nations of the world in 1913, and in 1930 she also occupied sixth place, being exceeded in aggregate trade per capita by New Zealand, Denmark, Switzerland, Netherlands and Belgium. In the year 1929 Canada occupied fourth place in aggregate trade per capita. In 1930 the aggregate trade of New Zealand per capita was \$281.36, imports amounting to \$136.96 and exports to \$144.40; Denmark, \$240.01, imports \$124.44 and exports \$115.57; Switzerland, \$212.29, imports \$127.62 and exports \$84.67; Netherlands, \$210.94, imports \$123.30 and exports \$87.64; Belgium, \$198.18, imports \$107.19 and exports \$90.99; and Canada \$188.52, imports amounting to \$99.35 and exports to \$89.17.

With reference to the visible trade balance, Canada, in 1930, as in the year 1929, was not in as favourable a position as for the years 1921 to 1927 when the trade balance was favourable to the Dominion, amounting to \$392,900,000 or \$41.95 per capita in 1925. In 1930 the trade balance for Canada was unfavourable to the extent of \$103,100,000 or \$10.38 per capita, while for the year 1913 the unfavourable balance was \$222,900,000 or \$29.61 per capita. On December 31, 1930, Canada stood in thirteenth position among the leading commercial countries of the world, with reference to the amount of her trade balance, but in fourteenth position as respects her trade balance per capita.

COMPARISON OF THE TRADE OF THE PRINCIPAL COUNTRIES OF THE WORLD

Canada's Share in World Trade.—Canada, since 1913, has made remarkable progress in the expansion of her trade in the world's principal markets, both in imports and exports. It will be noted from the statistics in the following tables Nos. 1 and 2, showing "Canada's Share in the Imports and Exports of Principal Countries" that in 1913 the total trade of these countries (forty leading countries) amounted to \$34,868,143,000, imports amounting to \$18,257,000,000 and exports to \$16,611,143,000; but in 1929 the total trade of the identical countries was \$55,494,530,000, imports totalling \$29,193,273,000 and exports \$26,301,257,000; the increase from 1913 to 1929 was: in total trade, \$20,626,387,000 or 59.1 per cent; in imports, \$10,936,273,000

or 59.9 per cent; and in exports, \$9,690,114,000 or 58.3 per cent. During the same years, viz.: 1913 and 1929, the trade of these same countries with Canada was: 1913, total trade, \$918,208,000; imports, \$355,222,000; and exports, \$562,986,000; 1929, total trade, \$2,369,281,000; imports, \$1,118,732,000; and exports, \$1,250,449,000; the increase in the trade with Canada, 1913 to 1929, being: in total trade, \$1,450,973,000 or 159.0 per cent; in imports, \$763,510,000 or 214.9 per cent; and in exports, \$687,463,000 or 122.1 per cent. From 1913 to 1929 the total trade of the forty leading countries listed in Tables Nos. 1 and 2, increased 59.1 per cent, but with Canada the increase was 159.0 per cent, imports into the identical countries increased 59.9 per cent, but from Canada the increase was 214.9 per cent; while the exports from the same countries increased 58.3 per cent, but to Canada the increase was 122.1 per cent. Canada's share in the trade of these countries was:—imports, in 1913, 1.95 per cent; in 1929, 3.83 per cent; exports, in 1913, 3.39 per cent, in 1929, 4.75 per cent.

In 1929 Canada's stated imports from the forty countries listed amounted to \$1,284,401,000, but the reported exports from these countries to Canada were valued at \$1,250,449,000, a discrepancy in favour of Canada of \$33,952,000. The bulk of this discrepancy (\$35,872,000) occurred in the movement of goods from Europe to Canada and is largely accounted for in the discrepancy between Canada's imports from the United Kingdom and British exports to Canada, due to the fact that goods valued at \$25,150,000 transhipped in bond from the United Kingdom to Canada are credited in Canadian import statistics as an import from the United Kingdom, but in the case of the United Kingdom, are treated as intransit, not being included in the exports to Canada; while the discrepancy for the continent of North America, amounting to \$6,831,000, occurred largely in the movement of products, chiefly grains, from the United States to Canada for shipment to overseas countries via Canada. Such movements are credited in United States trade statistics as an export to Canada, as the exporter at the time of shipment does not know the final destination, but they do not appear, either in the import or export trade of Canada, being considered as intransit trade. The discrepancy for the continent of South America, amounting to about \$2,282,000 is largely due to the fact that South American countries credit goods destined for Canada, but shipped to Canada via the United States, as exported to the United States and not to Canada.

With reference to the movement of goods from Canada in the calendar year 1929 to the various markets of the world, the declared exports to the forty leading countries amounted to \$1,172,998,000, while the recorded imports into the forty countries from Canada totalled \$1,118,732,000, a discrepancy between the two sets of figures of \$54,266,000. This discrepancy is due to the fact that a very large proportion of Canada's exports to overseas countries, shipped via the United States, on arrival at their final destination are credited to the United States and not to Canada. The value of goods shipped to overseas countries via the United States in 1929 amounted to over \$205,000,000. Other factors, such as the movement of United States products to overseas countries via Canada, tend to vitiate not only Canada's declared exports but also the imports into overseas countries from Canada. The particulars are set out in the following table, year 1929:—

Principal Countries of	Canada's Imports from	Recorded Exports to Canada	Canada's Exports to	Recorded Imports from Canada
	\$	\$	\$	\$
Europe.....	283,898,000	248,026,000	425,229,000	440,325,000
North America.....	915,480,000	922,311,000	580,712,000	540,281,000

CANADA'S EXPORTS COMPARED WITH EXPORTS OF OTHER COUNTRIES

Canada in the production and exportation of many staple products ranks high among the leading nations of the world. In the production of printing paper, nickel and asbestos she leads the world; occupies second place in the production of gold; in output of wheat and zinc she occupies third place; and fourth place in the production of automobiles, copper and lead. In the production of wheat Canada in 1930 was in third place with 397,872,000 bushels, being exceeded by Russia (production estimated at 1,157,400,000 bushels and the United States 850,965,000 bushels). In export trade, the Dominion leads the world in the exports of wheat, printing paper, nickel and asbestos; occupies second place in exports of automobiles and wheat flour, the United States being in first place; and fourth place in the exports of wood pulp and rubber tires, being exceeded in the exports of wood pulp by Sweden, Norway and Finland, and of rubber tires by the United States, the United Kingdom and France. The exports of these staple products from Canada make up fifty-five per cent of the Dominion's total domestic exports. Canada also ranks high in the world's exports of many other staple products such as lumber and timber, fish, copper, barley, cheese, raw furs, whiskey, meats, farm implements, pulpwood, cattle, raw gold, silver, rye, oats, rubber footwear, leather and hides.

Automobile Exports.—The growth of the automobile industry is one of the most remarkable industrial developments of the twentieth century. Thirty years ago the automobile was emerging from the experimental stage and the world production consisted of a few thousand cars. In 1929 the estimated world output was 6,287,558 cars, though in 1930 the output had declined to 4,040,673 cars. Canada has made great progress in recent years in the production and exportation of automobiles. In production Canada in 1930 occupied fourth place with 153,372 cars, made up of 121,337 passenger cars and 32,035 motor trucks, while in 1929 her production was 262,625 cars. The United States occupied first place in 1930 with an output of 3,355,986 cars, of which 2,784,745 were passenger cars and 571,241 were motor trucks; France occupied second place with an output of 220,000 cars; and the United Kingdom, third place with 170,000 cars. In 1917 Canada's production was 93,810 automobiles, though from 1904 to 1916 the total production was only 135,000 cars.

Canada's exports of automobiles for the fiscal year 1906, the first year for which export statistics are available, were only 67 cars, valued at \$63,329; in the fiscal year 1911 the exports were 627 cars, valued at \$595,746; ten years later (fiscal year 1921) the exports had increased to 19,910 cars, valued at \$13,979,121, made up of passenger cars 15,620, of a value of \$11,376,268, and motor trucks 4,290, of a value of \$2,602,853; while for the fiscal year 1931 the exports were 37,527 cars, valued at \$15,879,240, consisting of passenger cars 24,003, of a value of \$10,665,992 and motor trucks 13,524, of a value of \$5,213,248. Two years ago (fiscal year 1929) Canada's exports of automobiles consisted of 103,566 cars, valued at \$43,059,733, the passenger cars amounting to 72,108, of a value of \$31,264,999, and motor trucks to 31,458, of a value of \$11,794,734.

From the statistics in the following table re "Exports of Automobiles from Principal Automobile Producing Countries of the World," it will be noted that Canada occupied second place in the exports of automobiles for the calendar year 1930, with 44,553 cars; the United States being in first place by a considerable margin with 237,616 cars; the United Kingdom in third place with 29,753 cars; France in fourth place with 28,321 cars; Italy in fifth place with 20,737 cars; and Germany in sixth place with 6,182 cars.

Newsprint Paper.—Production—Canada, according to statistics issued by the Canadian Pulp and Paper Association and from other sources, led the world as a producer of newsprint paper during the Calendar Year 1930, as also for the years 1926 to 1929. The statistics in the following table showing "Production of Newsprint Paper for Principal Paper-Producing Countries of the World" indicate that for 1930 Canada's Production of newsprint paper amounted to 5,008,000,000 pounds; the United States being second with 2,564,000,000 pounds; the United Kingdom third with 1,600,000,000 pounds; and Germany fourth with 1,190,000,000 pounds. The total production of newsprint paper for the world in 1930 was estimated at about 14,410,000,000 pounds, of which Canada, Newfoundland and the United States supplied 57 per cent, and Canada alone about 35 per cent. The estimated production of newsprint paper for eighteen of the leading paper-producing countries of the world was: 1926, 12,092,000,000 pounds; 1927, 12,706,000,000 pounds; 1928, 13,235,000,000 pounds; 1929, 14,641,000,000 pounds; and in 1930, 14,230,000,000 pounds.

Newsprint Paper—Exports.—Canada, during the calendar year 1930, occupied first place by a very wide margin among the world's chief exporters of newsprint paper, her exports being over eight times as great as those for Newfoundland, her next competitor. From the statistics in the following table giving "Exports of Newsprint Paper from Principal Paper-Producing Countries of the World," it will be observed, that even in 1913 Canada led the world as an exporter of newsprint paper, Norway being in second place, the United Kingdom in third and Finland in fourth place. In 1930 the total quantity of newsprint paper exported by the thirteen leading paper-exporting countries was 7,374,316,000 pounds, compared with 6,220,947,000 pounds in 1927, 6,896,475,000 pounds in 1928, and 7,811,572,000 pounds in 1929; of which amount Canada in 1927 contributed 3,763,731,000 pounds or 60.5 per cent; in 1928, 4,413,175,000 pounds or 63.9 per cent; in 1929, 5,030,990,000 pounds or 64.4 per cent; and in 1930, 4,662,019,000 pounds or 63.4 per cent. Canada's exports of newsprint paper, therefore, exceeded the exports of the other twelve leading countries combined by 1,306,515,000 pounds in 1927; 1,929,875,000 pounds in 1928; 2,250,408,000 pounds in 1929; and 1,969,774,000 pounds in 1930. Canada's exports of newsprint paper are greater than those of the rest of the world combined.

Rubber Tire Exports.—Canada's rapid advance as a rubber tire producer and exporter since the war has been based on the great development of the automobile industry. In the fiscal year 1917, the first year for which there are export statistics of rubber tires, the exports of rubber tires from Canada were valued at \$726,768; ten years later (fiscal year 1927) the exports had increased to \$18,565,909; in 1930 the exports were valued at \$18,153,225, but in 1931 the exports had dropped to \$11,769,078, the decrease being due to the drastic decline in the price of raw rubber and other materials used in the tire industry. Export figures show that when there is a marked increase or decrease in the exports of automobiles, there is also a marked increase or decrease in the exports of rubber tires, thus indicating the close relation existing between the two industries. Thus, from 1917 to 1927 the increase in the exports of automobiles was \$27,146,353 and rubber tires \$17,839,141, but from 1930 to 1931 automobiles show a decrease of \$19,428,405 and rubber tires a decrease of \$6,384,147.

It will be observed by reference to the statistics in the following table re "Exports of Rubber Tires from the Principal Rubber Tire-Producing Countries of the World" that Canada occupied fourth position in 1930 with an export valued at \$14,379,449, but in the years 1927 to 1929 she was in third position. The United States in 1930 occupied first place with an export valued at \$31,764,659, the United Kingdom second place with an export valued at \$21,751,576; and France third position with an export valued at \$14,455,130. In 1929 the United Kingdom was in second position and France in fourth position, but in 1927 and 1928 France occupied second place and the United Kingdom fourth place.

Wheat Exports.—The rapid increase in the production of wheat in the Prairie Provinces during the past decade and a half or so, and the practical elimination of Russia, Roumania and other wheat producing countries of Europe as leading factors in the grain trade up to three years ago, have had the effect of establishing Canada, up to that time, in second place as a wheat producing country, the first place being held by the United States. During the past two years, however, Russia has enormously increased her production of wheat, so that in 1928 and 1929 (according to latest information) she occupied second position in wheat production, while Canada during 1929, with the falling off in her wheat yield, moved down to fifth position in the world's wheat production. In 1930 Russia was in first place, with an estimated production of 1,157,400,000 bushels, the United States in second with 850,965,000 bushels and Canada in third place with 397,872,000 bushels.

With reference to exports of wheat for the calendar year 1930, Canada occupied first place, with an export of 207,761,000 bushels, the United States second position with an export of 87,774,000 bushels, and Argentina third place with an export of 81,522,000 bushels. Canada's exports of wheat for the past nine years, as also for the year 1913, have exceeded those of the United States. The Dominion's exports of wheat for the fiscal year 1900 amounted to only 16,845,000 bushels; in 1910 they totalled 49,741,000 bushels, in 1920, 77,978,000 bushels; while for the fiscal year 1931 they amounted to 217,243,000 bushels. It will be noted by reference to the statistics in the following table showing "Exports of Wheat from Principal Wheat-Producing Countries of the World," that in 1913 Canada occupied first place as a wheat-exporting country, with an export of 129,950,000 bushels, Russia being in second place with an export of 121,953,000 bushels, Argentina in third place with 103,300,000 bushels, and the United States in fourth place with 99,509,000 bushels. In 1930 the order had been changed considerably, Canada being in first place, the United States in second, and Argentina in third place. Canada having occupied first place in wheat exports for some years yielded first place to Argentina in 1929 but reverted to first position again in 1930. Wheat occupies first place among Canada's exports.

(a) Statistics for 1912, no statistics available for 1913.

(b) No reliable statistics are available as to the amount of wheat exported from Russia in 1928, 1929 or 1930. According to import statistics for seven European countries, viz.: France, Germany, Greece, Italy, the Netherlands, Switzerland and the United Kingdom, Russia in 1930 exported 57,300,000 bushels of wheat to these countries. If complete statistics were available for 1930, the exports of wheat from Russia for that year would probably exceed the exports from the United States or Argentina.

Wheat Flour Exports.—Canada, since the opening of the twentieth century, has made remarkable progress in the flour-milling industry. This expansion in her flour production is reflected in the increase in the Dominion's flour exports. Today Canada ranks second among the countries of the world as a wheat flour exporting country, the first place being occupied by the United States. Canada's exports of wheat flour for the fiscal year 1900 amounted to 768,000 barrels; ten years later they totalled 3,064,000 barrels; in 1920 they amounted to 8,863,000 barrels; and in 1931 to 7,218,000 barrels; compared with 11,267,000 barrels in the fiscal year 1929.

It will be noted from the statistics in the following table showing "Exports of Wheat Flour from Principal Flour-Producing Countries of the World" that in 1930 Canada was in second place with an export of 7,515,000 barrels; the United States being in first place with an export of 13,060,000 barrels; Australia in third place with 4,892,000 barrels; France in fourth place with 3,233,000 barrels; Hungary in fifth place with 2,587,000 barrels; and the United Kingdom in sixth place with 2,299,000 barrels. The exports of wheat-flour from the United States in 1930 were 782,000 barrels greater than in 1913; from Canada 2,621,000 barrels greater and from Australia 2,630,000 barrels. From 1928 to 1930 the wheat-flour exports of the United States increased from 11,848,000 to 13,060,000 barrels; from Australia from 4,879,000 to 4,892,000 barrels; while the wheat-flour exports from Canada during the same period decreased from 10,737,000 to 7,515,000 barrels.

(a) Statistics for 1912, no statistics available for 1913.

Wood Pulp Exports.—Canada's great advance as a newsprint paper producer and exporter since the opening of the present century, has been based on the great expansion of her wood pulp industry. Canada's exports of wood pulp during the fiscal year 1890 were valued at only \$168,000 and in 1900 at \$1,816,000. In the year 1910 the Dominion's exports of wood pulp amounted to 590,346,000 pounds, value \$5,205,000; in 1920, or ten years later, they amounted to 1,538,958,000 pounds, value \$41,383,000; and in 1931 to 1,386,212,000 pounds, value \$35,062,000. The very small increase in the exports of wood pulp from Canada, from 1920 to 1931, is due to the fact that year by year larger quantities of wood pulp are used in the Canadian paper industry in the manufacture of newsprint and other forms of paper, and consequently the product is being exported in a manufactured form (paper) rather than in a semi-manufactured form (wood pulp). According to statistics in the following table giving "Exports of Wood Pulp from Principal Countries of the World," Canada, during the calendar year 1930 occupied fourth position among the world's exporters of wood pulp, with an export of 1,520,441,000 pounds; the first place being held by Sweden, with an export of 4,129,813,000 pounds; Norway was in second place with an export of 1,879,445,000 pounds; while Finland was in third place with an export of 1,739,728,000 pounds. In exports of chemical pulp in 1930 Canada occupied third position, with an export of 1,087,150,000 pounds, the first place being held by Sweden, by a wide margin, with an export of 3,084,439,000; and second place by Finland with an export of 1,156,346,000 pounds. With regard to exports of mechanical pulp, Canada occupied fourth place in 1930 with an export of 433,291,000 pounds; the first, second and third places being held by Norway with 1,346,256,000 pounds; Sweden, 1,045,374,000 pounds; and Finland, 583,382,000 pounds. In 1913 Sweden occupied first place as an exporter of wood pulp, Norway second place, and Canada third.

HISTORICAL SUMMARY OF CANADA'S TRADE, BY DECADES, 1890 TO 1930, AND THE YEAR 1931

Canada's import and export trade has changed very materially since 1890, both as to its origin and destination as well as in its character. The statistics in the following Tables Nos. 1 and 2, relative to Canada's imports and exports, by countries, indicate that the Dominion's trade, both import and export, and especially export, with "Other Countries," i.e., countries except the United Kingdom and the United States, made very little progress from 1890 to 1900 or even 1910, but that from 1910 on there was a marked improvement in this trade. This betterment in Canada's trade with "Other Countries" was no doubt due to the provision in the Customs Tariff Act, 1907, for the extension of benefits of the British Preferential Tariff in whole or in part to any British Country and the benefits of the Intermediate Tariff in whole or in part to any British or foreign country that grants trade benefits to Canada satisfactory to the Governor in Council. Prior to 1907 Canada had no bargaining machinery of this kind. In 1890 Canada's imports from "Other Countries" amounted to \$17,040,000; in 1900 they totalled \$26,147,000; in 1910 they had increased to \$56,977,000, in 1930 to \$211,652,000, but in 1931 the imports were \$172,699,000; while in 1890 the Dominion's exports "Other Countries" were valued at \$7,546,000; in 1900 at \$14,413,000; in 1910 they were valued at only \$35,566,000; in 1930 at \$323,463,000; and in 1931 at \$230,836,000. Compared with 1930, imports in 1931 from "Other Countries" show a decrease of \$38,953,000 and exports to a decrease of \$92,626,000, the decline in the trade, both import and export, being due to decreases in both the volume and the value, though the decrease in the value was more pronounced than in the volume due to drastic declines in commodity prices.

Further, from these Tables Nos. 1 and 2, it will be noticed that the imports from the United States from 1890 to 1931 increased from \$51,366,000 to \$584,426,000; the United Kingdom from \$43,277,000 to \$149,488,000; France from \$2,616,000 to \$19,005,000; Germany from \$3,779,000 to \$16,192,000; the British West Indies (including Bermuda) from \$1,182,000 to \$14,247,000; the British East Indies from \$183,000 to \$11,919,000; Japan from \$1,258,000 to \$9,342,000; Belgium from \$721,000 to \$8,420,000; the Netherlands from \$422,000 to \$7,287,000; Argentina from \$25 to \$6,740,000; New Zealand from \$12 to \$6,671,000; British Africa from \$113,000 to \$6,594,000; Switzerland from \$317,000 to \$5,484,000; Italy from \$163,000 to \$5,048,000; Colombia from \$1,600 to \$5,037,000; China from \$842,000 to \$4,811,000; and Australia from \$205,000 to \$4,617,000; while Canada's domestic exports to the United States from 1890 to 1931 increased from \$36,213,000 to \$349,571,000; the United Kingdom from \$41,499,000 to

\$219,246,000; Japan from \$27,000 to \$18,959,000; Belgium from \$41,000 to \$14,962,000; the British West Indies (including Bermuda) from \$1,461,000 to \$14,920,000; Italy from \$81,000 to \$14,552,000; France from \$278,000 to \$13,286,000; Germany from \$461,000 to \$12,942,000; New Zealand from \$20,000 to \$12,688,000; British Africa from \$23,000 to \$12,194,000; St. Pierre and Miquelon from \$161,000 to \$11,004,000; Newfoundland from \$982,000 to \$10,659,000; the Netherlands from \$1,000 to \$10,478,000; Argentina from \$763,000 to \$10,008,000; China from \$32,000 to \$9,122,000; the British East Indies from \$9,000 to \$7,824,000; and Australia from \$471,000 to \$6,789,000.

By reference to Tables Nos. 3 and 4 which show the trend of Canada's imports and exports since 1890, it will be noted that there has been a marked change in the character of the Dominion's imports and exports, as well as in the importance of the various commodities which comprise the import and export trade. In the imports and exports of leading commodities from 1890 to 1931 it will be observed that commodities that occupied an important position in Canada's import and export trade in 1890 have, due to economic changes in the industrial life of the country, been materially changed in their importance in relation to other commodities in 1931.

TABLE No. 1.—SUMMARY OF CANADA'S IMPORTS BY COUNTRIES

(Fiscal years 1890, 1900, 1910, 1930 and 1931)

PREFACE

All features of previous issues of the Condensed Preliminary Trade Report are continued in the present number. It consists, as before, of two main sections—A Review of Canada's Foreign Trade during the fiscal year just closed (1931-32), and a series of statistical tables ("Condensed Statistical Record of Canadian Trade"), partly summary and historical, but mainly a presentation of the main items of the trade of Canada with the more important countries of the world.

In the first section, the external trade of Canada is examined from several angles and the outstanding features of the year explained in both text and tabular form. This section also contains historical summary of Canada's import and export trade by decades from 1890 to 1930 and the year 1932, distinguishing imports and exports for principal countries and commodities.

All the tables have been revised and expanded to meet altered conditions of trade. Commercial exchange with eighty-three different countries is dealt with in detail.

Throughout the report, figures for the fiscal year ended March 31, 1932, are unrevised; those for earlier years are final.

The "Review of Canada's Foreign Trade for 1930-^{1 2}~~31~~" was written by Mr. W. A. Warne, B.A., Chief of the External Trade Branch of the Dominion Bureau of Statistics, while the "Condensed Statistical Record" was compiled by Mr. A. L. Neal, B.A., B.Sc. (econ.), Statistician of the Branch.

R. H. COATS,
Dominion Statistician

DOMINION BUREAU OF STATISTICS,
OTTAWA, June 16, 1932.

REVIEW OF CANADA'S FOREIGN TRADE, 1931-32

The adverse factors which influenced Canada's foreign trade in 1930-31 continued during the past fiscal year, 1931-32, and the Dominion's trade suffered a still further decline. The general decline in world trade, which had its beginning in the fall of 1929 and which continued throughout the year 1930, was particularly severe during the fiscal year 1931-32, being more marked than for the fiscal year 1930-31, due largely to a further drop in commodity prices, which characterized all world markets. The factors which restricted the flow of Canadian trade during the past two years are similar to those which operated to bring about a drastic decline in the value and volume of world trade. It is difficult to isolate these factors, but the most important which have interfered with the free movement of commodities between countries were: Decline in commodity prices, depreciated currency, weakened finances, excessive world stocks, trade control measures, changes in investments abroad, and the general unrest of a political and social nature.

Canada, however, during the calendar year 1931, even with a material recession in her import and export trade, has maintained a relatively high place among the leading commercial countries of the world. In 1930, we stood in fifth position in total trade and total imports, being exceeded in value by the United States, the United Kingdom, Germany, and France, and sixth position in total exports, being exceeded in value by the same four countries and British India. In the calendar year 1931, due to unstable trade conditions, there have been some notable changes in the relative position of certain leading trading nations in world trade. The United Kingdom, Canada, and British India, the three greatest trading countries of the British Empire, all moved downwards in their relative position with respect to values of total exports in 1931 amongst the principal commercial nations of the world. Germany in 1931 displaced the United Kingdom from second position in the value of exports; Belgium and Argentina moved up to fifth and sixth position, displacing British India and Canada.

The following table shows Canada's position amongst the eleven leading countries in world trade in 1931, the values being in millions of Canadian dollars and the figures in parentheses being the relative position in 1930:—

Country	Total Trade		Total Net Imports		Total Domestic Exports	
	Rank	Amount	Rank	Amount	Rank	Amount
United Kingdom.....	1 (1)	5,564.2	1 (1)	3,740.4	3 (2)	1,823.8
United States.....	2 (2)	4,613.6	2 (2)	2,132.6	1 (1)	2,481.0
Germany.....	3 (3)	3,933.4	4 (3)	1,660.7	2 (3)	2,272.7
France.....	4 (4)	2,968.0	3 (4)	1,724.7	4 (4)	1,243.3
Belgium.....	5 (8)	1,362.7	6 (8)	690.3	5 (7)	672.4
Netherlands.....	6 (6)	1,345.5	5 (6)	794.7	10 (9)	550.8
Canada.....	7 (5)	1,221.5	8 (5)	616.2	7 (6)	605.3
Japan.....	8 (10)	1,185.8	9 (9)	615.5	8 (8)	570.3
Italy.....	9 (9)	1,176.4	7 (7)	631.2	11 (10)	545.2
Argentina.....	10 (11)	1,116.5	10 (10)	498.4	6 (11)	618.1
British India.....	11 (7)	1,071.8	11 (11)	484.3	9 (5)	587.5

Canada's total imports of merchandise in 1932, amounting to \$578,503,904, show a decrease of 36.2 per cent compared with 1931, and exports of domestic merchandise, amounting to \$576,344,302, a decrease of 27.9 per cent. Canada's trade for the past eight years may be divided into two periods, one from 1925 to 1930, of expanding trade, followed by two years of depression from which we have not fully emerged. The average level of prices changed only moderately for the past five or six years prior to 1930, but during that past two years the drastic decline in commodity prices has materially affected the comparability of trade statistics. In analyzing the trend of general trade it is essential to remember that

values do not reveal the true increase or decrease of the trade of a country. When the fluctuations in import and export prices have been eliminated from Canadian trade, i.e., when the quantities imported and exported in 1932 are revalued at 1931 average import and export prices, the imports of the Dominion on a quantitative basis, according to a preliminary survey, amounted to \$684,332,330, and domestic exports to \$698,982,687, representing a decrease in imports of 24.5 per cent, and in exports of only 12.6 per cent, compared with a decrease based on declared values of 36.2 per cent for imports, and 27.9 per cent for exports. On a volume or quantitative basis in 1932 Canada had a favourable trade balance of over \$14,000,000. For detailed information respecting Canada's import and export trade on a value and volume basis, 1932 compared with 1931, see pages 51 to 58 for imports, and pages 52 to 62 for exports.

The trade of both Canada and the United States suffered more from the world-wide depression than the chief commercial countries of Europe, except Hungary and Spain. A comparison of the decline in the imports and exports of the chief trading countries of the world with that of Canada and the United States is of special interest. The statistics in the following table showing (1) the percentage of decrease in the trade of thirty-four representative countries for the twelve months ended December 31, 1931, compared with similar period in 1930; and (2) the percentage relation of exports to imports, 1930 and 1931, indicates that each country had a decrease in both imports and exports, except Argentina, Australia, and Brazil, which had increases in exports; and that fourteen of the thirty-four countries had a favourable trade balance in 1931 compared with twelve in 1930. It will also be noted that Canada occupied thirtieth position in respect of percentage of decrease in imports, being exceeded by Australia, Chile, New Zealand, and Spain, while in respect of percentage of decrease in exports she occupied twenty-eighth place, being exceeded by British India, Hungary, Norway, Spain, the United Kingdom, and the United States; whereas in regards to trade balance among the thirty-four countries she occupied sixteenth position in 1931 compared with nineteenth position in 1930.

TRADE WITH THE WORLD

(a) **Analysis of Total Trade.**—Canada's total foreign trade during the year ended March 31, 1932, amounted to \$1,166,069,421, compared with a similar trade in 1931 valued at \$1,723,640,743, and in 1930 at \$2,393,211,652; showing a decrease compared with the year 1931 of \$557,571,322 or 32.4 per cent, and with 1930 of \$1,227,142,231 or 51.3 per cent. Imports as well as exports show a decrease compared with the year 1931, the decrease in imports amounting to \$328,108,791 or 36.2 per cent, and in exports to \$229,462,531 or 28.1 per cent.

During 1932 imports amounted to \$578,503,904 compared with an import trade in 1931 valued at \$906,612,095, and in 1930 at \$1,248,273,582, the decrease in imports in 1932 compared with 1931 amounting to \$328,108,791 or 36.2 per cent, and in 1930 to \$669,769,678 or 53.7 per cent; while the exports (domestic and foreign combined) during the year 1932 were valued at \$587,565,517 compared with a similar trade in 1931 valued at \$817,028,048, and in 1930 at \$1,144,938,070; the decrease in 1932 compared with 1931 amounting to \$229,462,531 or 28.1 per cent, and with 1930 to \$557,372,553 or 48.7 per cent. During 1932 Canada's domestic exports amounted to \$576,344,302, in 1931 to \$799,742,667, and in 1930 to \$1,120,258,302; the decrease in 1932 compared with 1931 amounting to \$223,398,365 or 27.9 per cent, and with 1930 to \$543,914,000 or 48.5 per cent. For the fiscal year ended March 31, 1932, Canada's trade balance was favourable to the extent of \$9,061,613, compared with an unfavourable balance in 1931 of \$89,584,647, and in 1930 of \$103,335,512; the improvement in Canada's trade balance in 1932 compared with 1931 amounting to \$98,646,260, and with 1930 to \$112,397,125.

(b) **Analysis by Groups.**—The decrease in the imports, 1932 compared with 1931, amounting to \$328,108,791, or 36.2 per cent, occurred in each of the nine main groups; while the decrease in the domestic exports, amounting to \$223,398,365, or 27.9 per cent, also occurred in each of the nine main groups. The total value of each of the nine main groups of imports, arranged in order of importance, with decrease 1932 compared with 1931, was: (1) Agricultural and Vegetable Products, \$128,621,260, decrease \$49,007,519 or 27.6 per cent; (2) Non-Metallic Minerals and Their Products, \$102,147,347, decrease \$51,431,311, or 33.5 per cent; (3) Iron and Its Products, \$98,811,706, decrease \$95,121,771 or 49.0 per cent; (4) Fibres, Textiles and Textile Products, \$83,879,362, decrease \$46,837,660 or 35.8 per cent; (5) Miscellaneous Commodities, \$43,440,365, decrease \$19,030,855, or 30.4 per cent; (6) Non-Ferrous Metals and Their Products, \$34,301,105, decrease \$26,293,929, or 43.4 per cent; (7) Wood, Wood Products and Paper, \$32,003,168, decrease \$14,033,861 or 30.5 per cent; (8) Chemicals and Allied Products, \$30,731,345, decrease \$4,919,427 or 13.8 per cent; and (9) Animals and Animal Products, \$24,563,246, decrease \$21,432,459, or 46.6 per cent. The total value of each of the nine main groups of domestic exports, arranged in order of importance, with decrease 1932 compared with 1931, was: (1) Agricultural and Vegetable Products, \$204,398,365, decrease \$87,881,672 or 30.1 per cent; (2) Wood, Wood Products and Paper, \$175,740,269, decrease \$54,864,205 or 23.8 per cent; (3) Non-Ferrous Metals and Their Products, \$69,072,888, decrease \$26,579,175 or 27.8 per cent; (4) Animals and Animal Products, \$68,798,683, decrease \$14,916,089 or 17.8 per cent; (5) Iron and Its Products, \$15,462,977, decrease \$23,474,684 or 60.3 per cent; (6) Non-Metallic Minerals and Their Products, \$13,456,701, decrease \$7,651,079 or 36.2 per cent; (7) Miscellaneous Commodities, \$13,367,251, decrease \$4,748,595 or 26.2 per cent; (8) Chemicals

and Allied Products, \$10,535,038, decrease \$2,290,814, or 17.9 per cent; and (9) Fibres, Textiles and Textile Products, \$5,512,130, decrease \$992,052, or 15.2 per cent. For further details of Canada's commodity imports and exports, with increases or decreases, 1932, compared with 1931, see statistics in the following table:—

For further information respecting Canada's trade in principal commodities with all countries, fiscal years, 1930, 1931 and 1932, for imports see Table No. 8, pages 100 to 119 and for exports see Table No. 9, pages 120 to 131.

TRADE WITH THE UNITED KINGDOM

(a) **Analysis of Total Trade.**—The total trade of Canada with the United Kingdom during the year ended March 31, 1932, amounted to \$281,334,603, compared with a similar trade in 1931 of \$370,184,696, and in 1930 of \$472,278,062; the decrease in 1932 compared with the year 1931 amounting to \$88,850,093 or 24·0 per cent, and compared with 1930 to \$190,943,459 or 40·5 per cent. Imports, as also exports, in 1932 show a decrease compared with 1931, the decrease in imports amounting to \$43,125,613 or 28·9 per cent, and in exports to \$45,724,480 or 20·7 per cent. Imports from the United Kingdom in 1932 were valued at \$106,371,779, in 1931 at \$149,497,392, and in 1930 at \$189,179,738; the decrease in 1932 compared with 1931 amounting to \$43,125,613 or 28·9 per cent, and with 1930 to \$82,807,959 or 43·8 per cent; while the total exports from Canada to the United Kingdom in 1932 were valued at \$174,962,824; in 1931 at \$220,687,304, and in 1930 at \$283,098,324; the decrease in 1932 compared with 1931 amounting to \$45,724,480 or 20·8 per cent, and with 1930 to \$108,135,500 or 38·2 per cent. The domestic exports from Canada to the United Kingdom in 1932 were valued at \$174,043,725, in 1931 at \$219,246,499, and in 1930 at \$281,745,965; the decrease in 1932 compared with 1931 amounting to \$45,202,774 or 20·6 per cent, and with 1930 to \$107,702,240 or 38·2 per cent.

(b) **Discrepancy in Canada—United Kingdom Trade.**—There is practically no discrepancy between Canada's imports from the United Kingdom and United Kingdom exports to Canada, when adjustments are made for the large amount of products of British and foreign origin transhipped in bond from the United Kingdom to Canada. This trade is not included in the general exports of the United Kingdom, though it is included in Canada's import figures, and inasmuch as the origin is practically unknown, is credited to the United Kingdom when released for consumption in Canada. In the years 1929 and 1930, when adjustments are made, the United Kingdom exports exceed Canadian imports; in 1929 the excess amounting to about \$13,000,000, and in 1930 to \$12,000,000. This excess trade in these years probably represents United Kingdom products intransit via Canada to other destinations, chiefly the United States, and thus would not appear in Canadian imports.

There is a very marked discrepancy, however, between Canada's exports to the United Kingdom and the United Kingdom imports from Canada, though the discrepancy for 1931 is not so pronounced as in former years, due no doubt to a much smaller quantity of products, especially wheat, being shipped to the United Kingdom via the United States in that year. (For the fiscal year 1932 these shipments amounted to \$44,683,160 compared with \$217,590,205 in 1929)

Canada's declared exports to the United Kingdom do not represent the actual amount of Canadian products received by the United Kingdom from Canada, the British imports being much less than the Canadian exports. The discrepancy is due in large measure to diversion of Canadian grain, especially wheat, from its original destination, the United Kingdom, to other destinations, chiefly continental Europe. This diversion takes place, principally in the movement of Canadian products to the United Kingdom via the United States. If an adjustment is made for this diversion, the revised exports to the United Kingdom would be less and those to continental Europe greater than the declared exports.

In the following Tables Nos. I and II the more important statistics bearing on the problem of the proposed British wheat quota and the amount of imports of wheat into the United Kingdom are assembled:—

Table I.—In the first section of this table are shown total imports of wheat into the United Kingdom for the calendar years 1922 to 1931, with imports from the British Empire and foreign countries respectively, based on the United Kingdom trade returns. The imports from Canada are also shown for the reason that their accuracy has been questioned owing to the possibility of confusion between Canadian and United States wheat in the recording of imports into United Kingdom from North America. The imports of wheat from other principal countries are also shown in this section.

In remaining sections of the table certain figures bearing on the problem just mentioned are quoted. First, imports of wheat into the United Kingdom from the United States (taken from British trade returns) are shown in juxtaposition to the exports of wheat from the United States to the United Kingdom (taken from the trade returns of the United States). The excess of the former of these figures over the latter represents a possible error in the United Kingdom import figures, the United Kingdom crediting the United States with certain wheat of Canadian origin which is shipped via United States.

In the third section of the table, the exports of United States wheat via Canada are shown as indicating the extent of a possible over-statement in the United Kingdom returns of imports from Canada. Inasmuch, however, as Canadian records show for the years 1929 to 1931 that on an average about 15 per cent of United States wheat shipped via Canada to overseas countries is destined to the United Kingdom, estimated figures on this basis are inserted for the years 1922 to 1928, those for 1929 to 1931 being the actual record.

In the final section of the table a recalculated or adjusted figure of imports of wheat into United Kingdom, segregated on the above basis, is shown, indicating the amount received from the British Empire, foreign countries and Canada, and the percentage which these consist of total imports of wheat into the United Kingdom.

Table II.—The non-correspondence between Canadian figures of exports of wheat to the United Kingdom, and the United Kingdom figures of imports from Canada are examined in this table. Canadian exports to the United Kingdom are shown, for the calendar years 1926 to 1931, these being divided into (a) exports via Canadian ports, and (b) exports via the United States. The latter figures are then adjusted on the basis of intransit figures taken from Canadian and United States Government records showing (a) exports to the United Kingdom of re-routed Canadian wheat from United States lake ports via Canada, chiefly the port of Montreal, and (b) exports of Canadian wheat to United Kingdom via United States Atlantic Sea Ports. In a final figure, exports of Canadian wheat via Canadian ports and via United States ports, the latter corrected by the Canadian and United States intransit figures, are shown, in total, together with percentages of what the imports of wheat into United Kingdom from British Empire would be of total United Kingdom imports if the figures thus segregated were substituted for the United Kingdom figures of imports from Canada in Table I.

On the basis of adjusted imports of wheat into the United Kingdom, based on United Kingdom records (see Table I) the average percentage of wheat imported into the United Kingdom from the British Empire of the total imports of wheat for the ten years, 1922 to 1931, was 57.08, compared with 46.12 for British imports. Inasmuch as for the year 1929 and part of 1930 and 1931, the Canadian exports of wheat, due to restricted marketing policy and the depressed condition of the wheat market, were somewhat curtailed in these years, the average percentage from the British Empire for the years 1922 to 1928, would probably be a fairer indication of the amount of wheat imported into the United Kingdom from the British Empire, the average percentage for these years being 62.03, compared with 48.88 for British imports. This adjusted average percentage is a minimum one as there is a possibility that some of the wheat exported from the United States to the United Kingdom may have been diverted on the high seas to other destinations, thereby augmenting the percentage from Canada and the Empire.

On the basis, however, of adjusted exports of wheat from Canada to the United Kingdom (see Table II) the average percentage of total imports of wheat into the United Kingdom from the British Empire of the total imports, for the years 1926 to 1931 was 63.8 compared with 44.4 for British imports. This adjusted average percentage is a maximum one, as records for 1931 show that about 10 per cent of the wheat exported to the United Kingdom via Vancouver, B.C., is diverted to other destinations on the high seas, though practically no diversion occurred in exports to the United Kingdom from Canadian Eastern ports in 1931, thereby reducing slightly the percentages given for the Empire in Table II.

NOTE.—The adjusted figures of wheat imports into United Kingdom from Empire and foreign countries and from Canada, 1922 to 1931, have been computed by adding the difference between the excess of United Kingdom imports of wheat from United States, and United States exports to United Kingdom (Canadian wheat) and the amount of United States wheat shipped to United Kingdom via Canada, to the United Kingdom imports from Empire countries and Canada, and deducting the same amount from United Kingdom imports from foreign countries. That this difference represents Canadian wheat credited to the United States in United Kingdom imports, is borne out by a special compilation made by the United Kingdom showing imports of wheat into the United Kingdom (1) by Country of Origin; (2) Country of Purchase; and (3) Country of Consignment, for the year 1931. In this year, the only year for which statistics are available on this basis, the difference between imports of wheat from Canada based on (1) Origin, and (2) Consignment, (6,246,000 bushels) approximately agrees with the difference between United Kingdom wheat imports from the United States and United States wheat exports to the United Kingdom (6,983,000 bushels).

TABLE II.—CANADA'S DOMESTIC EXPORTS OF WHEAT TO THE UNITED KINGDOM

(Based on Canadian and United States Records)

NOTE.—According to United States intransit figures a very large percentage of the Canadian wheat shown in Canadian trade statistics as exported to the United Kingdom via United States border ports is diverted while intransit via the United States to other destinations, chiefly the continent of Europe; while a considerable amount of this Canadian wheat is also re-routed chiefly via Montreal, and in the re-routing process about 63 per cent of this wheat is diverted from United Kingdom to other destinations, chiefly the continent of Europe. When adjustments are made for these diversions the amount of Canadian wheat exported to the United Kingdom would be approximately, without accounting for diversions of direct shipments on the high seas, as under:—

(d) The figures of re-routed Canadian wheat from United States lake ports via Canada to the United Kingdom in 1929, 1930 and 1931, are the actual records, while those for the three earlier years are estimates based on the average (37 per cent for the years 1929 to 1931).

(c) **Analysis by Groups.**—The decrease in the imports from the United Kingdom, 1931 compared with 1930, amounting to \$43,125,613 or 28.9 per cent, occurred in every one of the nine main groups; while the decrease in domestic exports, amounting to \$45,202,774 or 20.6 per cent, occurred in four of the nine main groups; while five of the nine main groups show an increase. The five main groups in the exports to show increases were: Animals and Animal Products, Chemicals and Allied Products, Fibres, Textiles and Textile Products, Non-Ferrous Metal Products, and Miscellaneous Commodities, the total increases for these groups amounting to \$1,722,898; while the four main groups to show decreases were: Agricultural and Vegetable Products, Wood, Wood Products and Paper, Non-Metallic Mineral Products, and Iron and Its Products, the total decreases for these groups amounting to \$46,925,672. The total value of each of the nine main groups of imports, arranged in order of importance, with decrease, 1932 compared with 1931 was: (1) Fibres, Textiles and Textile Products, \$30,549,937, decrease \$18,657,183 or 37.9 per cent; (2) Agricultural and Vegetable Products, \$30,220,997, decrease \$11,541,790 or 27.6 per cent; (3) Iron and Its Products, \$13,383,622, decrease \$4,685,883 or 26.0 per cent; (4) Non-Metallic Mineral Products, \$10,286,241, decrease \$2,616,231 or 20.3 per cent; (5) Miscellaneous Commodities,

\$7,107,975, decrease \$1,201,720 or 14.5 per cent; (6) Non-Ferrous Metal Products, \$4,284,756, decrease \$2,035,365 or 32.2 per cent; (7) Chemicals and Allied Products, \$4,096,696, decrease \$504,970 or 10.9 per cent; (8) Wood, Wood Products and Paper, \$3,827,024, decrease \$713,780 or 15.8 per cent; and (9) Animals and Animal Products, \$2,614,531, decrease \$1,168,691 or 30.9 per cent. The total value of each of the nine main groups of domestic exports, arranged in order of importance, with increase or decrease, 1932 compared with 1931, was: (1) Agricultural and Vegetable Products, \$98,725,113, decrease \$42,382,940 or 30.0 per cent; (2) Animals and Animal Products, \$32,028,165, increase \$854,550 or 2.7 per cent; (3) Non-Ferrous Metal Products, \$17,266,439, increase \$112,869 or 0.7 per cent; (4) Wood, Wood Products and Paper, \$13,734,973, decrease \$3,615,451 or 20.8 per cent; (5) Iron and Its Products, \$3,798,363, decrease \$274,870 or 6.7 per cent; (6) Chemicals and Allied Products, \$3,130,795, increase \$416,409 or 15.3 per cent; (7) Miscellaneous Commodities \$3,079,234, increase \$1,760 or 0.1 per cent; (8) Fibres, Textiles and Textile Products, \$1,386,235, increase \$337,310 or 32.1 per cent; and (9) Non-Metallic Mineral Products, \$894,408, decrease \$652,411 or 42.1 per cent. For further details respecting Canada's commodity imports and exports to the United Kingdom, with increase or decrease, 1932 compared with 1931, see statistics in the following tables:—

For further information respecting Canada's trade in principal commodities with United Kingdom, fiscal years 1931 and 1932, for imports see Table No. 8, pages 100 to 119 and for exports see Table No. 9, pages 120 to 131.

TRADE WITH THE UNITED STATES

(a) **Analysis of Total Trade.**—The total trade of Canada with the United States for the year ended March 31, 1932, amounted to \$596,037,639, compared with a similar trade in 1931, valued at \$948,330,042, and in 1930 at \$1,384,130,218; the decrease in 1932 compared with 1931 amounting to \$352,292,403 or 37·1 per cent, and with 1930 to \$788,092,579 or 56·9 per cent. Compared with 1931 the imports in 1932 show a decrease of \$232,720,243 or 39·8 per cent, and exports, a decrease of \$119,572,160 or 32·9 per cent. Imports from the United States in 1932 were valued at \$351,686,775; in 1931 at \$584,407,018; and in 1930 at \$847,442,037; the decrease in 1932 compared with 1931 amounting to \$232,720,243 or 39·8 per cent, and with 1930 to \$495,755,262, or 58·5 per cent; while the total exports to the United States in 1932 amounted to \$244,350,864; in 1931 to \$363,923,024, and in 1930 to \$536,688,181; the decrease in 1932 compared with 1931 amounting to \$119,572,160 or 32·9 per cent; and with 1930 to \$292,337,317 or 54·5 per cent. The domestic exports to the United States in 1932 were valued at \$235,186,674; in 1931 at \$349,660,563; and in 1930 at \$515,049,763; the decrease in 1932 compared with 1931 amounting to \$114,473,889 or 32·7 per cent; and with 1930 to \$279,863,089 or 54·3 per cent.

(b) **Discrepancy in Trade Figures.**—In considering the discrepancy between Canada's trade with the United States and the United States trade with Canada, many factors must be noted in arriving at a satisfactory explanation. In the United States, Alaska, Hawaii and Porto Rico are considered as United States territory for trade and other purposes, while in Canada they are considered as separate entities, and consequently adjustments must be made in the trade statistics of the two countries to bring them to a common basis. In the United States, also, raw gold and silver ore, and bullion are not included in the general trade figures, whereas in Canada these non-ferrous metals are included, consequently an adjustment must be made in respect to these metals. When these adjustments are made in the exports from Canada to the United States it will be found that the discrepancy in the movement of products from Canada to the United States, as recorded in the trade of the two countries, is very small indeed, amounting to less than 2 per cent of the total in 1928 and 1929, and about 3·7 per cent in 1930, and 6 per cent in 1931, as indicated in the following table:—

MOVEMENT OF GOODS FROM CANADA TO THE UNITED STATES

(Calendar Years, 1928 to 1931)

Calendar Years	Imports into United States from Canada	Exports from Canada to United States (c)	Discrepancy: In favour of Canada (a) In favour of United States (b)

(c) Canadian figures adjusted by adding to the exports to United States, exports to Alaska, Hawaii and Porto Rico, and deducting exports of raw gold, silver ore and silver bullion.

There is, however, a considerable discrepancy between the Canadian imports from the United States and United States exports to Canada, even when adjustments are made in Canada's imports. This is largely due to United States recording in their exports to Canada, grains, mainly wheat, which are only intransit via Canada to overseas countries. The United States Department of Commerce is aware that a large percentage of the exports shown as shipped to Canada are really only intransit to overseas countries via Canada. On pages 31 and 32 of Trade Information Bulletin No. 602 *re* "Foreign Trade of the United States, 1928" the Bulletin states that "the figures of trade by continents as originally published are somewhat misleading in the case of exports to North America and to Europe. This is due to the fact that especially during recent years, large quantities of grain have been shipped through Canada to foreign countries, almost exclusively to Europe, which, because the exporter at the time of shipment does not know the final destination, are credited to Canada." Such shipments do not appear in the import or export trade of Canada, being considered as intransit trade. The amount of these grain shipments to Canada has varied in recent years, in 1927 amounting to \$113,900,000 and in 1931 to \$10,200,000. It will appear from the statistics in the following table that when these grain shipments are eliminated from the United States exports to Canada, the revised United States exports to Canada and Canada's adjusted imports from the United States agree fairly well. In fact, the discrepancy between the two sets of figures is less than 2 per cent.

MOVEMENT OF GOODS FROM THE UNITED STATES TO CANADA

(Calendar Years, 1928 to 1931)

Calendar Years	Total Unrevised Exports from United States to Canada	Less United States Exports of Grains to Canada	Total Revised Exports from United States to Canada	Canada's Adjusted Imports from United States (c)	Discrepancy: In favour of Canada (a) In favour of United States (b)
	\$	\$	\$	\$	\$
1928.....	914,700,000	82,800,000	831,900,000	825,100,000	(b) 6,800,000
1929.....	948,500,000	49,400,000	899,100,000	893,200,000	(b) 5,900,000
1930.....	659,100,000	15,100,000	644,100,000	653,500,000	(a) 9,500,000
1931.....	396,400,000	10,200,000	386,200,000	393,700,000	(a) 7,500,000

(c) Canadian figures adjusted by adding to the imports from United States, imports from Alaska, Hawaii and Porto Rico and deducting imports of silver bullion.

Analysis by Groups.—The decrease in the imports from the United States, amounting to \$232,720,243 or 39·8 per cent, occurred in each of the nine main groups, while the decrease in the exports of domestic merchandise amounting to \$114,473,889 or 32·7 per cent, also occurred in each of the nine main groups. The total value of each of the nine main groups of imports, arranged in order of importance, with decrease 1932, compared with 1931, was: (1) Iron and Its Products, \$81,005,384, decrease \$86,669,335 or 51·7 per cent; (2) Non-Metallic Mineral Products, \$77,871,155, decrease \$41,113,263 or 34·6 per cent; (3) Agricultural and Vegetable Products, \$44,578,848, decrease \$23,001,533 or 34·0 per cent;

(4) Fibres, Textiles and Textile Products, \$30,944,027, decrease \$17,300,392 or 35·8 per cent; (5) Miscellaneous Commodities, \$30,131,580, decrease \$15,136,929 or 33·4 per cent; (6) Non-Ferrous Metal Products, \$27,026,602, decrease \$22,134,515 or 45·0 per cent; (7) Wood, Wood Products and Paper, \$25,584,827, decrease \$12,553,201 or 32·9 per cent; (8) Chemicals and Allied Products, \$20,359,822, decrease \$2,842,170 or 12·2 per cent; and (9) Animals and Animal Products, \$14,184,530, decrease \$11,968,905 or 45·8 per cent. The total value of each of the nine main groups of domestic exports, arranged in order of importance, with decrease, 1932 compared with 1931, was: (1) Wood, Wood Products and Paper, \$140,473,352, decrease \$48,476,056 or 25·6 per cent; (2) Non-Ferrous Metal Products, \$36,176,490, decrease \$22,659,193 or 38·5 per cent; (3) Animals and Animal Products, \$22,342,515, decrease \$11,725,893 or 34·4 per cent; (4) Agricultural and Vegetable Products, \$11,035,258, decrease \$16,609,116 or 60·1 per cent; (5) Non-Metallic Mineral Products, \$8,233,323, decrease \$5,021,935 or 37·8 per cent; (6) Miscellaneous Commodities, \$7,960,570, decrease \$4,398,520 or 35·6 per cent; (7) Chemicals and Allied Products, \$4,123,489, decrease \$2,238,202 or 35·2 per cent; (8) Iron and Its Products, \$3,097,883, decrease \$3,020,237 or 49·3 per cent; and (9) Fibres, Textiles and Textile Products, \$1,743,794, decrease \$324,737 or 15·7 per cent. For further details respecting Canada's commodity imports from and exports to the United States, with increases or decreases, 1932 compared with 1931, see statistics in the following table:—

CANADA'S PRINCIPAL IMPORTS FROM AND EXPORTS TO UNITED STATES

(Year ended March 31, 1932, compared with 1931)

For further information respecting Canada's trade in principal commodities with United States, fiscal years 1931 and 1932, for imports see Table No. 8, pages 100 to 119 and for exports see Table No. 9, pages 120 to 131.

Trade With Other Countries.—The British Preferential Tariff enacted in 1897, which granted a trade preference to the products and manufactures of the United Kingdom and reciprocating Dominions and Possessions of 12½ per cent from April 23, 1897, which was increased to 25 per cent from June 30, 1898, and to 33½ per cent from June 30, 1900, and the New Customs Tariff Act, 1907, which continued the preferential policy; as well as trade treaties and agreements, negotiated with British and Foreign Countries, have had the effect of stimulating Canada's external trade. When the British preference became effective in 1897 Canada's total imports from the United Kingdom in that year amounted to only \$29,401,000, compared with an import in 1887 valued at \$44,741,000, and in 1873 at \$67,997,000, the decrease in 1897 compared with 1887, amounting to \$15,340,000 and with 1873 to \$38,596,000. From 1873 to 1897 imports from the United Kingdom decreased \$38,596,000 or 56·7 per cent, while from 1897 to 1932 they increased \$76,971,000 or 261·8 per cent. The British Preferential Tariff was no doubt largely responsible for the increase in imports from the United Kingdom as well as from other parts of the Empire. By reference to the statistics in the following table giving "Trade of Canada with the British Empire and Foreign Countries" it will be noted that in the fiscal year 1896, imports from "Other British Empire," i.e., British Empire, except the United Kingdom, amounted to \$2,389,000, in 1906 to \$14,606,000, in 1916 to \$27,826,000, in 1926 to \$45,089,000, and in 1932 to \$41,440,000; while domestic exports to the "Other British Empire" in 1896 were valued at \$4,048,000, in 1906 at \$10,965,000, in 1916 at \$30,677,000, in 1926 at \$90,330,000, and in 1932 at \$44,913,000. During the same years the imports from "Other Foreign Countries," i.e., Foreign Countries, except the United States, were: in 1896, \$16,619,000, in 1906, \$30,694,000, in 1916, \$32,091,000, in 1926, \$109,890,000, and in 1932, \$79,005,000; while domestic exports to "Other Foreign Countries" were: in 1896, \$5,152,000, in 1906, \$13,516,000, in 1916, \$57,974,000, in 1926, \$241,800,000, and in 1932, \$122,201,000. From 1911 to 1932 imports from "Other British Empire" increased \$21,907,000 or 112·2 per cent, and from "Other Foreign Countries," \$31,572,000 or 66·6 per cent, while the domestic exports to "Other British Empire," from 1911 to 1932, increased \$28,102,000 or 167·2 per cent and to "Other Foreign Countries" \$100,968,000 or 475·5 per cent. The decrease in the value of imports and exports in 1932 compared with the past four or five years was practically due to the serious decline in commodity prices in 1931-32, which was world-wide. On a quantity basis, the decrease was not so marked, indicating that it was largely a price and not a quantity decline.

CONDENSED PRELIMINARY TRADE REPORT

25

With further reference to the trade of Canada with countries other than the United Kingdom and the United States, attention is directed to Tables Nos 10 to 36, pages 132 to 165, giving the trade of Canada in leading commodities with 81 British and Foreign Countries for the fiscal years 1931 and 1932.

The British Preference.—Since the inauguration of the British preference in 1897 statistics giving the average ad valorem rate of duty on dutiable imports into Canada from the United Kingdom and the United States, respectively, have been frequently in use, the average rate of duty being lower on dutiable imports from the United States than from the United Kingdom. It must be remembered, however, in this connection that the dutiable imports from the United Kingdom consist very largely of highly manufactured commodities, and necessarily are subject to high rates of duty, whereas the dutiable imports from the United States consist, in a large measure, of semi-manufactured commodities for further processing in Canadian industries, and consequently are admitted at a reasonably low rate of duty.

Another factor in Canada's imports from the United Kingdom, compared with those from the United States, which affects the rates of duty for the two countries and which is frequently ignored, is the trade of alcoholic liquors, which are imported in large volume from the United Kingdom, but in very small volume from the United States. Imports of tobacco should also be added, as in almost all countries alcoholic liquors and tobacco are subject to extraordinary high rates of duty, the principle of tariff makers in dealing with these commodities being not so much protection as the raising of revenue or the discouraging of consumption. In recent years the Canadian Government has considerably expanded the list of commodities which are admitted free under the preferential tariff, but which are dutiable under the intermediate and general tariffs. In 1931 the imports from the United Kingdom free under the preferential tariff were valued at \$18,288,442. The statistics in the following tables present (1) Imports without the adjustments of these items, and (2) Imports with the adjustments. It will be noted from statement No. 2 that the ad valorem rates of duty on dutiable imports from the United Kingdom, after adjustments have been made for the years 1922 to 1931, are lower than those for the United States, and that for the year 1931 the average ad valorem rate of duty for the United Kingdom was 15.65 per cent compared with 24.73 per cent for the United States, indicating an advantage under the preference of 9.08 per cent.

1.—CANADA'S DUTIABLE IMPORTS FROM THE UNITED KINGDOM AND THE UNITED STATES; WITH AMOUNT OF DUTY COLLECTED THEREON, AND AVERAGE AD VALOREM RATE OF DUTY.

In addition to the above data on the preference a special memorandum has been compiled setting forth in concrete form for the fiscal year 1931 the actual benefits of the Canadian preference to Empire countries. It will be noted from this memorandum, which follows, that the average ad valorem rate of duty on imports from the Empire under the British preferential tariff was 13.5 per cent, and that if the Treaty or General tariff rates had been applicable the average ad valorem rates of duty would have been 30.2 and 34.7 per cent respectively. The full benefits of the Canadian preference to each unit of the Empire are also set out in this memorandum.

CANADA'S TOTAL IMPORTS FROM EMPIRE COUNTRIES UNDER THE PREFERENTIAL TARIFF WITH AMOUNT OF DUTY COLLECTED THEREON AND AVERAGE AD VAL. RATE OF DUTY; ALSO ESTIMATED AMOUNT OF DUTY THAT WOULD HAVE BEEN COLLECTED AND AVERAGE AD VAL. RATE OF DUTY IF THE TREATY OR GENERAL RATES HAD BEEN APPLICABLE

(Year ended March 31, 1931)

(a) Under sec. 8 of the Canadian Customs Tariff, fish and other products of the fisheries of Newfoundland may be imported into Canada free of Customs duty, such products being dutiable from other countries. In this memorandum such imports have been included under free imports under the Preferential Tariff.

Relation Between Trade in Raw and Manufactured Products.—Canada was not engaged to any great extent in manufacturing processes for some years after Confederation, and consequently her imports consisted very largely of manufactured goods and her exports of raw and semi-manufactured products. Since the opening of the twentieth century, a conspicuous change in the character of Canada's imports and exports has developed, a large percentage of the imports consisting of raw and semi-manufactured products for use in Canadian manufacturing industries, and the exports consisting to a considerable degree of products which have undergone some process of manufacture. Canada, during this period, has passed through much the same stages of development in her economic life as did the United States from 1870 to 1900. From 1870 to 1900 the imports of raw materials into the United States increased from 25.2 to 44.0 per cent of the total imports; and fully manufactured products decreased from 62.1 to 40.2 per cent; while exports of raw materials from the United States during the same interval decreased from 67.7 to 40.2 per cent of the total exports, and fully manufactured products increased from 28.6 to 48.6 per cent. Statistics for 1931 show a further improvement, though the percentage of imports of raw materials is less and of manufactured products more than for any year since 1924. Compared with 1900 the 1931 statistics show that imports of raw materials into the United States increased from 44.0 per cent to 45.8 per cent of the total imports, and exports decreased from 40.2 to 29.1 per cent of the total exports, whereas imports of fully manufactured products decreased from 40.2 to 35.5 per cent and exports increased from 48.6 to 57.6 per cent. Compared with 1930 the United States statistics for 1931 indicate a decline in the percentage of raw materials imported, but an increase in the percentage exported, a decrease in the percentage of semi-manufactured products imported and exported, while the imports of manufactured products in 1931 show an increase over 1930, and the exports a decrease.

Canada, however, has not made as great progress as the United States in increasing imports of raw materials and exports of manufactured products and curtailing exports of raw materials and imports of manufactured products, yet she has made some progress in this respect. From 1914 to 1931 the value of Canada's imports of raw materials increased from \$135,200,000 to \$216,500,000 or 60.1 per cent, while the domestic exports increased from \$272,600,000 to \$305,200,000 or 11.9 per cent. During this period the percentage of imports of raw materials of the total imports increased from 21.8 to 23.9 per cent, while the exports of raw materials of the total domestic exports decreased from 63.2 to 38.2 per cent. In 1931 the percentage of imports of raw materials of the total imports was less than for any year for the past ten years, except for the years 1929 and 1930, while the percentage of exports of raw materials of the total domestic exports was also less than for any of the past ten years. Canada's imports of fully manufactured products, from 1914 to 1931 increased from \$426,300,000 to \$621,400,000 or 45.8 per cent, while the domestic exports of fully manufactured products during the same period increased from \$115,300,000 to \$352,100,000 or 205.4 per cent. The percentage of the imports of fully manufactured products, from 1914 to 1931 decreased from 68.9 per cent to 68.5 per cent, while the percentage of exports of fully manufactured goods increased from 26.7 to 44.0 per cent. In 1931 the percentage of imports of fully manufactured products of the total imports was greater than for any of the past twelve years, except for the years 1929 and 1930, while the exports of fully manufactured products of the total domestic exports were also more than for any year for the past eleven years. The decrease in the percentage of exports of raw materials and the increase in the percentage of fully manufactured goods was attributable to the drastic decline in commodity prices, the prices for raw materials falling much more rapidly than those for manufactured goods.

In Canada, grains (chiefly wheat) and in the United States, raw cotton, grains (principally wheat) and raw tobacco are the leading commodities which comprise the bulk of the exports of raw materials. It is of interest to note the results in Canada and the United States when certain staple raw materials, of farm origin, which are reproducible annually, are eliminated; such as grains, fresh fruits and vegetables, seeds and raw tobacco, for both countries, as also raw cotton for the United States. The results, for the years 1900 to 1931, are set forth in the following table:—

RAW MATERIALS EXPORTED FROM CANADA AND THE UNITED STATES, 1900 TO 1931

(Values in Millions of Dollars)

1931.....	199.6	25.0	104.6	13.1	304.3	10.0	424.6	14.0	154.6	5.1

According to the statistics in the above table Canadian and the United States exports of "Other raw materials," from 1900 to 1931 (i.e., total exports of raw materials less certain raw materials which are reproducible annually), increased as follows: Canada from \$48,500,000 to \$104,600,000, or 115.7 per cent, and the United States from \$82,700,000 to \$154,600,000, or 86.9 per cent. In the case of Canada the percentage of the exports of "Other raw materials" of the total domestic exports, from 1900 to 1931, decreased from 28.8 to 13.1 per cent and in the case of the United States from 6.0 to 5.1 per cent.

It will be observed from the statistics in the following table, showing "Canada's Imports and Exports by Leading Countries, according to Degree of Manufacture," fiscal year 1931, that Canada's imports from those countries with highly developed manufacturing industries consist of manufactured products, and her exports to those countries are made up largely of raw and semi-manufactured products; while on the other hand Canada's trade with countries whose industries are not so highly developed consist chiefly, in the case of imports, of raw and semi-manufactured products and in the case of exports, of manufactured products.

A further analysis of the statistics in the foregoing table, relative to Canada's imports and exports according to degree of manufacture, indicates: (1) that 88·8 per cent of Canada's imports from Europe in 1931 consisted of fully manufactured goods, 8·0 per cent of raw materials and 3·2 per cent of semi-manufactured products; while 61·9 per cent of her exports to Europe was made up of raw materials, 29·4 per cent of fully manufactured goods and 8·7 per cent of semi-manufactured products; the proportion of the trade with the United Kingdom being, imports: fully manufactured goods 89·5 per cent, semi-manufactured products 7·3 per cent, and raw materials 3·2 per cent; and exports: raw materials 60·8 per cent, fully manufactured goods 30·3 per cent and semi-manufactured products 8·9 per cent; (2) that 64·7 per cent of the imports from North America consisted of fully manufactured goods, 27·9 per cent of raw materials and 7·4 per cent of semi-manufactured products; while 50·8 per cent of the exports to North America comprised fully manufactured goods, 24·8 per cent semi-manufactured products, and 24·4 per cent raw materials, the proportion of the trade with the United States being: fully manufactured goods 66·1 per cent, raw materials 27·8 per cent and semi-manufactured products 6·1 per cent; and exports: fully manufactured goods 46·0 per cent, semi-manufactured products 27·9 per cent, and raw materials 26·1 per cent; (3) that 77·0 per cent of the imports from South America was made up of raw materials, 18·0 per cent of semi-manufactured products and 5·0 per cent of fully manufactured goods, while 87·6 per cent of the exports to that continent consisted of fully manufactured goods, 10·3 per cent of raw materials and 2·1 per cent of semi-manufactured products; (4) that 72·0 per cent of the imports from Asia were fully manufactured goods, 19·0 per cent raw materials and 9·0 per cent semi-manufactured products; while 38·7 per cent of the exports to Asia consisted of semi-manufactured goods, 33·8 per cent of fully manufactured products, and 27·5 per cent of raw materials; (5) that the proportion of the trade with Oceania was: imports: fully manufactured goods 52·4 per cent, semi-manufactured products 36·6 per cent, and raw materials 11·0 per cent; and exports: fully manufactured goods 91·5 per cent, semi-manufactured products 5·4 per cent, and raw materials 3·1 per cent; and (6) that the proportion of the imports from Africa was: semi-manufactured products 61·8 per cent, raw materials 35·0 per cent, and fully manufactured goods 3·2 per cent; while the proportion of the exports to Africa was: fully manufactured goods 80·4 per cent, raw materials 16·9 per cent, and semi-manufactured products 2·7 per cent.

The following table shows how Canada's imports and exports, analysed into the three categories of raw materials, partly manufactured goods, and fully or chiefly manufactured goods, are distributed among the United Kingdom, other British Empire countries, the United States and other foreign countries:—

CANADA'S IMPORTS AND EXPORTS, ACCORDING TO DEGREE OF MANUFACTURE, 1928, 1929, 1930 AND 1931, DISTINGUISHING IMPORTS FROM AND EXPORTS TO THE BRITISH EMPIRE AND FOREIGN COUNTRIES

Seasonal Fluctuations.—The seasonal movement of Canada's external trade during the fiscal year 1932 presents no abnormal tendencies except a general decrease in each month compared with 1926-27 to 1930-31, reflecting the general world depression and decline in commodity prices. The table of "Canada's Monthly Imports and Exports" indicates that the imports for the summer and early fall months are usually greater than for the other months of the year, except the month of March. In 1931-32 the imports showed the usual seasonal trend, reaching the highest peak during the spring and summer months, declining slightly in September, with an upward trend in October and November, followed by the usual slump during the winter months. Exports, however, as a result of the influence of agricultural products, especially wheat, reach a low point during the summer months, rise to a peak during the autumn, gradually decline during the winter months, and with the opening of navigation on the St. Lawrence in the spring, show an upward tendency. During 1931-32 the seasonal trend for exports was not so marked as in other years, due to falling off in the exports of grains, especially wheat. The decrease, however, was largely a price decrease, for in the case of wheat the quantity exported decreased 11.9 per cent, but the value decreased 34.8 per cent. The monthly variations, however, are not so marked as the lack of direct

shipping facilities via the St. Lawrence in winter would indicate. The very large increase in recent years of the exports of pulp and paper and other manufactured products, the export of which is not seasonal but almost constant, has had the effect of reducing the proportionate seasonal fluctuations of Canada's total exports. The trade figures for March in each year are usually greater for imports than for any other month, while in the case of exports they are not, as a rule, as large as those for the spring and fall months, when large quantities of grains, especially wheat, are being shipped. The totals for March are always greater than those for April. March figures must include all entries at all ports to the close of the fiscal year (March 31). In all other months the records are closed at Ottawa on the last day of the month. Late import and export entries (which in the case of the great, but distant, port of Vancouver, may cover four or five days' business at the end of each month) are regularly included in totals for the succeeding month. April totals include nothing for March, while they are short some amounts carried forward into May.

Trade by Continents.—During the fiscal year 1932 Canada sold more goods to North America than to any other continent, her sales amounting to \$266,800,000, compared with \$251,200,000 to the continent of Europe, while her purchases from North America amounted to \$369,300,000, contrasted with purchases from Europe valued at \$157,000,000. During 1932 the continents of North America and Europe took 89.9 per cent of the Dominion's total exports as compared with 88.1 per cent in 1931 and 89.1 per cent in 1928. The proportion of products shipped to North America in 1932 was 46.3 per cent, compared with 49.4 per cent in 1931 and 42.2 per cent in 1928; while the proportion sent to Europe in 1932 was 43.6 per cent, compared with 38.7 per cent in 1931 and 46.9 per cent in 1928. From 1928 to 1932 the proportion of Canada's exports to the United States increased from 38.9 per cent to 40.8 per cent, while the proportion to other North America increased from 3.3 to 5.5 per cent; while the proportion exported to the United Kingdom decreased from 33.4 to 30.2 per cent, and to other Europe from 13.5 to 13.4 per cent. The continents of North America and Europe in 1932 furnished Canada with 90.9 per cent of her total imports, compared with 91.8 per cent in 1931 and 92.2 per cent in 1928. The proportion of goods received from North America in 1932 was 63.8 per cent compared with 67.1 per cent in 1931 and 67.7 per cent in 1928, while the proportion received from Europe was 27.1 per cent in 1932; 24.7 per cent in 1931, and 24.5 per cent in 1928. From 1928 to 1932 the proportion of Canada's imports furnished by the United States decreased from 64.9 to 60.8 per cent and from other North America increased from 2.8 to 3.0 per cent; while the proportion furnished by the United Kingdom increased from 16.8 to 18.4 per cent, and from other Europe from 7.7 to 8.7 per cent. Canada's sales in 1932 to every continent were less than for any year from 1928 to 1931. The decline in the exports of wheat and flour to Europe and the Orient, due to lower export prices, was chiefly responsible for the decrease in

Canada's exports to the continents of Europe and Asia. Canada's purchases from the continents of Europe, North America, South America, Asia and Oceania were less in 1932 than for any year from 1928 to 1931, while those from Africa were greater in 1932 than for the years 1928 to 1930, but less than for the year 1931, while her sales to each of these continents were less in 1932 than for the years 1928 to 1931. From 1928 to 1932 imports from South America decreased from \$32,400,000 to \$17,300,000; from Asia, from \$32,400,000 to \$18,800,000; from Oceania from \$18,300,000 to \$9,500,000; while imports from Africa increased from \$4,000,000 to \$6,600,000; whereas exports to South America decreased from \$27,400,000 to \$8,900,000; to Asia, from \$65,800,000 to \$28,300,000; to Oceania, from \$26,300,000 to \$10,200,000; and to Africa, from \$14,900,000 to \$10,900,000. For further details respecting Canada's trade, by Continents, 1928 to 1932, see statistics in the following table:—

TRADE OF CANADA BY CONTINENTS, 1927 TO 1932

Imports by Principal Countries.—Imports into Canada in 1932 compared with 1931 show decreases in thirty of the thirty-five leading countries, the decreases for the thirty countries exceeded the increases for the five countries by \$316,089,989. Of the total decrease in imports in 1932, amounting to \$328,108,791 or 36.2 per cent, the British Empire accounted for \$57,131,958 or 17.4 per cent of the total, and foreign countries for \$270,976,833 or 82.6 per cent. The principal countries to show decreases were: United States \$232,720,243; United Kingdom \$43,125,613; New Zealand, \$5,591,022; France, \$5,433,961; Germany, \$4,539,167; Argentina, \$4,131,334; Belgium, \$3,372,298; Japan, \$3,352,566; British India, \$3,326,980; Switzerland, \$1,796,946; Barbados, \$1,591,073; Netherlands, \$1,459,163; Cuba, \$1,427,556; Sweden, \$1,157,981; Ceylon, \$1,134,929; China, \$1,085,256; British West Indies, Other, \$1,026,071; Peru, \$1,019,935; and Newfoundland, \$1,017,880; while the following countries show increases: Australia, \$1,080,048; British South Africa, \$993,641; Trinidad and Tobago, \$803,895; and British Guiana, \$253,765. The statistics presented in the following table re "Canada's Imports from Thirty-Five Leading Countries, 1932" indicate that the United States and the United Kingdom supplied Canada with 79.2 per cent of her total imports. The United States since 1882 has supplied the Dominion continuously, year by year, with the largest proportion of its imports, amounting to 60.8 per cent in 1932 compared with 64.5 per cent in 1931. The United Kingdom comes next in order of importance by a very

wide margin, supplying Canada with 18.4 per cent of her total imports in 1932, compared with 16.5 per cent in 1931. With reference to supplies from other countries, France has occupied third place for the past four years, as well as for the year 1922, while Germany has occupied fourth place in the Dominion's imports for the past four years, though in 1922 she was in eighteenth place. Japan has occupied fifth place during the past two years, having moved up from seventh place in 1930; Australia is in seventh place, having moved up from sixteenth place in 1931; while Belgium and British India have moved down a point or two in 1932, and Argentina has moved from eighth place in 1930 down to twenty-first place in 1932. New Zealand in 1932 was in twenty-ninth place, having moved down from tenth place in 1931 and fifth place in the year 1930. In the year 1922 imports from New Zealand were valued at \$1,784,000, by 1930 they had increased to \$16,283,000, in 1931 they had declined to \$6,671,000, and in 1932 to \$1,080,000, the whole decline practically occurred in the imports of butter, which declined in value from \$13,620,000 in 1930 to \$17,000 in 1932.

A survey indicates, even when adjustments are made in the 1932 imports to account for the drastic decline in import commodity prices, that while there has been a decline in the volume of Canada's imports, the decline is largely one of price than of quantity. On a quantitative basis the decline, 1932 compared with 1931, was 24.5 per cent, but on a declared value basis it was 36.2 per cent. See remarks on "Fluctuation in Import Trade, 1932 compared with 1931," page 51.

In 1868, 89.9 per cent of Canada's imports was obtained from the United Kingdom and United States, proportions being: United Kingdom 56.1 per cent; United States 33.8 per cent. In 1900, 84.9 per cent of the Dominion's imports was furnished by the same two countries, the proportions being: United Kingdom, 25.7 per cent; United States, 59.2 per cent; whereas in 1932, 79.2 per cent of Canada's total imports came from the United Kingdom and the United States, the proportion for each being: United Kingdom 18.4 per cent, United States 60.8 per cent. From 1868 to 1932 the proportion of the imports into Canada from the United Kingdom fell from 56.1 to 18.4 per cent of the total, while the proportion from the United States rose from 33.8 to 60.8 per cent. The proportionate loss in imports from the United Kingdom, 1868 to 1932, amounted to 37.7 per cent of the total, the United States absorbing 27.0 per cent and Other Countries 10.7 per cent of this amount. If the United Kingdom, from 1868 to 1932 had been able to hold her proportion of Canada's import trade, imports from the United Kingdom in 1932 would have been valued at \$324,541,000, compared with an import from the United States valued at \$195,534,000, and Other Countries at \$58,429,000. As Canada developed industrially she had to go afield for certain raw materials, such as cotton, rubber, fibres, etc., and semi-manufactured products, for her expanding manufacturing industries, which could not be obtained directly from the United Kingdom, and consequently, it was largely due to her industrial expansion that the proportion of Canada's imports from the United Kingdom fell off.

The proportion of imports from Other Countries in 1868 amounted to 10.1 per cent; in 1900 to 15.1 per cent; 1930 to 16.9 per cent, in 1931 to 19.0 per cent, and in 1932 to 20.8 per cent. The imports into Canada from the United Kingdom, the United States and Other Countries with proportions received from each during the years 1868, 1900, 1930, 1931 and 1932, were:—

Countries	1868		1900		1930		1931		1932	
	Value in Thou- sands of Dollars	Per cent of Total	Value in Thou- sands of Dollars	Per cent of Total	Value in Thou- sands of Dollars	Per cent of Total	Value in Thou- sands of Dollars	Per cent of Total	Value in Thou- sands of Dollars	Per cent of Total

Exports to Principal Countries.—Canada's domestic exports during the fiscal year, 1932, compared with similar export trade in 1931 show a decrease of \$223,398,365 or 27.9 per cent. Decreases occurred in thirty-six of the forty principal countries; increases in only four. The decreases in the exports to the thirty-six countries which had decreases exceeded the increases for the four countries which had increases by \$209,048,552. The British Empire accounted for \$73,908,009 or 33.1 per cent of the total decrease in the domestic exports, 1932 compared with 1931, and foreign countries for \$149,490,356 or 66.9 per cent. The principal countries to show decreases were: United States, \$114,473,889; United Kingdom, \$45,202,774; Italy, \$10,286,995; New Zealand, \$8,963,750; Argentina, \$5,663,059; Newfoundland, \$4,056,785; British India, \$3,915,528; Greece, \$3,230,210; China, \$3,214,057; Germany, \$2,536,980; Japan, \$2,403,275; St. Pierre and Miquelon, \$2,362,360; British South Africa, \$1,885,444; British West Indies, Other, \$1,875,533; Brazil, \$1,819,713; Australia, \$1,400,726; Cuba, \$1,230,427; Trinidad and Tobago, \$1,138,433; and Jamaica, \$1,114,695; while the chief countries to show increases were: France, \$4,668,563; Netherlands, \$3,024,604; and Denmark, \$271,188.

An analysis of Canada's total domestic exports by countries, 1932, demonstrates that the increases or decreases compared with 1931 occurred chiefly in the exports to those countries which purchase large quantities of grains and farinaceous products from Canada. The statistics in the following table giving Canada's total exports to leading grain and farinaceous

products importing-countries, 1931 and 1932, contrasted with exports, when exports of grains and farinaceous products are eliminated in each year, indicate that the exports of "Other Commodities" were fairly well maintained. When adjustments are made in the 1932 exports to account for the drastic decline in export commodity prices, it will be found that, while there has been a general decline in the volume of Canada's exports, the decline is largely one of price than of quantity. On a volume basis, 1932 compared with 1931, Canada's exports decline 12.6 per cent, while on a declared value basis the decline was 27.9 per cent. See remarks on "Fluctuation in Export Trade, 1932 compared with 1931," page 59.

It will be noted by reference to the statistics in the following table re "Canada's Domestic Exports to Forty Leading Countries, 1932" that the United States and the United Kingdom took 71.0 per cent of the Dominion's exports, the proportion for each being: United States 40.8 per cent; the United Kingdom, 30.2 per cent. The United States has occupied first place in Canadian export trade during the past six years, and the United Kingdom second place, though the United Kingdom was in first place in 1926. Of the other leading markets for Canadian products, France occupied third place in 1932, being in sixth place in 1931, and ninth in 1930; while Japan has moved from third place in 1930 and 1931 into fourth place in 1932. Belgium has moved down to fifth place, being in fourth place in 1931; Netherlands has moved up from eleventh place last year to sixth place this year; while Germany is in seventh position, as last year. St. Pierre and Miquelon has moved into eighth place, from nine place last year; British South Africa from twelfth into ninth place; Newfoundland occupied tenth place, as last year; China has moved up from fourteenth to eleventh place; and Australia from sixteenth to twelfth position.

In the fiscal year 1868 the exports to the United Kingdom and the United States combined represented 89.2 per cent of the total domestic exports, the proportions being: United Kingdom 36.9 per cent; United States 52.3 per cent. In 1900 similar exports to the United Kingdom and the United States were 91.3 per cent of the total domestic exports, the proportions being: United Kingdom 57.1 per cent; United States 34.2 per cent; while for the year 1932 the domestic exports from Canada to the same two countries represented 71.0 per cent, the proportion for each being: United Kingdom 30.2 per cent compared with 27.4 in 1931, and the United States 40.8 per cent compared with 43.7 per cent in 1931. From 1868 to 1900 Canada's domestic exports to the United Kingdom increased from 36.9 to 57.1 per cent of the total exports, while those to the United States decreased from 52.3 to 34.2 per cent; whereas from 1900 to 1931 domestic exports to the United Kingdom decreased from 57.1 to 30.2 per cent of the total exports and those to the United States increased from 34.2

to 40·8 per cent. The proportion of the exports to "Other Countries" was as follows: 1868, 10·8 per cent; 1900, 8·7 per cent; 1930, 28·9 per cent; 1931, 28·9 per cent; and in 1932, 29·0 per cent. The domestic exports of the United Kingdom, the United States and Other Countries with proportions for each during the years 1868, 1900, 1930 and 1931 were:—

Country	1868		1900		1930		1931		1932	
	Value in Thousands of Dollars	% of Total	Value in Thousands of Dollars	% of Total	Value in Thousands of Dollars	% of Total	Value in Thousands of Dollars	% of Total	Value in Thousands of Dollars	% of Total
United Kingdom.....	17,906	36·9	96,563	57·1	281,838	25·2	219,246	27·4	174,044	30·2

The increase in Canada's domestic exports to "Other Countries" from 1868 to 1900 was \$9,164,000 or 174 per cent, but from 1900 to 1932 it was \$152,700,000 or 1,059·4 per cent. During 1932 the exports to Other Countries, amounting to \$167,100,000, were distributed by continents as follows: Europe, except United Kingdom, \$77,200,000; North America, except United States, \$31,600,000; South America, \$8,900,000; Asia, \$28,300,000; Oceania, \$10,200,000; and Africa, \$10,900,000.

Trade Balances.—There have been marked changes in Canada's trade balances with the leading commercial countries of the world in recent years. In 1914 Canada had a "favourable" trade balance with Europe, Oceania and Africa, but an "unfavourable" balance with North and South America and with Asia, but in 1932 she had a "favourable" balance with every continent except the continents of North and South America. Canada had a "favourable" trade balance with Europe in 1914 of \$65,032,000, which had increased to \$426,719,000 in 1926, but which had declined to \$95,368,000 in 1932. This decline in Canada's "favourable" trade balance with Europe was largely brought about by falling off in her exports of grains, particularly wheat, due chiefly to lower export prices. From 1914 to 1932 the number of countries in Europe with which Canada had a "favourable" trade balance had increased from seven to fifteen, compared with twelve last year. The only European countries of importance in 1932 with which the trade balance was "unfavourable" were Czecho-Slovakia, Germany and Switzerland. From 1914 to 1932 the Dominion's annual credit balance, with the United Kingdom decreased from \$90,252,000 to \$68,591,000, with Germany the debit balance of \$10,152,000 decreased to \$1,142,000; with Belgium from a credit balance of \$336,000 to \$9,131,000; with Italy from a debit balance of \$1,435,000 to a credit balance of \$75,000; with Greece from a debit balance of \$433,000 to a credit balance of \$2,307,000; with the Netherlands from a credit balance of \$2,494,000 to \$7,731,000; with Denmark from a credit balance of \$525,000 to \$3,768,000; and with Sweden from a debit balance of \$426,000 to a credit balance of \$1,609,000. In 1914 Canada had a debit balance with France of \$10,466,000, which was changed to a credit balance of \$4,480,000 in 1932, while the debit balance with Switzerland decreased during the same period from \$4,268,000 to \$3,392,000. These trade balances with European countries do not represent the true situation, as a very large quantity of the grain, especially wheat, shown in Canadian export statistics as for the United Kingdom is diverted from its original destination, the United Kingdom to other destinations. As a result of this diversion, the credit balance with the United Kingdom would be materially reduced and the balances with other European countries increased by a corresponding amount.

Canada's trade balance with the continent of North America has been unfavourable since 1882, the debit balance with the United States being responsible for this situation. If the trade of the United States is eliminated from North America, the trade balance with "Other, North America" increased from a debit balance of \$2,385,000 in 1914 to a credit balance of \$14,571,000 in 1932. In 1914 the debit balance with the continent of North America amounted to \$221,739,000 and in 1932 it had decreased to \$92,765,000, while the number of countries in North America with which Canada had a debit balance was reduced from eight to six. The Dominion's debit trade balance with the United States from 1914 to 1932 decreased from \$219,354,000 to \$107,336,000, being \$112,018,000 less than last year; with Newfoundland from a credit balance of \$2,900,000 to \$5,417,000; with St. Pierre and Miquelon from a credit balance of \$117,000 to \$8,564,000; with Mexico from a debit balance of \$1,419,000 to a credit balance of \$580,000; with Cuba from a debit balance of \$2,124,000 to a credit balance of \$657,000; with Bermuda from a credit balance of \$397,000 to \$1,901,000; and with the British West Indies from a credit balance of \$143,000 to a debit balance of \$3,323,000.

With the continent of South America the debit balance of \$4,994,000 in 1914 amounted to \$8,348,000 in 1932. The debit balance of \$468,000 with Argentina in 1914 was changed to a credit balance of \$1,741,000 in 1932, while the debit balance with Colombia in 1914 of \$125,000 amounted to \$4,499,000 in 1932 and the debit balance with Peru during the same interval increased from \$737,000 to \$2,885,000.

The most notable change in the trade balance with any continent, from 1914 to 1932, occurred with the continent of Asia, a debit balance of \$8,118,000 being converted into a credit balance of \$9,755,000. The principal countries responsible for this change were Japan and China, the trade balance of the former increasing from a debit balance of \$1,015,000 to a credit balance of \$10,587,000; and of the latter from a debit balance of \$440,000 to a credit balance of \$2,211,000. The credit balance with the continent of Asia, and particularly with China and Japan, was much less in 1932 than in 1930 due to falling off in the exports of wheat and flour to the Orient in 1932.

CONDENSED PRELIMINARY TRADE REPORT

43

The credit trade balance with Oceania from 1914 to 1932 decreased from \$2,603,000 to \$720,000 and with Africa increased from \$3,459,000 to \$4,331,000. From 1914 to 1932 the trade balance with Australia decreased from a credit balance of \$3,993,000 to a debit balance of \$307,000; while with British South Africa the credit balance increased from \$3,358,000 to \$4,079,000; and with New Zealand from a debit balance of \$1,256,000 to a credit balance of \$2,648,000.

Principal Commodity Imports.—The statistics in the following table showing "One Hundred Leading Commodities Imported into Canada, 1932" indicate that the total declared value of these commodities amounted to \$466,228,388 or 81.0 per cent of Canada's total imports. Of the one hundred commodities listed four only show increases in value, and ninety-six decreases. Of the forty-six commodities for which there were quantity statistics, seven show increases in the quantity imported but decreases in the value; while thirty-five show decreases in both quantity and value, and four increases in both quantity and value. Of the fifty-four commodities for which there were no quantity statistics, being entered at value only, the whole number show decreases. The commodities imported which show (a) increases in the quantity but decreases in the value, and (b) increases in both the quantity and value, 1932, compared with 1931, were:—

(a) COMMODITIES TO SHOW INCREASES IN QUANTITY BUT DECREASES IN VALUE

Commodity	Imports, 1932		Increase in Quantity	Decrease in Value
	Quantity	Value		
Crude petroleum..... Gal.	1,076,277,111	\$ 24,194,084	19,333,659	\$ 14,384,382
Sugar for refining..... Lb.	951,344,000	19,303,707	69,764,300	1,439,680
Raw silk..... Lb.	2,539,133	6,499,154	584,738	196,690
Raw coffee..... Lb.	32,436,632	3,674,413	935,036	691,224
Nuts (except coconuts)..... Lb.	43,196,233	3,489,156	1,811,329	254,402
Molasses..... Gal.	9,093,746	1,793,315	537,174	429,739
Rice..... Lb.	67,066,000	1,414,756	15,293,500	245,639

(b) COMMODITIES TO SHOW INCREASES IN BOTH QUANTITY AND VALUE

Commodity	Imports, 1932		Increase in Quantity	Increase in Value
	Quantity	Value		
Dried fruits..... Lb.	78,032,929	\$ 4,930,373	549,357	\$ 150,265
Dyeing and tanning materials..... Lb.	36,895,878	3,445,810	5,375,548	157,602
Noils, tops and waste wool..... Lb.	7,661,278	2,844,145	783,092	49,906
Binder twine..... Lb.	22,098,100	1,521,773	11,487,200	362,203

In the case of the forty-six commodities for which there were quantity statistics, thirty-eight of these were imported at a lower price per unit in 1932 than in 1931, and eight at a higher price. Those imported at a lower price per unit were valued at \$225,163,821, while those imported at a higher price were valued at \$18,981,655. The thirty-eight commodities entered at a lower average import price were: Artificial silk yarn, automobiles, band and hoop iron, binder twine, coal, cocoa and chocolate, raw coffee, corn, raw cotton, cotton yarn, dyeing and tanning materials, fertilizers, canned fruits, gasoline, raw hides, iron ore, jute cloth and canvas, lumber, manila and sisal grass, molasses, nails, tops and waste wool, nuts (edible), crude petroleum oil, vegetable oils, pigs and ingots (iron), plates and sheets (iron), rice, crude rubber, raw silk, spirits and wines, structural iron and steel, raw sugar, refined sugar, tea, tin in blocks, raw tobacco, raw wool and woollen yarns. The eight commodities imported at a higher average import price were: Alumina and bauxite, bars and rails, coke, dried fruits, rods of iron and steel, soda and compounds, sulphur and canned vegetables.

Imports for Canadian Industries.—An analysis of the statistics in the following table giving "Imports of Sixty-two Leading Commodities for Canadian Industries, 1932" indicate that about one-third of the total imports into Canada consist of commodities for use in the various industries of the Dominion. The total value of the sixty-two commodities imported for Canadian industries in 1932 amounted to \$168,822,711, compared with a similar import in 1931 valued at \$253,943,854, representing a decrease of \$85,121,143 or 33.9 per cent, while the total decrease in Canada's imports was \$328,108,791 or 36.2 per cent. The proportion of these imports classified according to degree of manufacture, with decrease, 1932 compared with 1931 was: Raw materials, \$84,118,005, decrease \$45,815,249 or 35.3 per cent, semi-manufactured, \$41,264,679, decrease \$16,599,864 or 29.1 per cent, and fully manufactured, \$43,440,027, decrease \$22,706,030 or 35.6 per cent.

The statistics in the following summary fully amplify this point:—

IMPORTS FOR CANADIAN INDUSTRIES CLASSIFIED ACCORDING TO DEGREE OF MANUFACTURE

Degree of Manufacture	Imports, 1932		Decrease, 1932 compared with 1931		
	Value	Per cent of Total	Value	Per cent of Total	Percentage of Decrease
Raw materials.....	\$ 84,118,005	% 49.8	\$ 45,815,249	% 53.8	% 35.3
Semi-manufactured.....	41,264,679	24.4	16,599,864	19.5	29.1
Fully manufactured.....	43,440,027	25.8	22,706,030	26.7	35.6
Total 62 Commodities.....	168,822,711	100.0	85,121,143	100.0	33.9

The decrease in the imports of products for use in Canadian industries, especially raw materials, naturally reflects a corresponding slowing down of those industries dependent on imported raw materials. From 1931 to 1932 the decrease in the sixty-two commodities listed for Canadian industries amounted to \$85,121,143 or 33.9 per cent, whereas the decrease in other commodities imported (excluding the sixty-two commodities for Canadian industries) amounted to \$242,987,648 or 37.2 per cent, indicating that proportionately the decrease in those commodities for Canadian industries was less than for those for other purposes.

A further analysis will show that fifty-seven of the sixty-two commodities listed as for use in Canadian industries show decreases, and only five show increases; while forty-two of the forty-seven commodities for which there are quantity statistics show decreases and five only, increases. Of the forty-seven commodities for which there are quantity statistics, six show increases in the quantities imported, but decreases in the value, viz.: Crude petroleum, sugar for refining, raw silk, raw coffee, oil for soap industry, grease for soap and leather industry; while thirty-seven show decreases in both quantity and value, and five increases in both quantity and value. Of the fifteen commodities entered at value only every one of the fifteen shows a decrease.

Of the forty-seven commodities listed for use of Canadian industries for which there are quantity statistics, an investigation shows that thirty-seven of these, valued at \$125,480,024 were imported at a lower average import price in 1932 than in 1931, and ten, valued at \$14,504,542, at a higher import price; while in the case of the fifteen commodities, which were entered at value only, the whole fifteen valued at \$28,838,145, show decreases in 1932 compared with 1931. The thirty-seven commodities which entered Canada for Canadian industries at lower import price in 1932 than in 1931 were: Artificial silk yarn, bristles, bituminous coal, raw cocoa, raw coffee, copper bars and rods, raw cotton, cotton yarn, dyeing and tanning materials, glycerine for explosives, grease for soap and leather, gums and resins, hemp, raw hides, boiler plate (iron), iron ore, pigs, ingots and blooms (iron), tin plate (iron) lumber and timber, manila and sisal grass, crude cotton seed oil, crude peanut oil, oil for soap industry, crude petroleum oil, ores of metals, raw rubber, rubber, hard, reeved, etc., raw silk, silk cloth for dyeing, sugar for refining, tetraethyl lead, tin in blocks, raw tobacco, raw wool, woollen yarn, wool noils, tops and waste, and zinc in sheets and plates. The ten commodities which entered Canada at a higher average import price in 1932 compared with 1931 were: Alumina, bauxite and cryolite, alumina, sulphate of, automobile engines, locomotive tires, logs (wood) manganese oxide, sand, silica, for industries, skelp iron, sulphur, and wire rods.

Canada in common with every manufacturing country of the world is dependent on imported raw materials for certain of her manufacturing industries, e.g., raw rubber, raw cotton, raw silk, sisal fibre, iron ore, bauxite, sulphur, manganese oxide, crude cotton seed oil, crude peanut oil, raw cocoa, coconut oil, etc. A survey of the imports of raw materials into a country dependent on imported raw materials for its industries will indicate as a general rule whether such industries are in a flourishing or depressed condition. For instance an increase in the imports of raw materials for such industries will invariably reflect greater industrial activity in those industries, as well as an increase in the exports of those commodities manufactured from imported raw materials, while a decrease in the imports of raw materials would indicate the very opposite result.

IMPORTS OF SIXTY-TWO LEADING COMMODITIES FOR CANADIAN INDUSTRIES

Principal Commodity Exports.—The following table giving "Seventy Leading Commodities Exported from Canada, 1932" shows that the total value of these commodities was \$537,744,621 or 93.4 per cent of the Dominion's domestic exports. Fifty-nine of the commodities show decreases and eleven increases. Eight of the commodities for which there were quantity statistics show increases in the quantity, but decreases in the value, viz.: Fish, cheese, zinc, soda and compounds, logs (wood), square timber, binder twine, and laths (wood). Ten show increases in both the quantity and value, viz.: Copper bars and rods, barley, oats, cattle, oatmeal and rolled oats, raw tobacco, butter, acids, rye, and malt; while thirty-six show decreases in both quantity and value. Fifteen of the commodities for which there were no quantity statistics show decreases and one only an increase. An analysis also shows that of the fifty-four commodities listed for which there were quantity statistics, forty-nine were entered at a lower average export price per unit in 1932 than in 1931, and five at a higher average export price. The total value, however, of the forty-nine commodities exported for which the export price was lower in 1932 than in 1931 amounted to \$459,009,409, while the total value of the five commodities for which the average export price was higher amounted to \$20,473,360. The total value of the sixteen commodities for which there were no quantity statistics was \$58,261,852, fifteen of which of a value of \$58,100,633 show decreases compared with last year, and one only of a value of \$161,219, an increase.

SEVENTY LEADING CANADIAN COMMODITIES EXPORTED FROM CANADA, 1932

Percentage represented by above Commodities.....				93.4				

Fluctuation in Import and Export Values.—Changes in the values of imports and exports over a given period may be caused by (a) variation in quantity; (b) fluctuations in price; or (c) combination of these two factors. It will be noted by reference to Tables I and II (which follow) re Preliminary Comparison of the Value and Volume of Canada's Imports (p. 51) and Exports (p. 59) that Canada's imports on a declared value basis in 1932 compared with 1931 decreased \$328,108,791 or 36.2 per cent, and her domestic exports \$223,398,365 or 27.9 per cent, whereas on a volume basis during the same period imports decreased \$222,280,365 or 24.5 per cent, and domestic exports \$100,759,980 or 12.6 per cent. Further, it will be noted from these import and export tables that when allowance is made for the fluctuation in Canada's import and export values, 1932 compared with 1931, that the decrease in imports due to price changes accounted for \$105,828,426 or 32.3 per cent of the total decrease in her import trade, while the decrease due to changes in the volume of the import trade accounted for \$222,280,365 or 67.7 per cent; whereas the decrease in the Dominion's domestic exports, due to price changes, accounted for \$122,638,385 or 54.9 per cent of the total decrease in the domestic export trade, while the decrease due to changes in the volume of the export trade accounted for \$100,759,980 or 45.1 per cent.

TABLE I.—PRELIMINARY COMPARISON OF THE VALUE AND VOLUME OF CANADA'S IMPORTS

Trade via the United States.—Canada's imports from overseas countries via the United States have steadily declined in recent years, especially those from the British Empire. This decrease has resulted from: (1) general propaganda to utilize Canadian sea and river ports; (2) additional concessions to goods imported under the British Preferential tariff if imported direct; and (3) provision in trade treaties and agreements negotiated with foreign countries that goods must be imported direct in order to obtain the full benefits of special rates of duty.

There was a decrease in imports from overseas countries via the United States during the fiscal year 1932 compared with similar imports in 1928, of \$7,157,270; the decrease in the imports from the British Empire amounting to \$2,152,323, and from foreign countries to \$5,004,947. The statistics in the following table provide an analysis of this feature of Canada's import trade for the last five fiscal years:—

IMPORTS INTO CANADA VIA THE UNITED STATES

Imports from—	Years ended March 31—				
	1928	1929	1930	1931	1932
United Kingdom via United States.....\$	773,694	987,752	1,042,164	169,820	202,454
Per cent of Total Imports from United Kingdom.....	0.41	0.51	0.55	0.12	0.19
Other British Empire via United States.....\$	2,241,007	1,645,950	1,221,720	807,078	659,924
Per cent of Total Imports from Other British Empire.....	3.55	2.59	1.92	1.45	1.59
Foreign Countries via United States.....\$	9,102,893	8,408,832	7,586,005	7,981,306	4,097,946
Per cent of Total Imports from Foreign Countries.....	6.42	5.99	5.12	6.81	5.19
Total Imports via United States.....\$	12,117,594	11,042,534	9,849,889	8,958,204	4,960,324
Per cent of Total Imports from Overseas Countries.....	3.11	2.78	2.46	2.78	2.19

The exports from Canada to overseas countries via the United States show a decided decrease during recent years, the proportions for the fiscal year 1928 being about 39 per cent, 1929, 36.71 per cent, 1930, 33.9 per cent, 1931, 27.49 per cent and 1932, 18.72 per cent of the total exports to overseas countries. From 1928 to 1932 the proportion of the Dominion's exports to the United Kingdom via the United States decreased from 49.13 to 25.53 per cent; to Other British Empire from 30.21 to 10.09 per cent; and to Foreign Countries from 25.13 to 12.19 per cent. When adjustments are made for the re-routing of Canadian barley, oats, rye and wheat from United States lake ports, via the St. Lawrence route for ocean shipment at Canadian sea or river ports, chiefly Montreal, it will be found that the proportions of Canada's exports to overseas countries via the United States will be considerably decreased and those via Canadian sea or river ports increased by a similar amount. The total value of commodities exported to overseas countries via the United States in 1932 was \$227,366,609 less than for the fiscal year 1928, wheat accounting for \$125,739,609 or 55.3 per cent of the decrease. Comparisons for the past five years were as follows:—

EXPORTS FROM CANADA VIA THE UNITED STATES

Exports to—	Years ended March 31—				
	1928	1929	1930	1931	1932
United Kingdom via United States.....\$	201,784,594	217,590,205	113,333,242	79,880,087	44,683,160
Per cent of Total Exports to United Kingdom.....	49.13	50.68	40.22	36.43	25.53
Other British Empire via United States.....\$	26,762,373	30,749,198	22,762,811	12,746,171	4,593,668
Per cent of Total Exports to Other British Empire.....	30.21	28.90	23.25	17.31	10.09
Foreign Countries via United States.....\$	63,060,434	68,850,420	69,067,677	31,108,810	14,963,964
Per cent of Total Exports to Foreign Countries.....	25.13	20.99	30.62	19.78	12.19
Total Exports via United States.....\$	291,607,401	317,189,823	205,163,730	123,735,068	64,240,792
Per cent of Total Exports to Overseas Countries.....	38.87	36.71	33.90	27.49	18.72

The statistics in the following table giving "Principal Commodities exported from Canada to Overseas Countries via the United States and via Canadian Sea or River Ports, 1932," illustrate the details of this movement. The 37 commodities listed are representative of the Dominion's exports to overseas countries, as they comprise 78.4 per cent of the total exports to overseas countries; and they also represent 88.2 per cent of all goods shipped to overseas countries via the United States, and 76.1 per cent of those going via Canadian sea or river ports. During the past five fiscal years a considerable amount of Canadian grain exported from Fort William and Port Arthur to overseas countries via the United States has been re-routed from United States lake ports for shipment chiefly at Montreal. The amount of Canadian grain re-routed for export at Montreal or other Canadian ports during the calendar years 1925 to 1931 was:—

Grains	1925	1926	1927	1928	1929	1930	1931
	Bushels	Bushels	Bushels	Bushels	Bushels	Bushels	Bushels
Barley.....	1,439,000	361,000	2,533,000	3,085,000	1,035,000	1,114,000	1,593,000
Oats.....	2,395,000	697,000	597,000	394,000	213,000	65,000	153,000
Rye.....	1,170,000	370,000	2,052,000	2,589,000	193,000	399,000	1,575,000
Wheat.....	17,779,000	15,794,000	34,025,000	51,172,000	15,186,000	15,298,000	5,668,000
Total.....	22,783,000	17,222,000	39,207,000	57,240,000	16,627,000	16,876,000	8,989,000

This re-routed Canadian grain was not recorded as an export at Montreal or other Canadian ports because it had already been recorded as an export at Fort William or Port Arthur. It was recorded, however, as "intransit" grain from the United States via the Port of Montreal or other Canadian ports. In order to obtain the actual amount of barley, oats, rye and wheat shipped via Canadian sea or river ports, this re-routed Canadian grain should be added to the quantity already thus recorded and deducted from the quantity shown as exported via United States channels. When adjustments are made the actual quantities of barley, oats, rye and wheat exported to overseas countries via the United States (indirect) and via Canadian sea or river ports (direct) during the fiscal years 1928 to 1932 were:—

Grains	Years ended March 31—					Percentage of Total				
	1928	1929	1930	1931	1932	1928	1929	1930	1931	1932

Canada's Position in International Trade.—On account of the unstable trade conditions which prevailed in 1931 there were many notable changes in the position of some of the leading commercial nations of the world in international trade. Canada in 1930 occupied fifth position in respect to total trade and total imports and sixth position as regards total exports. In 1931, however, Canada occupied seventh place amongst the leading trading countries of the world in total trade and total exports and eighth place in total imports. The statistics in the following table giving "Comparison of the Trade of the Principal Countries of the World" show that Canada in 1913 occupied eighth place in imports amongst the leading trading countries, being exceeded in value by the United Kingdom, Germany, the United States, France, the Netherlands, Belgium and Italy and that in 1931 she also occupied eighth position (fifth in 1930) being exceeded in value by the same countries. In export trade, Canada in 1913 was in tenth place, being exceeded in value of exports by the United Kingdom, the United States, Germany, France, the Netherlands, British India, Belgium, Italy and Argentina, but in 1931 she had moved up to seventh place (sixth in 1930) displacing British India, Italy and the Netherlands. In aggregate trade, Canada in 1913 was in ninth position but in 1931 she was in seventh place (fifth in 1930), being exceeded in value of aggregate trade by the United Kingdom, the United States, Germany, France, Belgium and the Netherlands. Compared with 1913 Canada's imports in 1931 show a decrease of \$42,900,000 or 6.5 per cent, while her domestic exports a betterment of \$169,100,000 or 38.8 per cent and her total trade an improvement of \$126,200,000 or 12.4 per cent.

In trade per capita amongst the leading trading countries of the world, Canada in 1931 occupied ninth place as in 1913, she occupied eighth place in 1930 and fifth place in 1929. In exports per capita Canada occupied seventh place, in 1931 as in the year 1913, being exceeded by Australia, Belgium, Denmark, the Netherlands, New Zealand and Switzerland. In 1930, however, she was in fourth place, and in 1929 in third position. In aggregate trade per capita Canada was in sixth position amongst the leading commercial nations of the world in 1913 but in 1931 she moved down to seventh place, being exceeded in value of aggregate trade by Belgium, Denmark, the Netherlands, Norway, Sweden and Switzerland. In 1929 Canada occupied fourth place in aggregate trade being exceeded by Denmark, the Netherlands and New Zealand. In 1931 the aggregate trade of the following countries per capita arranged in order of importance were: (1) Denmark, \$193.42, imports \$101.65 and exports \$91.77; (2) New Zealand, \$179.48, imports \$74.86 and exports \$104.62; (3) Switzerland, \$179.33, imports \$112.14 and exports \$67.19; (4) The Netherlands, \$169.88, imports \$100.34 and exports \$69.54; (5) Belgium, \$168.41, imports \$85.31 and exports \$83.10; (6) Norway, \$121.73, imports \$78.99 and exports \$42.74; and (7) Canada, \$117.97, imports \$59.51 and exports \$58.46.

With reference to the visible trade balance, Canada in 1931, as in 1929 and 1930 was not in as favourable a position as for the years 1921 to 1927, when the trade balance was favourable to the Dominion, amounting to \$392,900,000 or \$41.95 per capita in 1925. For the calendar year 1931 the trade balance for Canada was unfavourable to the extent of \$10,900,000 or \$1.05 per capita compared with \$103,100,000 or \$10.38 per capita in 1930, while for the year 1913 the unfavourable balance was \$222,900,000 or \$29.61 per capita. On December 31, 1931, Canada stood in ninth position (in 1930 in thirteenth) amongst the leading commercial countries of the world, with reference to the amount of her trade balance, but in eleventh position (in 1930 in fourteenth) as respects her trade balance per capita.

COMPARISON OF THE TRADE OF THE PRINCIPAL COUNTRIES OF THE WORLD

(Calendar years 1913 and 1931)

Canada's Share in World Trade.—Canada, since 1913, has made remarkable progress in the expansion of her trade in the world's principal markets, both in imports and exports. It will be noted from the statistics in the following tables Nos. 1 and 2, showing "Canada's Share in the Imports and Exports of Principal Countries" that in 1913 the total trade of these countries (forty leading countries) amounted to \$34,868,143,000, imports amounting to \$18,257,000,000 and exports to \$16,611,143,000; but in 1930 the total trade of the identical countries was \$44,418,343,000, imports totalling \$23,499,203,000 and exports \$20,919,140,000, the increase from 1913 to 1930 was: in total trade, \$9,550,200,000 or 27.4 per cent; in imports, \$5,242,203,000 or 28.1 per cent; and in exports, \$4,307,997,000 or 25.9 per cent. During the same years, viz.:

1913 and 1930, the trade of these same countries with Canada was: 1913, total trade, \$918,208,000; imports, \$355,222,000; and exports, \$562,986,000; 1930, total trade, \$1,732,976,000; imports, \$821,934,000; and exports \$911,042,000; the increase in the trade with Canada, 1913 to 1930 being: in total trade, \$814,768,000 or 88.8 per cent; in imports, \$466,712,000 or 131.5 per cent; and in exports, \$348,056,000 or 61.8 per cent. From 1913 to 1930 the total trade of the forty leading countries listed in Tables Nos. 1 and 2, increased 27.4 per cent, but with Canada the increase was 88.8 per cent, imports into the identical countries increased 28.1 per cent, but from Canada the increase was 131.5 per cent; while the exports from the same countries increased 25.9 per cent, but to Canada the increase was 61.8 per cent. Canada's share in the trade of these countries was:—imports, in 1913, 1.95 per cent; in 1930, 3.50 per cent; exports, in 1913, 3.39 per cent; in 1930, 4.35 per cent.

In 1930 Canada's stated imports from the forty countries listed amounted to \$991,331,000 out the reported exports from these countries to Canada were valued at \$911,042,000, a discrepancy in favour of Canada of \$80,289,000. A large proportion of this discrepancy (\$31,985,000) occurred in the movement of goods from Europe to Canada and is largely accounted for in the discrepancy between Canada's imports from the United Kingdom and British exports to Canada, due to the fact that goods valued at \$22,622,000 transhipped in bond from the United Kingdom to Canada are credited in Canadian import statistics as an import from the United Kingdom, but in the case of the United Kingdom, are treated as intransit, not being included in the exports to Canada; while the discrepancy for the continent of North America, amounting to \$29,600,000, occurred largely in the movement of commodities from the United States to Canada. Two factors account for discrepancy in United States-Canadian figures: (1) Canadian imports from United States include domestic and foreign export, the foreign exports in 1930 amounting to \$31,300,000, whereas the United States exports to Canada (as shown in Table II) include domestic exports only, thus the Canadian figure in this case is too large by this amount; and (2) the United States show exports of grains to Canada, amounting in 1930 to \$15,100,000, which are only intransit via Canada to overseas countries, and which do not appear in Canadian import or export trade, and thus the United States figure in this instance is too large. The difference between these two sets of figures represents a considerable proportion of the discrepancy between Canada's exports to the North American continent and the declared imports therein from Canada. The discrepancies for the continents of South America (\$6,478,000); and Asia (\$7,215,000), were largely due to the fact that South American and Asiatic countries credit goods destined for Canada, but shipped to Canada via the United States, to the United States and not to Canada.

With reference to the movement of goods from Canada in the calendar year 1930 to the various markets of the world, the declared exports to the forty leading countries amounted to \$853,350,000, while the recorded imports into the forty countries from Canada totalled \$821,934,000, a discrepancy between the two sets of figures of \$31,416,000 in favour of Canada. This discrepancy is due to the fact that a very large proportion of Canada's exports to overseas countries, shipped via the United States, on arrival at their final destination are credited to the United States and not to Canada. The value of goods shipped to overseas countries via the United States in 1930 amounted to over \$123,736,000. Other factors, such as the movement of United States products to overseas countries via Canada, tend to vitiate not only Canada's declared exports but also the imports into overseas countries from Canada. The particulars are set out in the following table, year 1930:—

Principal Countries of	Canada's Imports from	Recorded Exports to Canada	Canada's Exports to	Recorded Imports from Canada
	\$	\$	\$	\$
Europe.....	235,829,000	203,844,000	325,422,000	304,123,000

CANADA'S EXPORTS COMPARED WITH EXPORTS OF OTHER COUNTRIES

Canada in the production and exportation of many staple products ranks high among the leading nations of the world. In the production of printing paper, nickel and asbestos she leads the world; occupies second place in the production of gold; in output of zinc she occupies third place; and fourth place in the production of automobiles, copper, wheat and lead. In the production of wheat Canada in 1931 was in fourth place with 304,144,000 bushels, being exceeded by Russia (production estimated at 925,000,000 bushels, the United States, 894,204,000 bushels, and British India, 347,275,000 bushels). In export trade, the Dominion leads the world in the exports of wheat, printing paper, nickel and asbestos; occupies third place in exports of wheat flour, the United States being in first place, Australia in second place; fourth place in the exports of automobiles and wood pulp, being exceeded in the exports of automobiles by United States, United Kingdom and France, and of wood pulp by Sweden, Norway and Finland; fifth place in the exports of rubber tires, being exceeded by United States, United Kingdom, France and Belgium. The exports of these staple products from Canada make up fifty-five per cent of the Dominion's total domestic exports. Canada also ranks high in the world's exports of many other staple products such as lumber and timber, fish, copper, barley, cheese, raw furs, whiskey, meats, farm implements, pulpwood, cattle, raw gold, silver, rye, oats, rubber footwear, leather and hides.

Automobile Statistics.—The growth of the automobile industry is one of the most remarkable industrial developments of the twentieth century. Thirty years ago the automobile was emerging from the experimental stage and the world production consisted of a few thousand cars. In 1929 the estimated world output was 6,277,451 cars, though in 1931 the output had declined to 3,042,069. Canada has made great progress in recent years in the production and exportation of automobiles. In production Canada in 1931 occupied fourth place with 82,614 cars, made up of 65,093 passenger cars and 17,521 motor trucks, while in 1929 her production was 262,625 cars. The United States occupied first place in 1931 with an output of 2,389,738 cars, of which 1,973,090 were passenger cars and 416,648 were motor trucks; the United Kingdom occupied second place with an output of 223,219 cars; and France third place with 196,860. In 1917 Canada's production was 93,810 automobiles, though from 1904 to 1916 the total production was only 135,000 cars.

Canada's exports of automobiles for the fiscal year 1906, the first year for which export statistics are available, were only 67 cars, valued at \$63,329; in the fiscal year 1911 the exports were 627 cars, valued at \$595,746; ten years later (fiscal year 1921) the exports had increased to 19,910 cars, valued at \$13,979,121, made up of passenger cars 15,620, of a value of \$11,376,268, and motor trucks 4,290, of a value of \$2,602,853; while for the fiscal year 1932 the exports were 8,839 cars valued at \$2,617,251, consisting of passenger cars 5,971, of a value of \$2,557,980, and motor trucks 2,868, of a value of \$1,059,271. Three years ago (fiscal year 1929) Canada's exports of automobiles consisted of 103,566 cars, valued at \$43,059,733, the passenger cars amounting to 72,108, of a value of \$31,264,999, and motor trucks to 31,458, of a value of \$11,794,734.

From the statistics in the following table re "Exports of Automobiles from Principal Automobile Producing Countries of the World," it will be noted that Canada occupied fourth place in the exports of automobiles for the calendar year 1931, with 13,818 cars; the United States being in first place by a considerable margin with 130,705 cars; the United Kingdom in second place with 24,312 cars; France in third place with 22,684 cars; Italy in fifth place with 11,942 cars; and Germany in sixth place with 11,828 cars.

NOTE.—In 1913, the total exports of motor cars were: United States 26,889 cars; United Kingdom 9,814 cars; and Canada 6,306 cars. No statistics available in 1913 as to number of motor cars exported from France, Germany and Italy.

Newsprint Paper.—Production—Canada, according to statistics issued by the Canadian Pulp and Paper Association and from other sources, led the world as a producer of newsprint paper during the Calendar Year 1931, as also for the years 1926 to 1930. The statistics in the following table showing "Production of Newsprint Paper for Principal Paper-Producing Countries of the World" indicate that for 1931 Canada's Production of newsprint paper amounted to 4,442,000,000 pounds; the United States being second with 2,314,000,000 pounds; the United Kingdom third with 1,433,000,000 pounds; and Germany fourth with 1,020,000,000 pounds. The total production of newsprint paper for the world in 1931 was estimated at about 13,200,000,000 pounds, of which Canada, Newfoundland and the United States supplied 56 per cent, and Canada alone about 34 per cent. The estimated production of newsprint paper for eighteen of the leading paper-producing countries of the world was: 1926, 12,092,000,000 pounds; 1927, 12,706,000,000 pounds; 1928, 13,235,000,000 pounds; 1929, 14,641,000,000 pounds; in 1930, 14,230,000,000 pounds; and 1931, 13,056,000,000 pounds.

EXPORTS OF RUBBER TIRES

Newsprint Paper.—Exports—Canada, during the calendar year 1931, occupied first place by a very wide margin among the world's chief exporters of newsprint paper, her exports being over six times as great as those for Newfoundland, her next competitor. From the statistics in the following table giving "Exports of Newsprint Paper from Principal Paper-Producing Countries of the World," it will be observed, that even in 1913 Canada led the world as an exporter of newsprint paper, Norway being in second place, the United Kingdom in third and Finland in fourth place. In 1931 the total quantity of newsprint paper exported by the thirteen leading paper-exporting countries was 6,568,577,000 pounds, compared with 6,220,947,000 pounds in 1927, 6,896,475,000 pounds in 1928, 7,811,572,000 pounds in 1929 and 7,378,458,000 pounds in 1930; of which amount Canada in 1927 contributed 3,763,731,000 pounds or 60·5 per cent; in 1928, 4,413,175,000 pounds or 63·9 per cent; in 1929, 5,030,990,000 pounds or 64·4 per cent; in 1930, 4,665,019,000 pounds or 63·2 per cent and in 1931, 4,016,482,000 pounds or 61·3 per cent. Canada's exports of newsprint paper, therefore, exceeded the exports of the other twelve leading countries combined by 1,306,515,000 pounds in 1927; 1,929,875,000 pounds in 1928; 2,250,408,000 pounds in 1929; 1,951,580,000 pounds in 1930; and 1,464,387,000 pounds in 1931. Canada's exports of newsprint paper are greater than those of the rest of the world combined.

EXPORTS OF NEWSPRINT PAPER FROM PRINCIPAL PAPER-PRODUCING COUNTRIES
OF THE WORLD

Rubber Tire Exports.—Canada's rapid advance as a rubber tire producer and exporter since the war has been based on the great development of the automobile industry. In the fiscal year 1917, the first year for which there are export statistics of rubber tires, the exports of rubber tires from Canada were valued at \$726,768; ten years later (fiscal year 1927) the exports had increased to \$18,565,909; in 1930 the exports were valued at \$18,153,225, but in 1931 the exports had dropped to \$11,764,948; and in 1932 to \$5,147,205 the decrease being due to the drastic decline in the price of raw rubber and other materials used in the tire industry. Export figures show that when there is a marked increase or decrease in the exports of automobiles, there is also a marked increase or decrease in the exports of rubber tires, thus indicating the close relation existing between the two industries. Thus, from 1917 to 1927 the increase in the exports of automobiles was \$27,146,353 and rubber tires \$17,839,141, but from 1930 to 1932 automobiles show a decrease of \$31,690,394 and rubber tires a decrease of \$12,996,017.

It will be observed by reference to the statistics in the following table re "Exports of Rubber Tires from the Principal Rubber Tire-Producing Countries of the World" that Canada occupied fifth position in 1931 with an export valued at \$6,478,552, but in the years 1927 to 1929 she was in third position. The United States in 1931 occupied first place with an export valued at \$20,437,949, the United Kingdom second place with an export valued at \$15,147,681; France third position with an export valued at \$11,092,479; and Belgium in fourth place with an export valued at \$8,652,988. In 1929 the United Kingdom was in second position and France in fourth position, but in 1927 and 1928 France occupied second place and the United Kingdom fourth place.

Wheat Exports.—The rapid increase in the production of wheat in the Prairie Provinces during the past decade and a half or so, and the practical elimination of Russia, Roumania and other wheat producing countries of Europe as leading factors in the grain trade up to three years ago, have had the effect of establishing Canada, up to that time, in second place as a wheat producing country, the first place being held by the United States. During the past two years, however, Russia has enormously increased her production of wheat, so that in 1928 and 1929 (according to latest information) she occupied second position in wheat production, while Canada during 1929, with the falling off in her wheat yield, moved down to fifth position in the world's wheat production. In 1931 Russia was in first place, with an estimated production of 925,000,000 bushels; the United States in second with 894,204,000 bushels; British India in third place with 347,275,000 bushels; and Canada in fourth place with 304,144,000 bushels.

With reference to exports of wheat for the calendar year 1931, Canada occupied first place, with an export of 194,826,000 bushels, Argentina second position with an export of 133,661,000 bushels, and Russia third place with an export of 91,700,000 bushels; and the United States in fourth place with 80,311,000 bushels. Canada's exports of wheat for the past nine years, as also for the year 1913, have exceeded those of the United States. The Dominion's exports of wheat for the fiscal year 1900 amounted to only 16,845,000 bushels; in 1910 they totalled 49,741,000 bushels, in 1920, 77,978,000 bushels; while in 1931 they amounted to 217,243,000 bushels; and in 1932 they amounted to 191,316,000 bushels. It will be noted by reference to the statistics in the following table showing "Exports of Wheat from Principal Wheat-Producing Countries of the World" that in 1913 Canada occupied first place as a wheat-exporting country, with an export of 129,950,000 bushels. Russia being in second place with an export of 121,953,000 bushels, Argentina in third place with 103,300,000 bushels, and the United States in fourth place with 99,509,000 bushels. In 1931 the order had been changed considerably, Canada being in first place, Argentina in second, Russia in third place, and the United States in fourth place. Canada having occupied first place in wheat exports for some years yielded first place to Argentina in 1929 but reverted to first position again in 1930. Wheat occupies first place among Canada's exports.

Wheat Flour Exports.—Canada, since the opening of the twentieth century, has made remarkable progress in the flour-milling industry. This expansion in her flour production is reflected in the increase in the Dominion's flour exports. To-day Canada ranks third among the countries of the world as a wheat-flour exporting country, the first place being occupied by the United States and second place by Australia. Canada's exports of wheat-flour for the fiscal year 1900 amounted to 768,000 barrels; ten years later they totalled 3,064,000 barrels; in 1920 they amounted to 8,863,000 barrels; and in 1932 to 5,414,000 barrels; compared with 11,267,000 barrels in the fiscal year 1929.

It will be noted from the statistics in the following table showing "Exports of Wheat Flour from Principal Flour-Producing Countries of the World" that in 1931 Canada was in third place with an export of 5,697,000 barrels; the United States being in first place with an export of 9,654,000 barrels; Australia in second place with 6,455,000 barrels; France in fourth place with 3,869,000 barrels; United Kingdom in fifth place with 2,350,000 barrels; and Japan in sixth place with 1,520,000 barrels. The exports of wheat-flour from the United States in 1931 were 2,616,000 barrels less than in 1913; from Canada 803,000 barrels greater and from Australia 4,193,000 barrels greater. From 1928 to 1931 the wheat-flour exports of the United States decreased from 11,848,000 to 9,654,000 barrels; from Canada from 10,737,000 to 5,697,000 barrels; while the wheat-flour exports from Australia during the same period increased from 4,879,000 to 6,455,000 barrels.

EXPORTS OF WHEAT

EXPORTS OF WHEAT FLOUR

EXPORTS OF WOOD PULP

Wood Pulp Exports.—Canada's great advance as a newsprint paper producer and exporter since the opening of the present century, has been based on the great expansion of her wood pulp industry. Canada's exports of wood pulp during the fiscal year 1890 were valued at only \$168,000 and in 1900 at \$1,816,000. In the year 1910 the Dominion's exports of wood pulp amounted to 590,346,000 pounds, value \$5,205,000; in 1920, or ten years later, they amounted to 1,538,958,000 pounds, value \$41,383,000; and in 1932 to 1,176,256,000 pounds, value \$27,685,000. The decrease in the exports of wood pulp from Canada, from 1920 to 1932, is chiefly due to the fact that year by year larger quantities of wood pulp are used in the Canadian paper industry in the manufacture of newsprint and other forms of paper, and consequently the product is being exported in a manufactured form (paper) rather than in a semi-manufactured form (wood pulp). According to statistics in the following table giving "Exports of Wood Pulp from Principal Countries of the World," Canada, during the calendar year 1931 occupied fourth position among the world's exporters of wood pulp, with an export of 1,245,074,000 pounds; the first place being held by Sweden, with an export of 4,001,555,000 pounds; Finland was in second place with an export of 2,123,206,000 pounds; while Norway was in third place with an export of 1,432,237,000 pounds. In exports of chemical pulp in 1931 Canada occupied third position, with an export of 905,854,000 pounds, the first place being held by Sweden, by a wide margin, with an export of 2,911,305,000 pounds; and second place by Finland with an export of 1,550,463,000 pounds. With regard to exports of mechanical pulp, Canada occupied fourth place in 1930 with an export of 339,220,000 pounds; the first, second and third places being held by Norway with 1,141,452,000 pounds; Sweden, 1,090,250,000 pounds; and Finland, 572,543,000 pounds. In 1913 Sweden occupied first place as an exporter of wood pulp, Norway second place, and Canada third.

HISTORICAL SUMMARY OF CANADA'S TRADE, BY DECADES, 1890 TO 1930, AND THE YEAR 1932

Canada's import and export trade has changed very materially since 1890, both as to its origin and destination as well as in its character. The statistics in the following Tables Nos. 1 and 2, relative to Canada's imports and exports, by countries, indicate that the Dominion's trade, both import and export, and especially export, with "Other Countries," *i.e.* countries except the United Kingdom and the United States, made very little progress from 1890 to 1900 or even 1910, but that from 1910 on there was a marked improvement in this trade. This betterment in Canada's trade with "Other Countries" was no doubt due to the provision in the Customs Tariff Act, 1907, for the extension of benefits of the British Preferential Tariff in whole or in part to any British Country and the benefits of the Intermediate Tariff in whole or in part to any British or foreign country that grants trade benefits to Canada satisfactory to the Governor in Council. Prior to 1907 Canada had no bargaining machinery of this kind. In 1890 Canada's imports from "Other Countries" amounted to \$17,040,000; in 1900 they totalled \$26,147,000; in 1910 they had increased to \$56,977,000; in 1930 to \$211,652,000; in 1931 the imports were \$172,699,000; and in 1932 they were valued at \$120,446,000; while in 1890 the Dominion's exports to "Other Countries" were valued at \$7,546,000; in 1900 at \$14,413,000; in 1910 they were valued at only \$35,566,000; in 1930 at \$323,463,000; in 1931 at \$230,836,000; and in 1932 they amounted to \$167,114,000. Compared with 1930, imports in 1932 from "Other Countries" show a decrease of \$91,206,000, and exports to a decrease of \$156,349,000, the decline in the trade, both import and export, being due to decreases in both the volume and the value, though the decrease in the value was more pronounced than in the volume due to drastic declines in commodity prices.

Further, from these Tables Nos. 1 and 2, it will be noticed that the imports from the United States from 1890 to 1932 increased from \$51,366,000 to \$351,687,000; the United Kingdom from \$43,277,000 to \$106,372,000; France from \$2,616,000 to \$13,570,000; Germany from \$3,779,000 to \$11,658,000; the British West Indies (including Bermuda) from \$1,182,000 to \$11,861,000; the British East Indies from \$183,000 to \$7,239,000; Japan from \$1,258,000 to \$5,990,000; Belgium from \$721,000 to \$5,048,000; the Netherlands from \$422,000 to \$5,828,000; Argentina from \$25 to \$2,608,000; New Zealand from \$12 to \$1,080,000; British Africa from \$113,000 to \$6,083,000; Switzerland from \$317,000 to \$3,688,000; Italy from \$163,000 to \$4,193,000; Colombia from \$1,600 to \$5,035,000; China from \$842,000 to \$3,726,000; and Australia from \$205,000 to \$5,697,000; while Canada's domestic exports to the United States from 1890 to 1932 increased from \$36,213,000 to \$235,187,000; the United Kingdom from \$41,499,000 to \$174,044,000; Japan from \$27,000 to \$16,556,000; Belgium from \$41,000 to \$14,036,000; the British West Indies (including Bermuda) from \$1,461,000 to \$10,222,000; Italy from \$81,000 to \$4,265,000; France from \$278,000 to \$17,954,000; Germany from \$461,000 to \$10,405,000; New Zealand from \$20,000 to \$3,724,000; British Africa from \$23,000 to \$9,174,000; St. Pierre and Miquelon from \$161,000 to \$8,642,000; Newfoundland from \$982,000 to \$6,602,000; the Netherlands from \$1,000 to \$13,502,000; Argentina from \$763,000 to \$4,345,000; China from \$32,000 to \$5,908,000; the British East Indies from \$9,000 to \$3,441,000; and Australia from \$471,000 to \$5,388,000.

By reference to Tables Nos. 3 and 4 which show the trend of Canada's imports and exports since 1890, it will be noted that there has been a marked change in the character of the Dominion's imports and exports, as well as in the importance of the various commodities which comprise the import and export trade. In the imports and exports of leading commodities from 1890 to 1932, it will be observed that commodities that occupied an important position in Canada's import and export trade in 1890 have, due to economic changes in the industrial life of the country, been materially changed in their importance in relation to other commodities in 1932.
